

**The award-winning St. Royale Premium Vodka is a spectacularly refreshing vodka made in small batches and distilled six times. Our vodka arrives as a neutral grain spirit, made from corn being fermented and distilled until "only the heart of distillate remains," leaving fewer impurities. The quality and flavor are further enhanced by the vodka's water source, as we use only the best ultra-clean alkaline water available. Due to such an intricate process, we give customers a smooth, clean, crisp, Gluten-Free vodka that is second to none.**

***TAKE A SIP AND BEE ROYALE!***
