» ACTIVE INSULATED HYDRATION

It's time to revolutionize hydration on the go! Meet the new Tempo H2O and Pace H2O packs. Don't miss a beat on the trail with the fully insulated hydration compartment, slim design, and cool ventilation. The new vapor-barrier liner, and multi-layered insulation was designed to keep your hydration staying colder, longer. Like up to 4 hours, longer.

MEN'S 3L - 6L

WOMEN'S 3L - 6L

FEATURES

- › Dual-layer 3D foam back panel allows for a snug fit, while still providing that cool and comfy airflow
- › Perforated and breathable shoulder harness, includes magnetic sternum strap buckle for quick bite valve attachment
- › Includes 3D Hydro quick-drying, soft molded reservoir (2 Liter) with integrated drying hanger and spine molded handle for easy refills
- › U-Zip access to dedicated insulated hydration reservoir pocket with revolutionary SpeedClip hydration hanger
- › Insulated hydration compartment combines vapor-barrier liner with specialized insulation to keep water cold for up to four hours
- › Front stretch-mesh pocket for additional on-the-go storage *6L only
- › Front elastic bungee system for overflow storage *3L only
- › Removable hipbelt stabilizer strap for versatility of fit preference and activity
- › Top quick-access zippered pocket with key clip
- › Interior mesh stash pockets to keep trail essentials organized *6L only
- › Custom ComfortGrip molded zipper pulls
- › Front reflective light attachment loop and top reflective gear loops

3D RESERVOIR INCLUDED

Minimize drying time and bacteria growth with a soft-molded, 3D design. Maximize usability with the molded spine handle and EasyGrip fill port for simple and convenient refilling.

COLD WATER, LONGER

Designed to keep water colder, longer. The integrated hydration compartment combines a vapor-barrier liner with specialized insulation layers to keep water cold 2X longer than a standard hydration pack.

BREATHABLE BACKPANEL

3D dual-layer construction provides space for airflow even with the pack on your back. Multicolored, dynamic mesh, flows seamlessly from the backpanel into the shoulder harness.

QUICK DISCONNECT

QUICKDRY HANGER

SPEEDCLIP

DRYLOCK MAGNETIC BITE VALVE
