

HYDRO 2L RESERVOIR

A simple way to never be without water, the Hydro 2L Reservoir takes the struggle out of using a hydration reservoir. Simply unscrew the leak-proof cap, just like your favorite water bottle, and easily fill with water thanks to the EasyGrip handle. The SpeedClip backpack connection allows you to secure it into your pack with one hand, and the included magnetic bite valve keeps access to water conveniently on your pack's sternum strap.

3D HYDRO 2L & 3L RESERVOIRS

Gregory's 3D Hydro Reservoir is engineered with a patented, flex-molded 3D design that performs like a reservoir but dries as quickly, and cleanly as a water bottle. The spine co-molded handle and rigid baseplate provide stable, hassle-free refills and the integrated hose port and routing for ease of use never seen before in a hydration reservoir.

3D HYDRO TREK 3L RESERVOIR

It's time for a new reservoir in the backcountry. Gregory's 3D Hydro Trek is a versatile reservoir designed for backpacking, backcountry kitchens and everyday hiking. The unique, round shape is specifically designed to fit at the top of your backpack, both to keep the load balanced and for easy trail access in larger, top-loading packs. Upgrade your backcountry kitchen setup with the reservoir's push-button pour-spout, integrated quick-disconnect compatible with your water filter and a built-in basecamp hanger. You get all the benefits of our quick-drying 3D molded design, in a package designed for extended trips in the backcountry and everyday adventures.
