 Abstract reviewer for the American Transplant Congress 2007, San Francisco, CA, May 5-9, 2007
 Abstract reviewer for the 2007 Organ Donation Congress, Philadelphia, PA, November 11-14, 2007
 Abstract reviewer for the XXII International Congress of The Transplantation Society, Sydney, Australia, August 10-14, 2008
 Abstract reviewer for the American Transplant Congress 2009, Boston, MA, May 30-June 3, 2009
 Abstract reviewer for the American Transplant Congress 2010, San Diego, CA, May 1-5, 2010

Miscellaneous:

Presented oral testimony concerning the Proposed Standardized Patient Listing Criteria for Renal and Combined Renal-Pancreas Transplantation at the UNOS Public Forum, St. Louis, MO, September 26, 1996
 Present oral testimony at the Department of Health and Human Services Public Hearings on Liver Allocation and Organ Donation, Bethesda, MD, December 10, 1996
 Present oral testimony at Department of Health and Human Services' Subcommittee on Human Resources' Hearing on Oversight of the National Organ Procurement and Transplantation Network, Milwaukee, WI, April 8, 1998
 Participant, Panel Discussion on Organ Donation, Viterbo University/Cathedral of Saint Joseph the Workman, La Crosse, WI, October 9, 2004
 Organized Donation After Cardiac Death (DCD) Preceptorship for St. Michael's Hospital, Toronto, Madison, WI, October 14-15, 2004

GRANTS AWARDED

University of Wisconsin Surgical Associates
 7/87-6/88 – Demonstration of agonal hepatic arterial vasospasm and its prevention with alpha-adrenergic blockade
 7/90-6/91; 1/92-1/93 – Intestinal transplantation: techniques, function, and immunology
 2/93-2/94 – Immunologic studies of intestinal transplantation
 University of Wisconsin Medical School, 7/90-6/91
 Intestinal transplantation: techniques, function, and immunology
 University of Wisconsin Graduate School, 7/94-6/95
 Immunologic studies of intestinal transplantation
 Charitable, Educational & Scientific Foundation of the State Medical Society of Wisconsin,
 11/94-10/95 – Effect of hypothermic continuous perfusion on Kupffer cell activation in isolated perfused rat livers
 University of Wisconsin Medical Foundation
 6/98 – Optimal resuscitation temperature in kidneys procured from non-heart-beating donors
 12/99 – Biochemical analysis of human kidney perfusate
 National Institutes of Health, 8/1/86-11/30/00 (J. Southard, PI)
 12/1/96-11/30/00 – Co-investigator – 20% – RO1DK35143-13
 Liver preservation for clinical transplantation
 National Institutes of Health, 08/01/99-06/30/04 – Co-investigator – 20% (J. Southard, PI)
 Organ preservation for transplantation – DK18624-23
 Department of Health and Human Services Health Resources & Services Administration –
 H39OT000064-01 – Principal Investigator – 09/01/01-09/01/04 – \$333,026
 A model for the implementation of donation after cardiac death (DCD) protocols
 Department of Health and Human Services Health Resources & Services Administration –
 D71HS13416 - Principal Investigator – 09/01/09-08/31/11 – \$524,616
 Utilization of social media, personalized messages, and mass communications to increase solid organ donations by US university students, their families, and their friends
 National Institutes of Health, 04/01/2015-03/31/2020 – Co-investigator – 10% (L. Fernandez, PI)

The role of complement inhibition in expanded criteria kidney transplantation –
1-R01-AI110617-01A1

CLINICAL TRIALS (ACTIVE)

Principal Investigator:

Novartis – A 24-month, multi-center, single arm, prospective study to evaluate renal function, efficacy, safety and tolerability of everolimus in combination with reduced exposure cyclosporine or tacrolimus in pediatric liver transplant recipients (RAB2305) – 4/2013

Principal Investigator:

OrganOx Ltd. – A multicenter randomized controlled trial to compare the efficacy of ex-vivo normothermic machine perfusion with static cold storage in human liver transplantation (TSB WP01) – 2016

Sub-Investigator:

University of Cincinnati/Bristol Myers Squibb (PI-Dixon Kaufman) – A randomized open label, multicenter study of a belatacept-based early glucocorticoid withdrawal regimen with alemtuzumab or rabbit antithymocyte globulin induction compared to a tacrolimus-based early glucocorticoid withdrawal regimen with rabbit antithymocyte globulin induction in renal transplantation (BEST) – 11/2012

National Institute of Allergy and Infectious Diseases (NIAID) (PI-Jon Odorico) – Optimization of NULOJIX® (Belatacept) usage as a means of minimizing CNI exposure in simultaneous pancreas and kidney transplantation (CTOT-15) – 2/2013

Astellas (PI-Dixon Kaufman) – A Phase 2a, randomized, open-label, active control, multi-center study to assess the efficacy and safety of ASKP1240 in de novo kidney transplant recipients (ASKP 1240) – 5/2013

Astellas (PI-Jeannina Smith) - A randomized, double-blind, placebo-controlled, phase 2 trial to evaluate the efficacy and safety of a vaccine, ASP0113, in cytomegalovirus (CMV)-seronegative kidney transplant recipients receiving an organ from a CMV-seropositive donor – 10/2013

Prolong Pharmaceuticals (PI-David Foley) – A randomized, placebo-controlled, prospective, double-blind, multicenter phase 2/3 study of the efficacy and safety of SANGUINATE™ for reduction of delayed graft function in recipients of a donation after brain death kidney transplant – 6/2015

National Institute of Allergy and Infectious Diseases (NIAID)/Clinical Trials in Organ Transplantation (CTOT) (PI-David Foley) – Randomized controlled trial of infliximab (Remicade®) induction therapy for deceased donor kidney transplant recipients (CTOT-19) – 7/2015

Hoffmann-La Roche (PI-Robert Redfield) - A phase Ib, single and multiple-dose, open-label study of the safety, pharmacokinetics and pharmacodynamics of obinutuzumab in adults with end stage renal disease and hypersensitization awaiting renal transplantation (THEORY) – 10/2015

Quark Pharmaceuticals (PI-David Foley) – A phase 3, randomized, double-blind, placebo controlled study to evaluate the efficacy and safety of QPI-1002 for prevention of delayed graft function in recipients of a donation after brain death older donor kidney transplant (ReGIFT) – 11/2015

Astellas (PI-Dixon Kaufman) - Astagraf XL® to understand the impact of immunosuppression on de novo DSA development and chronic immune activation in kidney transplantation (ASTOUND) – 3/2016

CLINICAL TRIALS (SELECTED INACTIVE SINCE 2000)

Principal Investigator:

Studies of Pediatric Liver Transplantation Registry (SPLIT) – 12/1996

Alavita/CTI – A phase II, two-part study of the safety and tolerability of Diannexin in kidney transplant recipients (DAV-CL002) – 03/2008

Intestinal Transplant Registry (ITR) – 09/2009

Health Resources and Services Administration (HRSA) – Utilization of social media, personalized messages, and mass communications to increase solid organ donations by U.S. university students, their families and their friends – 09/2009

Astellas – A phase II, open-label multi-center study to assess the pharmacokinetics, long-term safety and tolerability of tacrolimus in stable pediatric liver transplant patients converted from a Prograf based immunosuppression regimen to a modified release tacrolimus based immunosuppression regimen (03-0-160) – 06/2008-03/2009

Astellas – A phase II, open-label multi-center study to assess the pharmacokinetics, long-term safety and tolerability of tacrolimus in stable liver transplant patients converted from a Prograf based immunosuppression regimen to a modified release tacrolimus based immunosuppression regimen (02-0-152) – 06/2008-03/2009

Sub-Investigator:

Astellas (PI-Pirsch) – A prospective, randomized, multicenter, double-blind study of early corticosteroid cessation vs. long-term maintenance corticosteroid therapy with Prograf and CellCept in renal transplant recipients (20-99-001) – 09/2000-02/2008

Novartis (PI-Sollinger) – A one-year, multicenter, prospective, open-label study of the safety, tolerability and preliminary efficacy of oral FTY720 and RAD001 in de novo adult renal transplant recipients at increased risk of delayed graft function – 11/2000-11/2003

Novartis (PI-Knechtle) – Neoral C2 versus Prograf in liver transplantation – 5/1/2002-12/31/2005

Novartis (PI-Knechtle) – A one-year, multicenter, partially blinded, double-dummy, randomized study to evaluate the efficacy and safety of FTY720 combined with reduced-dose Neoral and corticosteroids, in de novo adult renal transplants – 1/1/2003-12/31/2005

Novartis (PI-Knechtle) – A one-year, multicenter, partially blinded, double-dummy, randomized study to evaluate the efficacy and safety of FTY720 combined with reduced-dose or full dose Neoral and corticosteroids versus mycophenolate mofetil (MMF, CellCept) combined with full-dose Neoral and corticosteroids, in de novo adult renal transplant recipients – 7/2003-9/2007

Astellas (PI-Pirsch) – OptiCept: A phase III, randomized, open-label, comparative, multi-center study to assess the safety and efficacy of Prograf (tacrolimus)/MMF modified release (MR) tacrolimus/MMF and Neoral (cyclosporine)/MMF in de novo kidney transplant recipients – 08/2003-10/2009

Roche (PI-Pirsch) – An open-label, prospective, randomized, controlled, multi-center study assessing fixed-dose versus concentration-controlled CellCept regimens for patients following a single-organ renal transplantation in combination with full-dose and reduced-dose calcineurin inhibitors – 08/2004-02/2008

Astellas (PI-Knechtle/Pirsch) – INTAC: A phase IV, randomized, open-label, comparative, multicenter study to assess the safety and efficacy of induction agents alemtuzumab (Campath 1H), basiliximab (Simulect) or rabbit anti-thymocyte globulin (Thymoglobulin) in combination with tacrolimus (Prograf), mycophenolate mofetil (CellCept) and a rapid steroid withdrawal in renal transplant recipients (study #20-02-003) – 08/2005-08/2009

Roche (PI-Knechtle) – ML18423 A prospective, open-label, multicenter randomized trial of the efficacy and safety of a long term calcineurin inhibitor-free maintenance regimen with mycophenolate mofetil and sirolimus in recipients of an orthotopic liver transplant-STN (Spare the Nephron) – 11/2005-02/2009

Novartis (PI-Sollinger) – 12-month open-label, randomized, multicenter study evaluating efficacy, safety, and tolerability of oral AEB071 plus tacrolimus (converted to myfortic after 3 months), vs. myfortic plus tacrolimus in de novo renal transplant recipients – 2203 – 07/2006-05/2008

Wyeth (PI-Pirsch) – A randomized, open-label study to compare the rate of new non-melanoma skin cancer in maintenance renal allograft recipients converted to a sirolimus-based regimen versus continuation of a calcineurin inhibitor-based regimen 0468H1-407 – 01/2007-04/2009

Novartis (PI-Sollinger) – 12-month open label, randomized, multicenter, sequential cohort, dose finding study to evaluate the efficacy, safety and tolerability of oral AEB071 versus tacrolimus in combination with myfortic, Simulect, and corticosteroids in de novo adult renal transplant recipients (Study No. CAEB071A2207) – 09/2007-03/2008

ILEX (PI-Knechtle/Pirsch) – Campath-1H induction to allow discontinuation of calcineurin inhibitors after renal transplantation – 05/2003

ITN/NIH (PI-Knechtle/Djamali) – The use of Campath-1H, tacrolimus, and sirolimus followed by sirolimus withdrawal in renal transplant patients – 11/2004

Roche (PI-Sollinger) – A pilot study of Campath-1H induction therapy combined with CellCept therapy to allow for a calcineurin inhibitor free regimen after renal transplantation – 12/2004

- Bristol-Myers Squibb (PI-Fernandez) – IM103-027: Belatacept evaluation of nephroprotection and efficacy as first-line immunosuppression trial–extended criteria donors (BENEFIT-EXT) – 03/2005
- Novartis (PI-Fernandez) – A multicenter, randomized, open label study to compare the development of liver fibrosis at 12 months after transplantation for hepatitis C cirrhosis in patients receiving either Neoral or tacrolimus (REFINE) – 10/2005
- Bristol-Myers Squibb (PI-Fernandez) – Belatacept evaluation of nephroprotection and efficacy as first-line immunosuppression trial-008 (BENEFIT) – 12/2005
- Novartis (PI-Sollinger) – CERL080A-US44: A pilot study of Campath-1H and rituximab induction therapy combined with myfortic to allow for a calcineurin inhibitor free regimen after renal transplantation – 02/2006
- NIAID (PI-Y Becker) – Noninvasive diagnosis of renal allograft rejection by urinary cell mRNA profiling (CTOT-04) – 05/2006
- NIH/NIAID (PI-B Becker) – Genomics of chronic renal allograft rejection (GoCar) – 08/2006
- Astellas (PI-Pirsch) – A phase 2, randomized, open label, parallel group, multicenter study to assess the safety and efficacy of alefacept in de novo kidney transplant recipients (Study No. 0485-CL-U201) – 09/2008
- Quark (PI-Foley) – Controlled, randomized, prospective, double-blind, multicenter, phase I/II, dose-escalation study of the safety, PK, and clinical activity of I5NP for prophylaxis of delayed graft function in patients undergoing deceased donor kidney transplantation (QUARK) – 04/2009

CURRENT RESEARCH

- Marketing and social networking efforts to increase awareness and rate of organ and tissue donation
- Implementation of donation after cardiac death policies

COMPLETED BASIC RESEARCH

- Comparison of cold storage and perfusion preservation of canine livers by a tissue slice technique
- Transplantation of canine livers after 72 hours of hypothermic pulsatile perfusion
- Effect of alpha-adrenergic blockade on agonal hepatic arterial vasospasm
- Effect of acute tubular necrosis, cyclosporine toxicity, and acute rejection on resistive index in canines
- Comparison of RS-61443 and cyclosporine in canine intestinal transplantation
- Effect of cyclosporine, FK506 and RS-61443 on rejection and GVHD in a rat intestinal transplant model
- Effect of hypothermic machine perfusion on hepatic preservation of rat livers
- Effect of brain death on canine hepatic allograft function
- Effect of ischemic preconditioning on hepatic tolerance to warm and cold ischemia
