

Good Day. Hope you are doing well.

We SET (Solutions for Environment by Technology) based in Hyderabad... happy to inform that we have designed and developed touch free sensor kit which can be easily fixed to your Water dispenser/Water cooler/ Water purifier as an internal attachment with minimum modifications.

TOUCHFREE SENSOR KIT

Advantages of our TOUCHFREE SENSOR KIT suitable to any unit:

- Touch free sensor kit can be fixed to any type of water dispenser/ water cooler/water purifier internally with minimum modification.
- Six months warranty is applicable for the sensor kit (Extended warranty is also available by paying add on minimal charges).
- Necessary accessories like solenoid coil, pipes and fittings will be provided as per unit model.
- Sensor kit works on 5vdc (it means very less power consumption and rare chances of failure)
- Modification can be done to your existing unit at your premises or can be fixed and supplied along with the new units too.

Expertise of following areas:

We design and interface electro-mechanical devices, electronic circuits with different type of Sensors Like photo sensors, pneumatics sensors, limit sensors, flow sensors and movement sensors. We also provide programmable devices and solutions for automation.

SET has domain knowledge and expertise in designing and building of cost-effective solutions.
