
Clinic-Based Services

General Cardiology Consultations:

- Chest pain or discomfort
- Palpitations or irregular heartbeats
- Syncope or fainting episodes
- Shortness of breath
- Fatigue or exercise intolerance
- Swelling in the legs or ankles (edema)
- High blood pressure or uncontrolled hypertension
- High cholesterol or lipid management
- Risk factor assessment and management (family history, smoking, obesity, diabetes)
- Preoperative cardiovascular evaluations
- Post-surgical or post-hospitalization cardiovascular follow-ups
- Valvular heart disease.

Onsite Diagnostic Testing

- 12-lead ECG
- Treadmill Exercise Stress Test
- Echocardiogram (including Bubble and Contrast Studies)
- Exercise Stress Echocardiogram
- Dobutamine Stress Echocardiogram
- Nuclear Stress Testing
- Holter Monitoring (24 hours to 14 days)
- 24-hour Ambulatory Blood Pressure Monitoring

Preventive Cardiology Services

- Hypertension and lipid management
- Risk factor modification:
 - Dietary and lifestyle counseling
 - Genetic risk assessment
 - CT Cardiac Scoring
- Smoking cessation programs
- Cardiovascular fitness and weight management plans

Specialized Follow-Up Services

- Heart failure management
- Post-percutaneous coronary intervention (PCI) and/or CABG follow-ups
- Arrhythmia management and monitoring
- Valvular heart disease management i.e Aortic Stenosis and Mitral regurgitation.

Special Procedures

- Laser vein ablations for varicose veins
 - Peripheral vascular assessments and interventions
-

Ambulatory Setting Services

- Portable Echocardiography and Stress Testing
 - Mobile Holter and Ambulatory BP Monitoring
 - Preventive health screenings (e.g., hypertension, lipid disorders, risk factor evaluation)
 - Community-based cardiovascular education and wellness programs
 - Venous procedures in outpatient settings (e.g., laser ablations)
-

Hospital-Based Services

Invasive and Interventional Cardiology

- Coronary Angiography and Angioplasty (STEMI and Elective)
- Peripheral Vascular Interventions
- Endovascular AAA Repairs
- Rotablation and Impella Device Usage

Acute Cardiac Care

- Management of Acute Myocardial Infarctions (STEMI/NSTEMI)
- Cardiogenic Shock Management
- Temporary Pacing for Bradyarrhythmias or Heart Block
- Advanced heart failure support

Advanced Diagnostics

- Transesophageal Echocardiography (TEE)
- Electrical Cardioversion for arrhythmia management
- In-hospital Echocardiograms and Stress Tests
- Cardiac CT and MRI Interpretation (if available)

Specialized Follow-Up Services

- Post-CABG or PCI follow-up
 - Comprehensive arrhythmia management
 - Advanced heart failure management
-
