

# ALERT FM Emergency Notification Systems

## IN TIMES OF CRISIS...

Alert FM is a reliable system of sending mass notifications in times of crisis. Alert FM devices are not dependent on power or cellular technology. The information is transmitted over existing FM radio signals. The system uses overlapping signals of FM stations to ensure delivery within seconds.

## STAYING INFORMED...

This receiver will keep community members informed in times of crisis or emergency when power, internet and/or cellular networks fail. When a message needs to be sent out, Butte County Sheriff's Office staff will craft an emergency message and select which geographic area the message will be sent to. Only the receivers in the targeted area will be alerted.

## FREE DEVICES...

FREE Alert FM devices are available on a FIRST COME, FIRST SERVED basis for those that meet eligibility guidelines. Supplies are limited. To register for the program or for registration information, call (530) 552-6887 or register at [www.buttecounty.net/dess](http://www.buttecounty.net/dess).
