

St. Royale Green Tea Peach Flavored Vodka is a refreshing blend of neutral grain spirits, green tea extract, organic peach flavor, and natural honey. By using honey as our only natural sweetener we are able to provide our clients with one of the lowest calorie beverages on the market today that is Gluten-Free. Through normal distillation many of the impurities that are found in vodka are removed. By way of small batches our product is six-times distilled, which allows us to take advantage of a refined product by adding the green tea extract in at just the right time - after the third distillation cycle - which allows more of the tea to remain and be more potent. The vodka is then distilled three more times removing any toxins and combining the vodka, green tea, peach and honey. The end result is a crisp and clear vodka with a smooth and invigorating taste. Each time consumers take a sip they not only will experience a luxury beverage, but also will join us in our support of bee species and their habitat. Honeybee populations around the world have been declining, and so St. Royale Vodka has partnered with the BEE Girl Organization in efforts to help protect the bees that produce the honey needed to create our product.

TAKE A SIP AND BEE ROYALE!
