

A bit about us

We believe choosing not to drink alcohol shouldn't be a compromise.

So we created a revolutionary beer to give you exactly the same experience without the hangover.

Freestar is the first *truly* alcohol free beer. We blend water, malted barley, perle hops and other natural ingredients - without ever producing alcohol - to create our great tasting beer. We've even got an award to prove it.

Enjoy!

How we make our beer

We start with the building blocks of beer: hops, barley and water. We don't add any yeast as that's what ferments to produce alcohol. Instead we delicately blend natural ingredients to add complexity and to balance the beer. As a result our beer is *truly* alcohol free.

Freestar is better for the planet. Our process creates 70% less waste and uses 80% less water than other methods.

Nose: hoppy, floral, aromatic
Palette: clean, citrus, bright
Finish: malt, crisp, dry and long

Perle Hops
Light floral aroma,
tropical fruit,
soft bitterness
Malted barley
Biscuit-y body
and orange notes,
