INDEPENDENT AUDITORS' REPORT

Board of Directors
River Plantation Municipal Utility District
Montgomery County, Texas

We have audited the accompanying financial statements of River Plantation Municipal Utility District as of September 30, 2012, and for the year then ended, as listed in the table of contents. These financial statements are the responsibility of the management of River Plantation Municipal Utility District. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of River Plantation Municipal Utility District as of September 30, 2012, and the changes in its financial position for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis on Pages 2 to 6 and Schedule of Revenues, Expenditures and Changes in Fund Balance, Budget and Actual, General Fund, on Page 16 be presented to supplement the basic financial statements. Such information, although not part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise River Plantation Municipal Utility District's financial statements as a whole. The supplementary information on Pages 17 to 27 is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. Except for the portion marked "unaudited," this supplementary information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole. The supplementary information marked "unaudited" has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on it. The accompanying supplementary information includes financial data excerpted from prior year financial statements which were audited by other independent auditors whose report dated January 18, 2012, expressed an unqualified opinion on those statements.

Management's Discussion and Analysis

Using this Annual Report

Within this section of the River Plantation Municipal Utility District (the "District") annual report, the District's Board of Directors provides narrative discussion and analysis of the financial activities of the District for the fiscal year ended September 30, 2012.

The annual report consists of a series of financial statements plus additional supplemental information to the financial statements as required by its state oversight agency, the Texas Commission on Environmental Quality. In accordance with required reporting standards, the District reports its financial activities as a special-purpose government. Special-purpose governments are governmental entities which engage in a single governmental program. In the District's case, the single governmental program is provision of water and sewer services. The financial statements of special-purpose governments combine two types of financial statements into one statement. These two types of financial statements are the government-wide financial statements and the fund financial statements. The fund financial statements are presented on the left side of the statements, a column for adjustments is to the right of the fund financial statements, and the government-wide financial statements are presented to the right side of the adjustments column. The following sections describe the measurement focus of the two types of statements and the significant differences in the information they provide.

Government-Wide Financial Statements

The focus of government-wide financial statements is on the overall financial position and activities of the District. The District's government-wide financial statements include the statement of net position and statement of activities, which are prepared using accounting principles that are similar to commercial enterprises. The purpose of the statement of net position is to attempt to report all of the assets and liabilities owned by the District. The District reports all of its assets when it acquires or begins to maintain the assets and reports all of its liabilities when they are incurred.

The difference between the District's total assets and total liabilities is labeled as *net position* and this difference is similar to the total owners' equity presented by a commercial enterprise.

The purpose of the statement of activities is to present the revenues and expenses of the District. Again, the items presented on the statement of activities are measured in a manner similar to the approach used by a commercial enterprise in that revenues are recognized when earned or established criteria are satisfied and expenses are reported when incurred by the District. Thus, revenues are reported even when they may not be collected for several months or years after the end of the accounting period and expenses are recorded even though they may not have used cash during the current period.

Although the statement of activities looks different from a commercial enterprise's income statement, the financial statement is different only in format, not substance. Whereas the bottom line in a commercial enterprise is its net income, the District reports an amount described as *change in net position*, essentially the same thing.

Fund Financial Statements

Unlike government-wide financial statements, the focus of fund financial statements is directed to specific activities of the District rather than the District as a whole. Except for the General Fund, a specific fund is established to satisfy managerial control over resources or to satisfy finance-related legal requirements established by external parties or governmental statutes or regulations.

Governmental fund financial statements consist of a balance sheet and statement of revenues, expenditures and change in fund balances and are prepared on an accounting basis that is significantly different from that used to prepare the government-wide financial statements.

In general, these financial statements have a short-term emphasis and, for the most part, measure and account for cash and other assets that can easily be converted into cash. For example, amounts reported on the balance sheet include items such as cash and receivables collectible within a very short period of time, but do not include capital assets such as land and water and sewer systems. Fund liabilities include amounts that are to be paid within a very short period after the end of the fiscal year. The difference between a fund's total assets and total liabilities is labeled the fund balance, and generally indicates the amount that can be used to finance the next fiscal year's activities. Likewise, the operating statement for governmental funds reports only those revenues and expenditures that were collected in cash or paid with cash, respectively, during the current period or very shortly after the end of the fiscal year.

Because the focus of the government-wide and fund financial statements are different, there are significant differences between the totals presented in these financial statements. For this reason, there is an analysis in Note 3 of the notes to the financial statements that reconciles the total fund balances to the amount of net position presented in the governmental activities column on the statement of net position. Also, there is an analysis in Note 3 of the notes to the financial statements that reconciles the total change in fund balances for all governmental funds to the change in net position as reported in the governmental activities column in the statement of activities.

Financial Analysis of the District as a Whole

Financial Analysis of the District as a Whole begins with an understanding of how financial resources flow through the District's funds. Resources in the Capital Projects Fund are derived principally from proceeds of the sale of bonds, and expenditures from this fund are subject to the Rules of the Texas Commission on Environmental Quality. Resources in the Debt Service Fund are derived principally from the collection of property taxes and are used for the payment of tax collection costs and bond principal and interest. Resources in the General Fund are derived principally from property taxes and billings for water and sewer services and are used to operate and maintain the system and to pay costs of administration of the District.

Management has financial objectives for each of the District's funds. The financial objective for the Capital Projects Fund is to spend the funds as necessary in accordance with the Rules of the Texas Commission on Environmental Quality. The financial objective for the General Fund is to keep the fund's expenditures as low as possible while ensuring that revenues are adequate to cover expenditures and maintaining the fund balance that Management believes is prudent. Management believes that these financial objectives were met during the fiscal year.

Management believes that the required method of accounting for certain elements of the government-wide financial statements makes the government-wide financial statements as a whole not useful for financial analysis. In the government-wide financial statements, capital assets and depreciation expense have been required to be recorded at historical cost. Management's policy is to maintain the District's capital assets in a condition greater than or equal to the condition required by regulatory authorities, and management does not believe that depreciation expense is relevant to the management of the District. In the government-wide financial statements, property tax revenues are required to be recorded in the fiscal year for which the taxes are levied, regardless of the year of collection. Management believes that the cash basis method of accounting for property taxes in the funds provides more useful financial information.

The following required summaries of the District's overall financial position and operations for the past two years are based on the information included in the government-wide financial statements. For the reasons described in the preceding paragraph, a separate analysis of the summaries is not presented.

Summary of Net Position

	<u>2012</u>	<u>2011</u>	<u>Change</u>
Current and other assets	\$ 1,690,709	\$ 1,315,992	\$ 374,717

*Restated. See Note 11 of the notes to the financial statements.

Financial Analysis of the District's Funds

The District's combined fund balances as of the end of the fiscal year ended September 30, 2012, were \$1,542,878, an increase of \$366,220 from the prior year.

The General Fund balance increased by \$366,220, in accordance with the District's financial plan.

General Fund Budgetary Highlights

The Board of Directors did not amend the budget during the fiscal year. There were several significant differences between the budgetary amounts and the actual amounts. Actual service and surface water revenues and professional fees expenditures were higher than budgeted and salaries and benefits, utilities, repairs, maintenance and other expenditures, and capital outlay expenditures were lower than budgeted. The budgetary fund balance as of September 30, 2012, was expected to be \$1,176,684 and the actual end of year fund balance was \$1,542,878.

Capital Asset and Debt Administration

Capital Assets

Capital assets held by the District at the end of the current and previous fiscal years are summarized as follows:

	<u>Capital Assets (Net of Accumulated Depreciation)</u>		
	<u>2012</u>	<u>2011</u>	<u>Change</u>
Land	\$ 67,672	\$ 67,672	\$ 0
Buildings and improvements	84,175	89,473	(5,298)
Machinery and equipment	8,712	10,845	(2,133)
Infrastructure	<u>3,392,507</u>	<u>3,624,703</u>	<u>(232,196)</u>
Totals	<u>\$ 3,553,066</u>	<u>\$ 3,792,693</u>	<u>\$ (239,627)</u>

Changes to capital assets during the fiscal year ended September 30, 2012, are summarized as follows:

Additions:		
Chlorine building		\$ 8,935
Decreases:		
Depreciation		<u>(248,562)</u>
Net change to capital assets		<u>\$ (239,627)</u>

Debt

At September 30, 2012, the District had no outstanding bonds and \$1,150,000 of bonds authorized but unissued for the purposes of acquiring, constructing and improving the water, sanitary sewer and drainage system within the District.

RELEVANT FACTORS AND WATER SUPPLY ISSUES

Property Tax Base

The District's tax base increased approximately \$1,600,000 for the 2011 tax year (approximately 1%).

Relationship to the City of Conroe

Under existing Texas law, since the District lies totally within the extraterritorial jurisdiction of the City of Conroe, the District must conform to a City of Conroe ordinance consenting to the creation of the District. In addition, the District may be annexed by the City of Conroe without the District's consent. If the District is annexed, the City will assume the District's assets and obligations (including the bonded indebtedness) and dissolve the District within ninety (90) days.

The District is authorized to enter into a strategic partnership agreement with the City of Conroe to provide the terms and conditions under which services would be provided and funded by the parties and under which the District would continue to exist for an extended period if the land within the District would be annexed for limited purposes by the City. The terms of any such agreement would be determined by the City and the District, and could provide for the conversion of a limited purpose annexation to a general purpose annexation within ten years, or the payment of a fee in lieu of annexation.

The District is not aware of any plans regarding annexation or a strategic partnership with the City of Conroe.

Water Supply Issues

The District is within the boundaries of the Lone Star Groundwater Conservation District ("LSGCD"). The LSGCD was created by the Legislature of the State of Texas in Acts 2001, 77th Legislature, Regular Session. The LSGCD is a political subdivision of the State of Texas, governed by an appointed nine member board of directors. The purpose of the LSGCD is to provide for the conservation, preservation, protection, recharging, and prevention of waste of groundwater, and of groundwater reservoirs or their subdivisions, and the control of subsidence caused by the withdrawal of water from those groundwater reservoirs or their subdivisions, consistent with the objectives of Section 59, Article XVI, Texas Constitution. Rule 8.1 of the rules of the LSGCD authorizes the board of directors of the LSGCD to establish by resolution a regulatory water use fee to accomplish the purposes of the LSGCD. In accordance with this rule, as of September 30, 2012, the LSGCD had established a regulatory water use fee of \$0.06 per 1,000 gallons of water pumped from each regulated well.

RIVER PLANTATION MUNICIPAL UTILITY DISTRICT

NOTES TO THE FINANCIAL STATEMENTS

SEPTEMBER 30, 2012

NOTE 1: REPORTING ENTITY

River Plantation Municipal Utility District (the "District") was created by the Texas Legislature in 1963 as a fresh water supply district and converted to a municipal utility district in 1978. The District operates in accordance with Texas Water Code Chapters 49 and 54. The first bonds were sold on April 15, 1966. The District is a political subdivision of the State of Texas, governed by an elected five member Board of Directors. The District is subject to the continuing supervision of the Texas Commission on Environmental Quality.

The District is empowered, among other things, to purchase, construct, operate and maintain all works, improvements, facilities and plants necessary for the supply of water; the collection, transportation and treatment of wastewater; and the control and diversion of storm water. The District may provide garbage disposal and collection services. In addition, the District is empowered, if approved by the electorate, the Texas Commission on Environmental Quality and other governmental entities having jurisdiction, to establish, operate and maintain a fire department, either independently or jointly with certain other districts.

In evaluating how to define the District for financial reporting purposes, the Board of Directors of the District has considered all potential component units. The decision to include a potential component unit in the reporting entity was made by applying the criteria established by the Governmental Accounting Standards Board. The basic, but not the only, criterion for including a potential component unit within the reporting entity is the governing body's ability to exercise oversight responsibility. The most significant manifestation of this ability is financial interdependency. Other manifestations of the ability to exercise oversight responsibility include, but are not limited to, the selection of governing authority, the designation of management, the ability to significantly influence operations and accountability for fiscal matters. The other criterion used to evaluate potential component units for inclusion or exclusion from the reporting entity is the existence of special financing relationships, regardless of whether the District is able to exercise oversight responsibilities. Based upon the application of these criteria, there were no other entities which were included as a component unit in the District's financial statements.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES

The District's financial statements are prepared in accordance with generally accepted accounting principles ("GAAP"). The Governmental Accounting Standards Board (the "GASB") is responsible for establishing GAAP for state and local governments through its pronouncements (Statements and Interpretations). Governments are also required to follow the pronouncements of the Financial Accounting Standards Board issued through November 30, 1989 (when applicable), that do not conflict with or contradict GASB pronouncements. The more significant accounting policies established in GAAP and used by the District are discussed below.

Basic Financial Statements

The District's basic financial statements include both government-wide (reporting the District as a whole) and governmental fund financial statements (reporting the District's funds). Because the District is a single-program government as defined by the GASB, the District has combined the government-wide statements and the fund financial statements using a columnar format that reconciles individual line items of fund financial data to government-wide data in a separate column on the face of the financial statements. An additional reconciliation between the fund and the government-wide financial data is presented in Note 3.

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the District. The effect of interfund activity has been removed from these statements. The District's net position is reported in three parts – invested in capital assets, net of related debt; restricted net position; and unrestricted net position. The District first utilizes restricted resources to finance qualifying activities. The government-wide statement of activities reports the components of the changes in net position during the reporting period.

The financial transactions of the District are reported in individual funds in the fund financial statements. Each fund is accounted for in a separate set of self-balancing accounts that comprises its assets, liabilities, fund balances, revenues and expenditures and changes in fund balances. The District's fund balances are reported as nonspendable, restricted, committed, assigned or unassigned. Nonspendable fund balances are either not in spendable form or are contractually required to remain intact. Restricted fund balances include amounts that can only be used for the specific purposes stipulated by constitutional provisions, external resource providers or enabling legislation. Committed fund balances include amounts that can only be used for the specific purposes determined by formal action of the District's Board of Directors. Assigned fund balances are intended for a specific purpose but do not meet the criteria to be classified as restricted or committed. Unassigned fund balance is the residual classification for the District's General Fund and includes all spendable amounts not contained in the other classifications. The transactions of the District are accounted for in the following funds:

General Fund -- To account for all revenues and expenditures not required to be accounted for in other funds.

Debt Service Fund -- To account for the accumulation of financial resources for, and the payment of, bond principal and interest, paid principally from property taxes levied by the District.

Capital Projects Fund -- To account for financial resources designated to construct or acquire capital assets. Such resources are derived principally from proceeds of the sale of bonds.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

Basis of Accounting

The government-wide statements are reported using the economic resources measurement focus and the accrual basis of accounting which recognizes all long-term assets and receivables as well as long-term debt and obligations. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Ad valorem property taxes are recognized as revenues in the fiscal year for which they have been levied and related penalties and interest are recognized in the fiscal year in which they are imposed. An allowance for uncollectibles is estimated for delinquent property taxes and reported separately in the financial statements.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available if they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. Expenditures generally are recorded when a liability is incurred except for principal and interest on bonds payable which are recorded only when payment is due.

Interfund Activity

Activity between funds that is representative of lending/borrowing arrangements outstanding at the end of the fiscal year is reported as interfund receivables or payables, as appropriate, as are all other outstanding balances between funds. Operating transfers between funds represent legally authorized transfers from the fund receiving resources to the fund through which the resources are to be expended.

Receivables

Service accounts receivable as reported are considered collectible. The District uses the direct write off method for uncollectible service accounts. Unbilled water and sewer revenues are not material and are not recorded at year end. The District considers service accounts revenues to be available if they are to be collected within 60 days after the end of the fiscal year.

In the fund financial statements, ad valorem taxes and penalties and interest are reported as revenues in the fiscal year in which they become available to finance expenditures of the fiscal year for which they have been levied. Property taxes which have been levied and are not yet collected (or have been collected in advance of the fiscal year for which they have been levied) are recorded as deferred revenues. Property taxes collected after the end of the fiscal year are not included in revenues.

Inventory

Inventory is valued at cost. Inventory consists of expendable supplies held for consumption. The cost is recorded as an expenditure at the time individual inventory items are purchased and significant inventories on hand at the balance sheet date are reported as an asset in the balance sheet. Reported inventory is equally offset by a fund balance reserve which indicates that it does not constitute "available spendable resources."

Capital Assets

Capital assets, which include property, plant, equipment, and immovable public domain or "infrastructure" assets are reported in the government-wide financial statements. Capital assets are defined by the District as assets with an initial individual cost of more than \$1,000 (including installation costs, if any, and associated professional fees) and an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed by the District. Donated capital assets are recorded at historical cost. Additions, improvements and other capital outlays that significantly extend the useful life of an asset or increase the value of an asset are capitalized. Costs incurred for repairs and maintenance are expensed as incurred.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

Depreciation on capital assets is computed using the straight-line method over the following estimated useful lives:

Plant and equipment	10-45 years
Underground lines	45 years

Long-term Liabilities

Long-term debt and other long-term obligations are reported in the government-wide financial statements. Bond premiums and discounts, are deferred and amortized over the life of the bonds. Bonds payable are reported net of the applicable premium or discount. If bonds are refunded and the carrying amount of the new debt is different than the net carrying amount of the old debt, the difference is netted against the new debt and amortized using the effective interest method over the shorter of the remaining life of the refunded debt or the life of the new debt issued.

In the fund financial statements, governmental funds recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as expenditures of the fund from which they are paid.

NOTE 3: RECONCILIATION OF FUND TO GOVERNMENT-WIDE FINANCIAL STATEMENTS

Reconciliation of year end fund balances to net position:

Total fund balances, end of year	\$ 1,542,878
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds:	
Total capital assets, net	3,553,066
Some receivables that do not provide current financial resources are not reported as receivables in the funds:	
Uncollected property taxes	<u>41,188</u>
Net position, end of year	<u>\$ 5,137,132</u>

Reconciliation of net change in fund balances to change in net position:

Total net change in fund balances	\$ 366,220
The funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense:	
Capital outlay	\$ 8,935
Depreciation	<u>(248,562)</u> (239,627)
Some revenues reported in the statement of activities do not provide current financial resources and therefore are not reported as revenues in the funds:	
Uncollected property taxes	<u>4,490</u>
Change in net position	<u>\$ 131,083</u>

NOTES TO THE FINANCIAL STATEMENTS (Continued)

NOTE 4: CAPITAL ASSETS

Capital asset activity for the fiscal year ended September 30, 2012, was as follows:

	Beginning Balance	Increases	Decreases	Ending Balance
Capital assets not being depreciated:				
Land	\$ 67,672	\$ 0	\$ 0	\$ 67,672
Total capital assets not being depreciated	67,672	0	0	67,672

Buildings and improvements	203,926			203,926
Machinery and equipment	184,046			184,046
Infrastructures	9,884,585	8,935		9,893,520
Total depreciable capital assets	10,272,557	8,935	0	10,281,492
Less accumulated depreciation for:				
Buildings and improvements	(114,453)	(5,298)		(119,751)
Machinery and equipment	(173,201)	(2,133)		(175,334)
Infrastructures	(6,259,882)	(241,131)		(6,501,013)
Total accumulated depreciation	(6,547,536)	(248,562)	0	(6,796,098)
Total depreciable capital assets, net	3,725,021	(239,627)	0	3,485,394
Total capital assets, net	\$ 3,792,693	\$ (239,627)	\$ 0	\$ 3,553,066
Changes to capital assets:				
Capital outlay		\$ 8,935	\$	
Depreciation expense for the fiscal year		(248,562)		
Net increases / decreases to capital assets		\$ (239,627)	\$ 0	

NOTE 5: LONG-TERM LIABILITIES

At September 30, 2012, there were no developer construction commitments or liabilities.

Bonds voted	\$ 7,620,000
Bonds approved for sale, sold and retired	6,470,000
Bonds voted and not issued	1,150,000

At September 30, 2011, the District had no bonds outstanding. During the fiscal year ended September 30, 2012, the Board of Directors of the District directed that surplus debt service funds and future debt service tax collections will be transferred to the General Fund in accordance with the legal requirements related to the disposition of such funds. The Debt Service Fund balance transferred to the General Fund from the Debt Service Fund was (\$2,185).

NOTES TO THE FINANCIAL STATEMENTS (Continued)

NOTE 6: PROPERTY TAXES

The Montgomery Central Appraisal District has the responsibility for appraising property for all taxing units within the county as of January 1 of each year, subject to review and change by the county Appraisal Review Board. The appraisal roll, as approved by the Appraisal Review Board, must be used by the District in establishing its tax roll and tax rate. The District's taxes are usually levied in the fall, are due when billed and become delinquent after September 30 of the following year or 30 days after the date billed, whichever is later. On January 1 of each year, a statutory tax lien attaches to property to secure the payment of all taxes, penalties and interest ultimately imposed for the year on the property.

At an election held on November 6, 2007, the voters within the District authorized a maintenance tax without limit as to rate or amount on all property subject to taxation within the District. This maintenance tax is being used by the General Fund to pay expenditures of operating the District.

On August 25, 2011, the District levied the following ad valorem taxes for the 2011 tax year on the adjusted taxable valuation of \$137,467,503:

	<u>Rate</u>	<u>Amount</u>
Maintenance	\$ 0.32000	\$ 439,896

A reconciliation of the tax levy to property tax revenues on the Statement of Activities is as follows:

2011 tax year total property tax levy	\$ 439,896
Appraisal district adjustments to prior year taxes	<u>4,324</u>
Statement of Activities property tax revenues	<u>\$ 444,220</u>

NOTE 7: DEPOSITS

The District complied with the requirements of the Public Funds Investment Act during the current fiscal year including the preparation of quarterly investment reports required by the Act.

State statutes authorize the District to invest and reinvest in direct or indirect obligations of the United States, the State of Texas, any county, city, school district, or other political subdivision of the state, or in local government investment pools authorized under the Public Funds Investment Act. Funds of the District may be placed in certificates of deposit of state or national banks or savings and loan associations within the state provided that they are secured in the manner provided for the security of the funds under the laws of the State of Texas. In accordance with the District's investment policies, during the current year the District's funds were invested in interest bearing accounts at authorized financial institutions.

In accordance with state statutes and the District's investment policies, the District requires that insurance or security be provided by depositories for all funds held by them. At the balance sheet date, the carrying amount of the District's deposits was \$1,577,080 and the bank balance was \$1,596,592. Of the bank balance, \$651,842 was covered by federal insurance and \$944,750 was covered by the market value of collateral held by the District's custodial bank in the District's name. The market value of collateral was reported to the District by the depository.

NOTES TO THE FINANCIAL STATEMENTS (Continued)

NOTE 8: RISK MANAGEMENT

The District is exposed to various risks of loss related to: torts; theft of, damage to, and destruction of assets; errors and omissions; personal injuries and natural disasters. Significant losses are covered by insurance as described below. There were no significant reductions in insurance coverage from the prior fiscal year. There have been no settlements which have exceeded the insurance coverage for each of the past three fiscal years.

At September 30, 2012, the District had physical damage coverage of \$4,810,718, boiler and machinery coverage of \$800,000, general liability coverage with a per occurrence limit of \$5,000,000 and \$10,000,000 general aggregate, pollution liability coverage of \$2,000,000, automobile liability coverage of \$500,000, employee's crime coverage of \$50,000, and statutory worker's compensation coverage with the Texas Municipal League Intergovernmental Risk Pool (the "Pool"). The Pool is a public entity risk pool currently operating as a common risk management and insurance program for various Texas public entities. The District pays annual premiums for its general insurance coverage. The Pool purchases reinsurance for protection against catastrophic losses that exceed the Pool's self-insurance retention. This reinsurance is purchased from companies rated "Excellent", "Superior" or "Good" by A. M. Best Company.

NOTE 9: CONTRACT WITH EAST PLANTATION UTILITY DISTRICT

On April 4, 1979 (amended September 25, 2003 and supplemented November 2, 2010), the District entered into a forty year contract with the East Plantation Utility District ("EPUD"). Under the terms of the contract, the District owns 59% of the District's sewage treatment facilities and EPUD owns 41%. In addition the districts each own half of the joint sewage trunkline improvements serving EPUD. Costs of operating the sewage treatment facilities are divided based upon the number of connections served by each district and are billed to EPUD monthly. Capital improvements are billed based upon capacity owned by each district. The District billed EPUD \$77,649 during the fiscal year ended September 30, 2012, of which \$5,595 was receivable at that date. The contract also provides that each district will provide water to the other district in event of emergency at cost.

NOTE 10: GROUNDWATER CONSERVATION DISTRICT

The District is within the boundaries of the Lone Star Groundwater Conservation District ("LSGCD"). The LSGCD was created by the Legislature of the State of Texas in Acts 2001, 77th Legislature, Regular Session. The LSGCD is a political subdivision of the State of Texas, governed by an appointed nine member board of directors. The purpose of the LSGCD is to provide for the conservation, preservation, protection, recharging, and prevention of waste of groundwater, and of groundwater reservoirs or their subdivisions, and the control of subsidence caused by the withdrawal of water from those groundwater reservoirs or their subdivisions, consistent with the objectives of Section 59, Article XVI, Texas Constitution. Rule 8.1 of the rules of the LSGCD authorizes the board of directors of the LSGCD to establish by resolution a regulatory water use fee to accomplish the purposes of the LSGCD. In accordance with this rule, as of September 30, 2012, the LSGCD had established a regulatory water use fee of \$0.06 per 1,000 gallons of water pumped from each regulated well. The District's well regulatory water use fees payable to the LSGCD for the fiscal year ended September 30, 2012, were \$15,608. The District billed its customers \$15,360 during the fiscal year to pay for a portion of the fees charged by the LSGCD.

NOTE 11: RESTATEMENT OF BEGINNING OF YEAR BALANCES

During the fiscal year ended September 30, 2012, the District increased the beginning of year General Fund and Net Position balances by \$27,709 and \$43,275, respectively, to more accurately state the financial position of the District.
