

O T E R O

I am a Puerto Rican born and raised artist working in illustrative painting, drawing, & storytelling. My works draw influence from the struggle of my tropical, Latin upbringing and the American ideal. The result is an insisting ontological curiosity with a tendency to fictional media. I utilize traditional methods to create works in the form of narrative aided by digital design processes in the form of illustrative depictions & storytelling made to understand the universe in which it exists. Every person has a piece of the world to shape and as a creative I believe this to be a duty essential to aim for. With these incentives in mind, my work contains a narrative that encapsulates the continuing struggle of Living in harmony to Truth as a north. To live and simply try is an act of nobility in the face of the abyss.
