

### **Mission Statement and Goals**

The Fort Belknap Child Care Program supports low-income working families by offering access to affordable, high-quality child care and after-school programs, thus facilitating their ability to manage school, training or work schedules. The program provides assistance to children and their families who face challenges in finding child care programs that cater to their needs.

In addition, the Fort Belknap Child Care Program improves the quality of care to foster healthy development and learning in children by supporting quality improvement activities that meet the health and safety requirements of the Office of Child Care. The program also helps child care providers attain training and education that meet higher child care standards.
