my **LED GO**
INCREDIBLY LIT VISUALS

FLEXIBLE AND ELEGANT:

showcase your product
in a revolutionary display
system of superb quality.

myLEDGO is your display of choice, wherever
and whenever you need to effortlessly set
up a high-impact display.

Easy to move, assembled without tools, yet stable.
The display consists of components that can
easily be configured for different display options
and needs – be it for your Point of Sale display,
at a tradeshow, as an advertising board or for
customer traffic guidance systems.

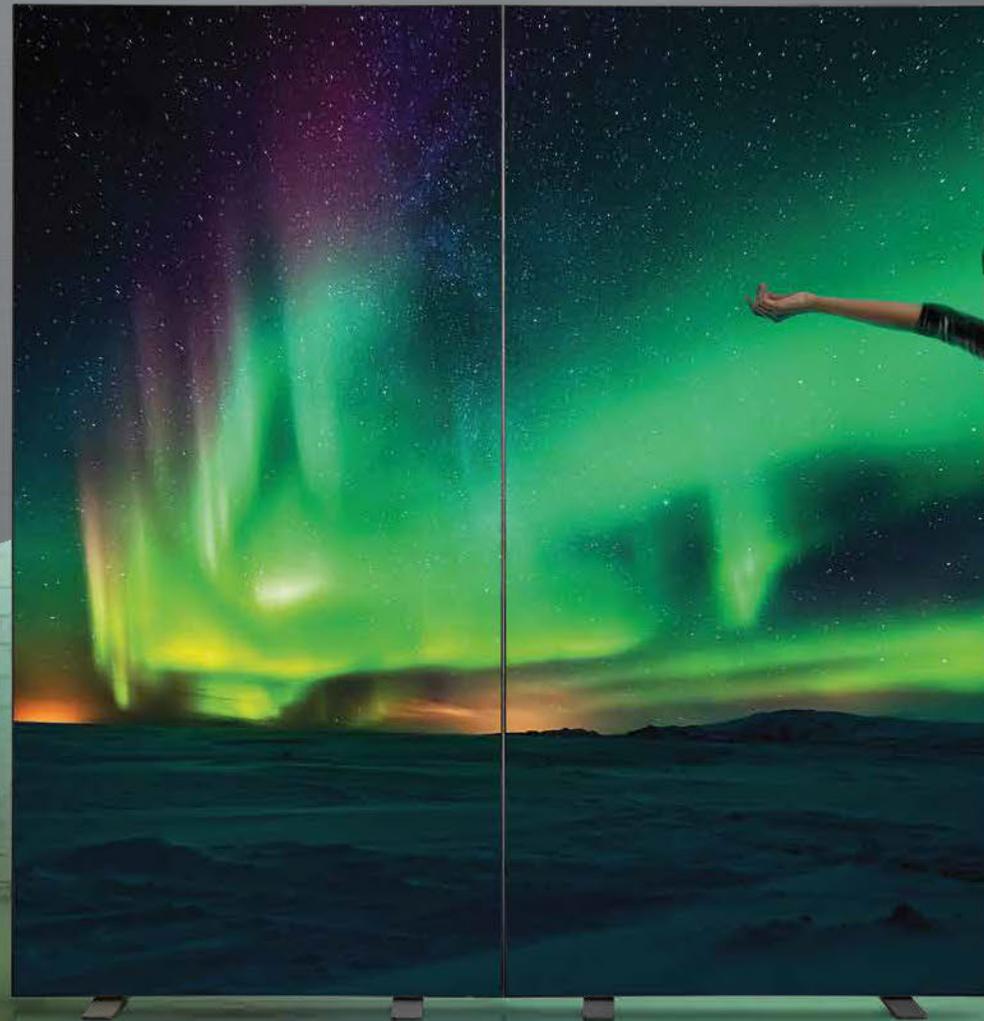

With myLEDGO, you will make a great impression.

flexible
modular system

Digital prints can quickly and easily be exchanged, thanks
to the silicon lip edging technology.

ULTRA LIGHT & BRILLIANTLY ILLUMINATED:

High quality OSRAM LED technology presents your message in the best light.

A high level of brightness and an even illumination makes myLEDGO a champion among illuminated displays. Set up decorative focal points or combine several modules for larger, illuminated displays – both allow you to create sophisticated mood elements, even in big rooms.

With just a few easy touches, an impressive appearance is guaranteed. A compact design and a sophisticated is guaranteed. A compact design and a sophisticated of both components and digital prints.

For your message to reach your target audience, the right illumination matters.

ELEGANCE AND SOPHISTICATED DESIGN

myLEDGO is made of high quality anodized aluminum and is UV resistant. The design and shape are very slim and timelessly elegant.

With a meticulous finish, even the edges are pleasant to the touch. The connectors are almost invisible after set-up. Your digital prints will look appealing from all angles.

SIMPLICITY

THANKS TO AN INNOVATIVE PIN
CONNECTOR SYSTEM

myLEDGO consists of just seven parts and can be quickly assembled without tools. Simply pull out the components from the carrier, connect them and set up the pre-assembled base tracks – done!

Due to the perimeter groove, silicone edged backlit graphics can be applied in seconds.

LIGHTWEIGHT

BECAUSE OF A SMART DESIGN
AND CONSTRUCTION

myLEDGO is surprisingly light: a display of 39.3" x 78.7" (100x200 cm) weighs in at just 20 lbs. 8.7 kg) which is made possible by a sophisticated design and construction with stable aluminum frames that do not require additional connectors.

The carrier is made from environmentally friendly cardboard and is a featherweight as well, and is easily packed into any passenger vehicle.

STABILITY

RELIABILITY YOU CAN DEPEND ON

myLEDGO is extraordinarily stable, despite its light weight. The lightweight construction, stable aluminum frame and our unique pin connectors ensure the greatest stability. Additionally, the design ensures that frames are positioned at right angles at all times. A simple and almost invisible connector system allows you to assemble several elements for more impactful effects.

TOOL-LESS ASSEMBLY

By using an innovative, unique and tool-less interlock system the frame is set up within seconds. Take the parts out of the case and slide them together without tools. Attach the fabric panels – finished.

In addition you can combine the systems to create endless walls by using straight - and/or 90° connectors.

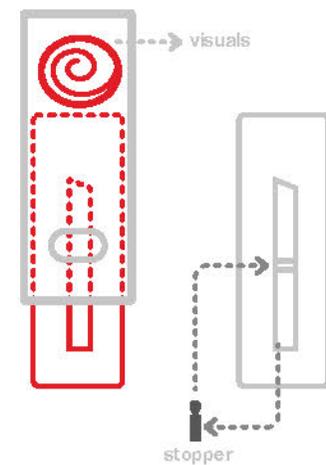

PACKAGING AND FABRIC PANELS

The cardboard packaging in itself is unique. The patented locking system makes it possible to use it in two different sizes. When using it for system and fabric panels you can enlarge the box to create a fit for system and fabric panels you can enlarge the box to create a separate compartment for the fabric panels (second locking position).

The box comes with a carrying strap making it easy to transport.
