

REAL TIME MULTIPURPOSE CONTROLLER

- This is a real-time timer controller with two relay outputs namely Output1 and Output2.
- It is designed to control electrical equipment with load capacity up to 10Amps in each output.
- Flexible operation based on user-defined timing settings.
- Users can configure Output1 ON with Output2 OFF, Output1 OFF with Output2 ON, or operate both outputs simultaneously as per application / process requirement.
- Programmable timing ensures reliable and efficient automation as per user's setup schedule.

- Sreekara Enviro Tech is a specialized company providing advanced solutions in Temperature, Humidity & control Panel distribution systems.
- We Design and Deploy high performance Equipment including Plant growth Chambers, Timer Controllers and Vacuum Controllers.
- With a solution driven approach, we transform customer challenges into reliable and efficient engineering solutions.

SET has domain knowledge and expertise in designing and building cost-effective solutions.
