Includes the previously deleted chapter "Seldom Seen At Home" and features all of the artwork drawn for the book and calendar by R. Crumb. The story of Bonnie Abzug, Seldom Seen Smith, Doc Sarvis and George Washington Hayduke. In the steaming jungles of Vietnam, Hayduke longed for the grandeur, the light, and the freedom of the Southwestern desert. On his return to America he finds that someone or something is trying to change his desert into an industrial wasteland. Meeting on a white-water float trip down the Colorado River, Hayduke, Doc, Bonnie and Seldom Seen discover a communal bond: a profound distrust of blind technology and a healthy hatred for the corporate interests

whose lust for profit threatens the survival of the American wilderness. They agree to become eco-raiders, declaring war on the strip miners, the clear-cutters, and the highway, dam and bridge builders. The result is chaos, conflict and comedy both high and low, culminating in the greatest chase scenes. VG+ in VG+ dj. \$45.00

9. Adams, Eilean. **HELL OR HIGH WATER. James White's Disputed Passage through Grand Canyon, 1867.** Utah State University Press, Logan, 2001, 8vo., brown cloth, pict. dustjacket, 220pp., illus., references. Although John Wesley Powell and party are usually given credit for the first river descent through the Grand Canyon, the ghost of James White has haunted those claims. White was a Colorado prospector, who, almost two years before Powell's journey, washed up on a makeshift raft at Callville, Nevada. His claim to have entered the Colorado above the San Juan River with another man (soon drowned) as they fled from Indians was widely disseminated and believed for a time, but Powell and his successors on the river publicly discounted it. Colorado River runners and historians have since debated whether White's passage through Grand Canyon even could have happened. Hell or High Water is the first full account of White's story and how it became distorted and he disparaged over time. It is also a fascinating detective story, recounting how White's granddaughter, Eilean Adams, over decades and with the assistance of a couple of notable Colorado River historians who believed he could have done what he claimed, gradually uncovered the record of James White's adventure and put together a plausible narrative of how and why he ended up floating helplessly down a turbulent river, entrenched in massive cliffs, with nothing but a driftwood raft to carry him through. Ford 73a. [Also see Simmons.] New. \$39.95

10. Adams, Samuel Hopkins. **THE HARVEY GIRLS.** The World Publishing Company, Cleveland/ New York, 1944, 8vo., blue cloth, pict. dj., 327pp. In 1876 Fred Harvey opened a lunch room in the little red-painted depot at Topeka. Thus began the far-flung chain of "eating houses" which followed the young and growing Santa Fe Railroad from the Kansas prairies to the California coast. In those days there were few young women in the Southwestern Frontier towns who fulfilled Mr. Harvey's high requirements for waitresses, so he imported his own choices from the cities and farms of the East and Middle West. Some of these girls were destined to become the founders of the social, political and financial dynasties that are strong influential in many Southwestern communities today. All of this, of course, is wonderful background material for an author of Adams' talents and from it he has spun a yarn that will delight thousands of readers. It all happens in the early 1890s around the Harvey House in a typical Southwestern desert town which the author calls Sandrock. The romantic, adventurous novel of the pioneer West and the young ladies of the Harvey Houses. (Fiction.). Shelf wear o/w VG in chipped G+ dustjacket. \$30.00

22. Bagley, Will. **BLOOD OF THE PROPHETS. Brigham Young and the Massacre at Mountain Meadows.** University of Oklahoma Press, Norman, 2002, tall 8vo., tan cloth, pict. dustjacket, 493pp., illus. The massacre at Mountain Meadows on September 11, 1857, was the single most violent act to occur on the overland trails, yet it has been all but forgotten. Will Bagley's Blood of the Prophets is the most extensive investigation of the events surrounding the mass killings since Juanita Brooks published her groundbreaking study. At Mountain Meadows, local settlers and Southern Paiute warriors waylaid the Fancher party, a wagon train bound from Arkansas to California. Pinned down in a circle of wagons in a remote corner of southwestern Utah, some forty men, thirty women, and seventy children fought for their lives for five days before surrendering under a promise of safe conduct. As the Mormon militia and their Indian allies escorted the emigrants away from their wagons, they killed all of them except seventeen children below the age of seven. Bagley draws on unpublished journals, letters, and documents from Mormon archives as well as from accounts by Mormons who opposed subsequent efforts to cover up or expunge the record. He explains how the murders occurred, reveals the involvement of territorial governor Brigham Young, and explores the subsequent suppression and distortion of the events surrounding the massacre. Also included here are maps and photographs never before published. New. \$50.00

36. Bigler, David L. and Will Bagley (edited by). **INNOCENT BLOOD. Essential Narratives of the Mountain Meadows Massacre.** Kingdom in the West: The Mormons and the American Frontier Series Volume 12. The Arthur H. Clark Co., 2008, 8vo., cloth, 496pp., illus. Original sources documenting a frontier atrocity and its cover-up. The slaughter of a wagon train of some 120 people in southern Utah on September 11, 1857, has long been the subject of controversy and debate. Innocent Blood gathers key primary sources describing the tangled story of the Mountain Meadows massacre. This wide array of contrasting perspectives, many never before published, provide a powerful and intimate picture of this "dastardly outrage" and its cover-up. The documents David L. Bigler and Will Bagley have collected offer a clearer understanding of the victims, the perpetrators, and the reasons a frontier American theocracy sought to justify or conceal the participants' guilt. These narratives make clear that, despite limited Southern Paiute involvement, white men planned the killing and their church's highest leaders encouraged Mormon settlers to undertake the deed. A valuable sourcebook sure to prove indispensable to future research. New. \$45.00

44. Bowles, Samuel. **OUR NEW WEST. Records of Travel between the Mississippi River and the Pacific Ocean.** Hartford Publishing Co., CT, 1869, 1st ed., 8vo., maroon cloth, 528pp., with map, portraits, and 12 full page illus. Over the plains--over the mountains--through the great interior basin--over the Sierra Nevadas--to and up and down the Pacific coast with details of the wonderful natural scenery, agriculture, mines, business, social life, progress, and prospects of Colorado, Wyoming, Utah, Idaho, Montana, Nevada, California, Oregon, Washington, and British Columbia; including a full description of the Pacific Railroad; and of the life of the Mormons, Indians, and Chinese. The book contains much of value to Western Americana buffs. But of very special interest to River-Canyon collectors is an obscure passing reference on Page 500 that reads: "...the great mocking mystery of our geography is the Grand Canyon of the Colorado and the...country...around it." Bear in mind, now, that Bowles' reference to the Grand Canyon was printed in 1869, and possibly came into being, in Bowles' fertile journalistic mind, a year earlier during his tour of the West. Bowles discusses the Colorado at some length after this reference, and describes James White's alleged "first" descent of the River. Possibly the first mention of Grand Canyon on page 504. Land & Water in Low-Down California.** University of New Mexico Press, Albuquerque, 1999, 1st edition, 4to., brown cloth, pict. dustjacket, 307pp., illus., references, index. The story of Southern California is fundamentally a story about the control of nature. Beginning with the Yuman-speaking tribes encountered by the Spanish in the sixteenth century, deBuys traces the subsequent exploration and development of the region through the Gold Rush of 1849, the government-sponsored surveys that followed, and the inept tinkering with the river by an assortment of irrigation and development interests that resulted in the floods that formed the Salton Sea nearly a century ago. He introduces us to a gallery of rogues and dreamers who saw a great future for this arid wilderness but could never refrain from interference with the forces of nature. The floods that produced the Salton Sea created a vast desert oasis, but the agricultural exploitation of the region, combined with evaporation, poisoned that paradise. Ford 130. New. \$39.95

86. Denton, Sally. **AMERICAN MASSACRE. The Tragedy at Mountain Meadows, September 1857.** Alfred A. Knopf, New York, 2003, 1st edition, 8vo., tan boards, pict. dustjacket, 306pp., index. In September 1857, a wagon train passing through Utah laden with gold was attacked. Approximately 140 people were slaughtered; only 17 children under the age of eight were spared. This incident in an open field called Mountain Meadows has ever since been the focus of passionate debate: Is it possible that official Mormon dignitaries were responsible for the massacre? In her riveting book, Sally Denton snakes a fiercely convincing argument that they were. The author—herself of Mormon descent—first traces the extraordinary emergence of the Mormons and the little-known nineteenth-century intrigues and tensions between their leaders and the U.S. government, fueled by the Mormons' zealotry and exclusionary practices. We see how by 1857 they were unique as a religious group in ruling an entire American territory, Utah, and commanding their own exclusive government and army. Denton makes clear that, in the immediate aftermath of the massacre, the church began placing the blame on a discredited Mormon, John D. Lee, and on various Native Americans. She cites contemporaneous records and newly discovered documents to support her argument that, in fact, the Mormon leader, Brigham Young, bore significant responsibility—that Young, impelled by the church's financial crises, facing increasingly intense scrutiny and condemnation by the federal government, incited the crime by both word and deed. Finally, Denton explains how the rapidly expanding and enormously rich Mormon church of today still struggles to absolve itself of responsibility for what may well be an act of religious fanaticism unparalleled in the annals of American history. *American Massacre* is totally absorbing in its narrative as it brings to life a tragic moment in our history. Raw, rugged, and unrelenting, Rockwell's battles against seemingly insurmountable odds thematically and movingly portray both the struggles and the triumphs of the human spirit. . . . \$15.00

The Tragic Colorado River Honeymoon of Glen and Bessie Hyde.** Fretwater Press, Arizona, 2001, 2nd printing, 8vo., red cloth w/gilt, pict. dustjacket, map endpapers, 288pp., photos, index. Glen and Bessie Hyde began their honeymoon trip down the Green and Colorado Rivers on October 20, 1928. A month later they hiked to the rim of Grand Canyon, resupplied, and returned to their boat. When they did not arrive at trip's end, Glen's father launched an exhaustive search of lower Grand Canyon. The Hydies' crude sweep scow was found in calm water, fully loaded. But Glen and Bessie had vanished without a trace. So began the greatest mystery in the annals of whitewater navigation. More than 40 years later, in 1971, an older woman on a Grand Canyon river trip announced she was Bessie Hyde. She said she had stabbed Glen, hiked out, and started life anew. In 1976 a skeleton thought to be Glen Hyde's was found at the

Canyon rim with a bullet in the skull. Since then, another suspected Glen and another Bessie have appeared, further convoluting the myth of the Hydes. Author and boatman Brad Dimock searched the country for the true story of the Hydes. He followed each story and obscure lead to its end, even going to the extreme of recreating the Hydes' archaic craft for a harrowing trip through Grand Canyon with his own bride. *Sunk Without a Sound* is the riveting tale of the search for Glen and Bessie Hyde. "A damned good book. Hard to put down." [Tony Hillerman] Ford 41. As new. **SIGNED by Dimock.** \$28.00

90. Dimock, Brad. **THE VERY HARD WAY. Bert Loper and the Colorado River.** Fretwater Press, Arizona, 2007, 1st edition, 8vo., brown cloth w/gilt, pict. dustjacket, map endpapers, 457pp., illus., index. Limited edition of 700 hardbacks. Bert Loper, the Grand Old Man of the Colorado, was born the day Major Powell discovered the confluence of the San Juan and Colorado in 1869. He died just days after the first motorboat had passed through Grand Canyon. He knew every river runner in between, and by the time of his death at 80 years old, had run more of the Colorado than anyone. But it was never easy--orphaned and abused, Loper had to make his way along the bottom of society, often as a hard-rock miner, coal miner or lonely placer miner on a gravel bar. But in the Colorado River he found inspiration, and he died at the oars of his own wooden boat in a major Grand Canyon Rapid. Loper is truly mythic, and his is the story of the Colorado. The Journals and Letters of the 1911-12 Expedition Down the Green and Colorado Rivers by Ellsworth L. Kolb and Emery C. Kolb including the journal of Hubert R. Lauzon.** Fretwater Press, Arizona, 2003, 8vo., green cloth, 252pp. and 180pp, illus. Limited edition of 200 hardbound sets ("Brave Ones" by Suran and "Every Rapid"--together in a matching slipcase), numbered and signed by the editors. **EVERY RAPID:** In 1937, Haldane "Buzz" Holmstrom launched his home-made wooden rowboat at Green River Wyoming and rowed more than 1,000 rapid-strewn miles to Boulder Dam. He was the first to do it alone. A year earlier he had soloed Idaho's Salmon, the River of No Return. Although Holmstrom tried to keep his exploits private, the press made him a national celebrity. In 1938, Holmstrom repeated his Green and Colorado trip for film. Now Brad Dimock, one of Holmstrom's biographers, has transcribed each of Holmstrom's journals, as well as those of his 1938 companions, to more fully tell the story of one of America's greatest, most eloquent, and most humble boatmen. Every Rapid Speaks will speak to you.

.....
THE BRAVE ONES: In 1911, The Kolb brothers, Emery and Ellsworth, young photographers living on the South Rim of Grand Canyon, conceived a preposterous expedition: although neither of them knew much about whitewater, they had two wooden rowboats built, and proposed to row them the entire eleven hundred miles of the Green and Colorado Rivers. The trip was not solely for thrills. They planned to make not just still and stereo photographs, but moving pictures as well. In early September they launched from Green River, Wyoming. For the next four and a half months, the brothers rowed, careened, roped, dragged, and carried their boats through and around the rapids, often finding themselves swimming in the freezing river, patching and repatching their boats, and salvaging what film and equipment they could from their flooded hatches. Their first assistant left in tears after the first week, but was replaced on the last leg of the journey by stalwart Bert Lauzon, a miner, cowboy, and roustabout. Against all odds, the three men emerged from Grand Canyon in January 1912, with photographs and movies they would show and sell for the next sixty years. **Ford 52 and Ford 54.** New. **SIGNED by Dimock and Suran.** (Two titles in one slipcase.) \$59.95

Ups and Downs of Frontier Motoring.** Charles Scribner's Sons, New York, 1921, 1st edition, 8vo., green cloth w/gilt, map endpapers, 377pp., photography by Katherine Thaxter and Rollin Lester Dixon. One of a small number of early "car narratives" describing travel by auto in the U.S. before modern highways and freeways made such travel commonplace. Dixon and her party visited, among other sites, Grand Canyon and the Havasupai, Four Corners area, Rainbow Bridge, Canyon de Chelly. John Wetherill was their guide. Dixon and her fellow golfers were the first, she claimed, ever to have driven golf balls over the Bridge, and she gives the reader a divot-by-divot account! Harper Collins Publishers, NY, 2001, 1st ed, 8vo., pict. boards, dj., 367pp., photos and illustrations. Edward Dolnick is the former chief science writer at the Boston Globe. He has written for the Atlantic Monthly, New York Times Magazine, Washington Post, and many others. He made his first Grand Canyon river trip 20 years ago. John Wesley Powell's legendary expedition down the Colorado River in 1869 is one of the great, unknown adventure stories in American history. In May of 1869, Powell, a one-armed Civil War veteran, and his band of nine other adventurers started their journey "down the great unknown;" six weeks later, just six of the 10 men came ashore near Las Vegas Nevada and first told the world about the Grand Canyon. The atlas, containing the superb panoramic views by William H. Holmes and artwork by Thomas Moran, is a rich portfolio of art as well as a collection of maps and an exposition of geology." [Farquhar] This work was important both as a work of art and as the scientific foundation upon which subsequent mapping was based, making it one of the most popular cartographic works devoted to the Grand Canyon. This monograph alone occupies 117 pages, with numerous illus. by Thomas Moran, W. H. Holmes, and others, including several foldouts apparently borrowed from Dutton's monumental TERTIARY HISTORY OF THE GRAND CAÑON DISTRICT and its related Atlas. This superb paper is one of several in the same volume, including Gilbert's "History of Lake

Bonneville," Emmon's "Geology of Leadville," and Becker's "Geology of the Comstock Lode." Each of these, including the Dutton, is an abbreviated version of a longer monograph later published separately by the USGS. The Dutton paper, a condensation of his TERTIARY, has received little notice in Canyon studies and bibliographies. Farquhar does not mention it. Yet it has to be one of the key documents in Canyon literature. And as it is less scarce than the TERTIARY, it is more accessible to collectors. Introduction by Frederick S. Dellenbaugh. "Eddy ran the [Colorado] river at high water in the summer of 1927 and followed in November with a run of the Grand Canyon in low water. His crew, mostly college men, were novices on the river with the exception of Parley Galloway, son of the great riverman Nat Galloway. Their experiences were in marked contrast with those of most other voyagers, for every mile seems to have presented a life and death issue. Yet, notwithstanding the awful risks, Clyde and his boys made a good job of it, and he certainly wrote an entertaining book." Farquhar 55. Former owner's inscription o/w VG. . . . \$235.00

121. Henrie, Samuel Nyal (edited by). **WRITINGS OF JOHN D. LEE**. Fenestra Books, Tucson, 2002, 1st edition, 8vo., pict wraps, 438pp., engravings, bibliography. This is a major collection of historical documents by John D. Lee and his contemporaries, written in the 1870s, some published here for the first time. It includes Lee's Life (autobiography), Confession (Mountain Meadows Massacre), Arrest, Trial Excerpts and Imprisonment, Poems and Letters, Last Words to his families, Execution, and ongoing efforts toward reconciliation. John Doyle Lee lived a life of heroic proportions. He was a leader of uncommon energy and courage in a movement that helped shape the western United States. But Lee's life ended in tragedy, as he took the blame for one of the most infamous atrocities of frontier history, The Mountain Meadows Massacre of 1857. Hounded into exile in the remote Grand Canyon and Navajo Country, he built and operated Lee's Ferry and Lee's Lonely Dell, now an historic monument. Eventually, he was arrested, imprisoned and brought to trial in federal courts twice, convicted, and executed by firing squad on the very site of the Massacre, on March 23, 1877. A witness to both inspiring and degrading events, John D. Lee recorded irreplaceable history in his Journals and other writings throughout his life. This book contains important Lee writings that have not been published in full since 1891, as well as supporting historical documents, some of which have not been published previously. New. \$55.00

origins and early times of the Havasupai people of the Grand Canyon and relates trends in their recent history to current trends in American life. The book speaks a unique language where the author uses voices of Havasupai storytellers to emphasize turning points in their past. Finally, Havsuw 'Baaja chronicles the magnificent, century-long campaign the Havasupai waged to regain their homeland. The presentation here grew from the Hirsts' own sharing of their long fight. In manuscript form, the book provided much of the historical and legal underpinning of the long-sought reunion with their land the Havasupai finally achieved January 3, 1975. From the first steps to usher

in a wilderness river to the Goldwater-Garn-Hatch Rider of 1980, Ingram unfolds the activities of such players as Fred Burke, Steve Carothers, Kim Crumbo, Fred Eiseman, Marvin Jensen, John McComb, Joe Munroe, Bo Shelby, Gaylord Staveley, Sam Steiger, Merle Stitt, Morris Udall, and many others. Eight panoramics by Egloffstein; 12 full-page engravings, and 7 Indian plates, reproduced here in colors! In addition there are 41 woodcuts. Farquhar has high praise for Ives: "...one of the most desirable books in the Colorado River field, for it is the first that deals specifically with the river itself. Moreover, the illustrations are remarkable: those from Möllhausen's sketches are often admirable...two from photographs represent perhaps the first use of the camera in Arizona, certainly on the Colorado River." J. S. Newberry's contribution as expedition geologist is specially significant, for Newberry was the first to postulate a geologic theory on the origin of Grand Canyon. Farquhar 21.

138. Jennings, Jesse D. **GLEN CANYON: An Archaeological Summary.** University of Utah Press, Salt Lake City, 1998, 8vo., pict. wraps, 130pp., illus. Foreword by Don D. Fowler. Before Lake Powell there was Glen Canyon. For more than 1,300 years the canyon was home for generations of a prehistoric people now known as the Anasazi. As work began on the Glen Canyon Dam in 1957 so did a massive 5-year operation to inventory the archaeology, geology, history, and ecology of the canyon and its tributaries before they were submerged beneath Lake Powell. In this interpretive summary, Jennings shows the achievements of the salvage team and explains how the finds affected previous conclusions about the prehistory of the Southwest. Maps detail the area and photographs point to the extensive archaeological resources as well as the stunning landscape of what was then a very remote and difficult part of the country. Buckey was most widely known in the West for his ability to capture bandits and gunmen, tracking

them with uncanny precision through lands arid and trail-less in Utah and Arizona. The dramatic story of his most famous coup, the chase and capture of four masked bandits who held up the Atlantic and Pacific train at Canyon Diablo, is one of the most thrilling tales in Western history or fiction. Moulty Fulmer and the First Grand Canyon Dory on the Last of the Wild Colorado River.** Vishnu Temple Press, Arizona, 2012, 1st edition, oblong 8vo., pict. wraps, 240pp., illus., index. There was a time when river runners built their own boats and rowed the Colorado River through Grand Canyon on free-flowing water; no permit problems, no high-tech gear and not much in the way of backup. What they did have were cameras, lots of film, cans of food, life jackets and journals to keep their notes in. Tom has chatted with a number of the guys and gals still standing, then scoured libraries, attics and garages to find the stories and pictures the others have left behind. He built a replica of Grand Canyon's first decked McKenzie River dory from photographs, notes, and the original wreck the boat builder left behind, and has since rowed it through the Canyon three times. Here he tells the story of Moulty Fulmer, Brick Mortenson, P.T. Reilly, Dock Marston, and their friends on river trips on some of the highest water of the last century. He has included many stories of other trips during the same time period, the 1940s though the 1960s, including the development of recreational river running and boat design on the Colorado. Howes (P527) calls this "The first complete narrative" [of Powell's famed transit of the Colorado river]; his earlier reports were largely devoted to scientific data." Scores of this edition's illustrations appeared first, and probably only, in this account. Farquhar (43) gives the Meadville a separate listing because "it differs in so many respects from the report of 1875...Not only has the narrative been revised and augmented, but there are several new chapters and a great many new illustrations. Included in the latter are adaptations from the superb sketches of William H. Holmes which are featured in the Dutton atlas. Altogether, it is a handsome book, and also a scarce one." "Scarce" is an understatement: it is believed, by some Powell experts, and by Van Allen Bradley, that only a hundred or so copies of the Meadville ever reached the marketplace, so the copy offered here may be literally "one in a hundred." The Calamities of James White and Charles Baker.** University Press of Colorado, 2007, 8vo., tan cloth, pict. dustjacket, 210pp., b/w photos, bilio., index. During westward expansion in the nineteenth century, thousands of anonymous individuals drifted into the American West in search of opportunities in trapping and trading, prospecting and mining, military service, railroad construction, freighting, agriculture, town-building, and adventure. Few of these emigrants achieved sufficient

notoriety for their names to be recalled today. Two exceptions are James White, who is said to have accidentally traversed the Grand Canyon on a makeshift raft two years prior to the first expedition of John Wesley Powell, and his previous companion Charles Baker, who played a prominent role in prospecting in Colorado's San Juan Mountains in the 1860s. The exploits of these two drifters and the ongoing debate about the veracity of the Grand Canyon story and other legendary adventures provide the basis for lively narrative history in Virginia McConnell Simmons's *Drifting West*. Simmons's account, based on extensive research—from archival study to rafting and backpacking expeditions in the Grand Canyon—reveals the characters, fortunes, and misfortunes of these two adventurous men, examines the debate about White's alleged traverse of the Grand Canyon in relation to Powell's career, and offers a compelling portrait of the West as seen through the experiences of the two drifters. Maps, photographs, sketches, and historical data about the places White and Baker passed through enrich the text. New. . . . \$29.95

Includes large foldout map of "Reconnaissance of the Zuni, Little Colorado, and Colorado rivers, made in 1851." The expedition consisted of Sitgreaves, Lieutenant J. G. Parke, Dr. S. W. Woodhouse, R. H. Kern with Major H. L. Kendrick in command of the escort and Antoine Leroux as guide. The group left Santo Domingo NM on August 1, 1851, stopped at Zuni in September and arrived at San Diego on November 30. Kern's drawings of the Zuni Indians doing the "Buffalo Dance" was the first and perhaps the only depiction of the seldom-performed dance with heat. S.W. Woodhouse contributed the general natural history report as well as those on mammals, birds and medical aspects; Hollowell reported on reptiles, Torrey on botany; and Baird and Girard covered fishes and Kern contributed the handsome views and illustrations of the Indians. 199. Utah Historical Quarterly Vol. VII. **DIARY OF ALMON HARRIS THOMPSON. Geographer, Explorations of the Colorado River of the West and its Tributaries, 1871-1875 by John Wesley Powell.** Utah Historical Society, Salt Lake City, 1939, Volume 7, January/April/July, No. 1-2-3, 8vo., maroon fabrikoid, 140pp. Introduction by Dr. Herbert E Gregory. Thompson's work recorded in this diary falls into three sections: navigation of the Green-Colorado with Major Powell in 1871-1872; exploratory traverse from Kanab to the mouth of the Fremont River; and the systematic mapping of central, eastern and southern Utah, and of Arizona north of the Grand Canyon. Of much interest to Canyon-River buffs are Thompson's notes of the second Powell expedition from Green River, Wyoming, to Kanab Creek recorded here including the winter layover at Lee's Ferry and travel to Kanab. Farquhar: "He was the leading figure in the second expedition and in subsequent surveys. It is a great loss to our understanding of what went on that he did not himself write a book. The publication of his diary partly supplies this lack." [Farquhar 48] Scarce. . . . \$275.00

Reprint of Utah Historical Quarterly Volume XV, originally published in 1947. Edited by William Culp Darrah, Ralph V. Chamberlin and Charles Kelly. Vol. XVI-XVII: 546pp., illus., map. Reprint of Utah Historical Quarterly Volumes XVI and XVII, originally published from 1948 to 1949. Edited by Herbert E. Gregory, William Culp Darrah and Charles Kelly. Vol. 7: In some respects the most important of the early Colorado River exploration journals, the diaries of Almon Harris Thompson can naturally be divided into three sections: navigation of the Green and Colorado rivers; exploratory traverse from Kanab to the mouth of the Fremont River; and the systematic mapping of central, eastern, and southern Utah and northern Arizona. Thompson's maps of the Colorado drainage basin, including the first maps of southern Utah and the canyons of the Green and Colorado rivers, place him in the front rank of geographic explorers and they proved invaluable to the later Powell expedition. Vol. 15: This volume contains the journals of Major John Wesley Powell, George Young Bradley, Walter Henry Powell, and J. C. Sumner. Also included are various letters and notes by the members of the first expedition, and the journal of Francis Marion Bishop from the second expedition. All of the writings offer vivid descriptions of both adventure and of able and energetic scientific field work, and are of enduring interest and importance. Vol. 16-17: This volume looks to the larger significance and fruits of the second of Powell's explorations, a more carefully constituted and better equipped scientific operation, yet one strangely neglected in historical records. Set of 3 volumes. New. . . . \$59.85

202. Utah Historical Quarterly Vol. XV. **THE EXPLORATION OF THE COLORADO RIVER IN 1869 by John Wesley Powell.** Utah State Historical Society, Salt Lake City, 1947, Volume 15, Nos. 1-2-3-4, 8vo., maroon fabrikoid, 270pp., detailed index, many historic photos, foldout maps. This and Vol. XVI-XVII are widely regarded as the "Big Three" in Powell research material published by the Utah Historical Society. William Culp Darrah, one of two Major Powell biographers (Stegner is the other, at that time), wrote a number of biographical sketches for Vol. XV, and edited several important source documents as well. Among the latter are George Y. Bradley's journal, Powell's letters to the Chicago Tribune, letters of W. H. Powell to the Chicago Evening Journal, letters of O. G. Howland to the Rocky Mountain News, J. C. Sumner's journal, Powell's journal, and several others. Of special significance is the appearance of Capt. Francis Marion Bishop's journal, edited by Charles Kelly. Bishop, a student of Powell at Illinois Wesleyan, was picked by the Major as topographer on the second expedition (Dellenbaugh was named assistant topographer). Bishop's letters to the Bloomington Pantograph also are reproduced. The volume includes six maps, and a number of significant illus., and a photo "Steps Cut by Father Escalante [and Dominguez] in 1776." 204. Utah Historical Quarterly Vol. XVI-XVII. **THE EXPLORATION OF THE COLORADO RIVER AND THE HIGH PLATEAUS OF UTAH IN 1871-72 by John Wesley Powell.** Utah State Historical Society, Salt Lake City, 1948-1949, Volumes 16-17, Nos. 1-4, 8vo., maroon fabrikoid, detailed index, many historic photos, foldout maps. Farquhar: "These volumes are grouped together as they form a unit in the documentary history of the Powell survey. Valuable source material." This and Vol. XV which preceded it are widely regarded as the "Big Three" in Powell research material published by the Utah Historical Society. Dale Morgan, in his intro. to Vol. XVI-XVII states: "With this volume of its Quarterly the (Society) completes one of its most ambitious and most important projects, the publication of the original journals of the Powell expeditions of 1869-72." The Table of Contents reads like a Who's Who of Powelliana and River Lore. There's Dr. Herbert Gregory, editing the journal of Stephen Vandiver Jones; William Culp Darrah, editing John F. Steward's journal; Charles Kelly, performing the same task for Walter Clement Powell; Darrah again for Beaman, Fennemore, Hillers, Dellenbaugh, Johnson, and Hattan papers, and an appendix containing three Andrew Hall letters (again, Darrah). Preceding each journal is a biography of the author, in each case by the editor. There are 11 historically significant photos, a frontispiece in color by Dellenbaugh, and a map of the Green and Colorado to the mouth of the Virgin. If one had to list half-a-dozen of the most important books on the Powell expedition and the River, apart from the Major's own accounts, these UHQ titles would rank among them. Farquhar 47b. Scarce. I - GEOGRAPHICAL REPORT.** GPO, Washington, 1889, 4to., brown cloth (original binding), 780pp., illus., maps, index, errata tipped in. Farquhar says of this volume that "it is of prime importance in respect to the history and geography of the Colorado River. The Wheeler Survey did notable work in the lower part of the Canyon and touched the river at various other points from 1871 to 1880. The illustrations, from photographs by T. H. O'Sullivan, are particularly striking. Although Wheeler is strong on chronological tables, he barely mentions Powell's expedition of 1869 and completely ignores those of 1871 and 1872. But then Powell ignored them himself, and moreover, completely ignored Wheeler." A very scarce and handsome volume. A foldout map of the "Grand Cañon of the Colorado" showing the routes of land and river parties exploring the region is the gem of this piece of history. Farquhar 51. \$1,350.00

Through painstaking research into contemporary sources including eyewitness accounts and official government documents and reports, and through discovery of the testimony and a "missing witness" who had traveled with the doomed Fancher Party until shortly before the massacre, here is a far different and horrifying story. Meticulously researched and compellingly written, Wise's book is the first complete account of one of the most calculated and shameful mass murders in the violent history of America's violent frontier. The Life of John Wesley Powell.** Oxford University Press, New York, 2001, 1st edition, tall 8vo., blue boards, pict. dustjacket, 673pp., illus., biblio., index. In *A River Running West*, Donald Worster, one of our leading Western historians, tells the story of Powell's great adventures and describes his historical significance with compelling clarity and skill. Worster paints a vivid portrait of how this man emerged from the early nineteenth-century world of immigrants, fervent religion, and rough-and-tumble rural culture, and barely survived the Civil War battle at Shiloh. The heart of Worster's biography is Powell's epic journey down the Colorado in 1869, a tale of harrowing experiences, lethal accidents, and breathtaking discoveries. After years in the region collecting rocks and fossils and learning to speak the local Native American languages, Powell returned to Washington as an eloquent advocate for the West, one of America's first and most influential conservationists. But in the end, he fell victim to a clique of Western politicians who pushed for unfettered economic development, relegating the aging explorer to a quiet life of anthropological contemplation. The author has presented an excellent background to his subject in order to orient the visitor, and has then taken up the various areas. 222. Yochelson, Elis. **SMITHSONIAN INSTITUTION SECRETARY, Charles Doolittle Walcott.** Kent State University Press, Ohio, 2001, 1st edition, 8vo., cloth, dustjacket, 589pp., index. Charles Doolittle Walcott (1850. 1927) was director of the U.S. Geological Survey from 1894 to 1907, and director of the Smithsonian Institution from 1907 until his death in 1927. He was instrumental in the founding of the National Museum of American Art and heavily involved with the early days of aeronautical research. But in the geoscience community, he is probably best remembered for discovering the fossil invertebrates of the Burgess Shale. In *Smithsonian Institution Secretary, Charles Doolittle Walcott*, Ellis Yochelson has completed a two-volume biography of Walcott. In this

second volume, Yochelson picks up Walcott's story in 1907, the year that he left the U. S. Geological Survey and became director of the Smithsonian. Drawing heavily on Walcott's diary, Yochelson provides a detailed, nearly day-by-day description of Walcott's life, as he administered the Smithsonian, served as president of the National Academy of Sciences and later the American Association for the Advancement of Science, and was a founding member of the National Research Council. 225. Zwinger, Ann (text by) and Michael Collier (photographs by). **GRAND CANYON. LITTLE THINGS IN A BIG PLACE.** University of Arizona Press, Tucson, 2006, 8vo., pict. wraps, 79pp., photos. Most people would not think of it as a desert, but the Grand Canyon of the Colorado is most assuredly that. With its towering walls barely lapped by the river, the canyon at its floor is a desert place unto itself. Ann Zwinger, a master of exposing the heart of the wild world, plumbs the very soul of this majestic place, exploring the deserts along the Colorado's banks in order to examine things that often go unnoticed against a backdrop of overwhelming grandeur. Whether drawing our attention to a newly unfurled evening primrose, a ladybug at work on a leaf full of aphids, or the amazing appearance of a humpback chub slipping through the water like a pewter ghost, she opens a new window on the Canyon at river level to show us that small things of overpowering beauty can be found in a place whose intrinsic splendor is nothing less than staggering. Michael Collier's photographs also offer readers a view of the Canyon that may surprise anyone accustomed to more panoramic perspectives. Here are dramatic and mysterious images of not only rocks and rapids but also the intimate manifestations of nature that Zwinger describes. And for those who have never rafted the Colorado, Collier's dramatic photographs are the next best thing. New. . . . \$14.95

Teamed with scientists and other volunteer naturalists, Zwinger was part of an ongoing study of change along the Colorado. The book begins with a bald eagle count at Nankoweap Creek in January and ends with a subzero, snowy walk out of the canyon at winter solstice. Between are the delights of spring in side canyons, the benediction of rain on a summer beach, and the chill that comes off limestone walls in November. Science in the hands of a poet, this captivating book is for armchair travelers who may never see the grandiose Colorado and for those who have run it wisely and well. New. . . . \$35.00
