

## LENS INFORMATION

All Sunski lenses are **polarized, block 100% of UVA/B/400 wavelengths** and pass the FDA basic impact test. We pride ourselves on lens quality and consistency that competitors at our price point simply do not offer.

### TAC Lens

- **Lightweight** and **durable** with great optical clarity. Perfect for long days outside.
- Excellent **impact** and **scratch resistance**
- Our TAC is heat pressed, unlike competitors, making it glue-free and less prone to delamination
- Find our TAC Lens in the **Everyday, Sport, Layback and Kids Collections**

### Helio Lens

- **Polycarbonate** material that is ideal for sports and high speed activity.
- Highest level of **impact** and **scratch resistance**
- **Excellent optical clarity** great for high octane days outside
- Find our Helio Lens in the **Alpine, Apex and Wild Eyes Collection**

### CR-39 Premium Lens

- **Premium optical clarity** and **lightweight all day comfort** at half the weight of glass lenses
- **Outstanding optical clarity** on an index of refraction only slightly lower than that of crown glass
- Typically only found in sunglasses \$250+ in retail, so it is unavailable with any of our competitors
- Find our CR-39 Premium Lens in the **Premium Collection**
