**The power of focus** – the ability to hone in on our strengths, specialize, and provide targeted solutions to the complex problems we face.

When we focus on our strengths, we become masters of our craft. This specialization is not just beneficial for us as individuals, but it creates a ripple effect of advantages for our teams and the company as a whole.

Improves the quality of our offerings but also streamlines our processes, making us more agile and responsive to the dynamic demands of the security landscape.

**Let's commit to being SPECIALIST!**

A man in a dark suit and glasses stands with his back to the camera, looking out over a city skyline at sunset. The sun is low on the horizon, casting a warm orange glow over the city and the sky. The man's hands are in his pockets. The city features various skyscrapers and buildings, with a body of water visible in the distance. The sky is filled with soft, wispy clouds.

# GROWING Enterprises

Projects included in this booklet are a real  
representations of how verticals and institutions  
Use Centralized Video Management VMS to  
scale transformative video solutions.

# AI REVOLUTION have begun

Deep learning drives many artificial intelligence (AI) applications and services that improve automation, performing analytical and physical tasks without human intervention.

## Global Impact like we have never seen before

Our acceptance of AI in the security industry is growing at a staggering rate.

Once over-promised and under-delivered, analytics are finally reaching their potential in security applications.

As we construct larger neural networks and train them with more and more data, their performance continues to increase. It is scalable and the performance just keeps getting better!

# CENTRALIZED Video Management Solution

Create a **“Single pane of glass view”** within the Digifort Client for monitoring all IP connected hardware & metadata devices and help market leaders to deliver transformative solutions.

Put simply, Digifort VMS+ sits in the sweet spot for Video-Centric enterprises that want to achieve:

**Proactive response's  
faster with greater  
efficiency**

**Reduce  
human-errors**

## COMBINANT (COMBINED TERMINAL ANTWERP)

Combinant (Combined Terminal Antwerp) is an open access rail terminal for intermodal transport, located in the port of Antwerp. Thanks to its central location in the port of Antwerp and the cooperation with various train operators, Combinant can offer an extensive European train network. Combinant was established as a joint venture between BASF, Hupac and Hoyer with the support of Europe and the Flemish Government. By replacing part of the road transport with rail transport, the environment is less burdened.
