THE BETTER DIRECTORY

Once a year, The **REFERRED PROS** directory is delivered to single family homes in your community. The contractors listed have been vetted by our 3rd party research company. Our team is extremely selective about who we list in our directory and we continuously monitor the listed contractors to make sure they are measuring up to their reputations. The **FREE** County directory is an annual reputation-based resource designed to make it easy to find premier local contractors that are screened and work in your area. We are a local, women-owned and family operated company based here in Colorado.

Contractors must carry insurance and follow state requirements. **REFERRED PROS** is listed as a certificate holder to each contractor so we are notified if their state insurance requirements change or are canceled.

State law requires a business to be electronically filed and we confirm on the state site they are in good standing.

We confirm Years in Business with the Secretary of State to make sure companies have a solid history in their communities.

We cross reference each company and list their proper state licensing numbers

We check and list each companies Better Business Bureau, Google & Facebook before mailing to local communities so homeowners can identify each company's/contractor's reputation online.

REFERRED PROS monitors calls as a 3rd party for quality assurance and a contractor displaying the "Gold Star" in the directory earned their status by achieving excellence in:

- Answering calls in a timely & professional manner
- Communicating respectfully & clearly in scheduling appointments
- Completing high quality work without complaints from consumers using the **REFERRED PROS** Directory

Every "Referred Pro" is as good as their last job!

If you have great experience, we want to hear about it and please send us a review to info@referredpros.com.

Also, incase you have a bad experience with one of the "Pros", contact us immediately at (303) 554-7010 or info@referredpros.com.

We will step in to make sure you are treated right.

Negatively reviewed Pros that don't resolve issues are simply kicked out!

Homeownership in Colorado: General Maintenance

Most homeowners don't consider home maintenance until an issue arises. For Colorado residents, the inconsistent weather creates a freezing and thawing cycle that can wreak havoc inside the home. It is crucial for homeowners to get ahead of these unexpected weather changes with general maintenance and upkeep. Colorado homeowners can prepare their homes for the fluctuating weather conditions by following a simple checklist year-round. These steps can help reduce stress on key operating systems and maximize comfort in your home.

Maintenance and Upkeep Checklist:

- Ensure carbon monoxide detectors, smoke detectors and thermostat batteries are changed annually.
- Clear vents, gutters and outside screens regularly.
- Inspect all systems regularly for leaks or damage to increase longevity.
- Change or clean HVAC filters every 1-3 months.
- Confirm boiler pressure is in the right range as weather shifts.
- Remove obstructions and debris away from HVAC equipment.
- Schedule annual HVAC maintenance.

Preventive maintenance is essential for any home, but Colorado homeowners need to take extra caution. Seasonal changes place pressures on different home systems, requiring specific maintenance. **Homeowners should complete these tasks during the following season:**

Winter:

- Prevent frozen pipes with insulation, open cabinet doors, and a slow faucet drip during deep freezes. Monitor snow obstructions and clear any build up near ventilation airways.
- Seal drafts around windows and doors to reduce cold airflow.

Spring:

- Clean gutters to reduce potential back up and overflow of water.
- Replace HVAC filters for better air quality and efficiency.
- Check foundation for cracks and water damage post spring snow thaw.
- Flush water heater to extend its life and improve performance.

Summer:

- Ensure outdoor faucets are secure and not leaking.
- Maintain A/C filters and check systems for safety and efficiency.

Fall:

- Disconnect hoses from outdoor faucets before the first freeze to prevent burst pipes.
- Prepare pipes for winter temperatures.
- Schedule your annual furnace check for safe, efficient heating.

By scheduling routine maintenance, following upkeep checklists and staying proactive, Colorado homeowners can ensure an efficient home that can extend the longevity of your home's plumbing, heating, cooling and electrical systems.

Living in Place Solutions:

Helping Seniors Stay Safe, Independent, and at Home

For many seniors, home represents independence, comfort, and a lifetime of memories. As people live longer and healthier lives, more older adults are choosing to remain in their homes rather than move into assisted living communities. This approach—often called living in place or aging in place—focuses on adapting homes so seniors can continue to live safely, comfortably, and independently.

With thoughtful planning and a few strategic home modifications, seniors can remain in the homes they love for many years while reducing safety risks and improving everyday convenience.

Why Living in Place Matters

Falls are one of the leading causes of injury for adults over 65, and many of these accidents occur inside the home. Living in place solutions help reduce these risks by improving accessibility, stability, and ease of movement throughout the home. Beyond safety, remaining at home supports emotional well-being. Seniors are able to maintain their routines, stay connected to their communities, and preserve their sense of independence. For many families, home modifications are also significantly more affordable than long-term assisted living options.

Key Home Improvements That Make a Difference

Many living in place upgrades are simple but highly effective:

• Safer Bathrooms

Bathrooms are one of the most common locations for falls. Improvements such as walk-in showers, grab bars, non-slip flooring, comfort-height toilets, and shower seating can dramatically increase safety and comfort.

• Accessible Entryways

Getting in and out of the home should be easy and secure. Solutions may include zero-step entries, ramps, wider doorways, and lever-style door handles that are easier to operate than traditional knobs.

• More Functional Kitchens

Kitchen upgrades can make everyday tasks easier by adding pull-out shelves, easy-to-reach cabinets, lever-style faucets, and improved lighting.

• Improved Mobility Throughout the Home

Additional handrails, stair lifts, better lighting, and removing tripping hazards like loose rugs can help seniors move around the home with greater confidence.

• Planning Ahead

The best time to consider living in place modifications is before they are urgently needed. Planning ahead allows homeowners to make thoughtful improvements that blend naturally with their home while ensuring long-term safety.

• A Home That Supports Independence

Living in place solutions aren't about turning a home into a medical environment—they're about creating a space that continues to support independence, comfort, and quality of life.

With the right modifications, seniors can remain where they feel most comfortable at home—while enjoying the freedom and confidence that comes with a safer living environment. *

Beyond safety, remaining at home supports emotional well-being.

Groundworks
Foundation Solutions Crafted with Pride.

DAMAGED HOME?

Repair and protect your greatest asset today!

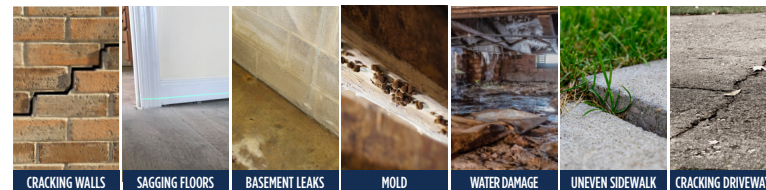

What was it that drew you to your home?

Do you still love your house today, or have ugly wall cracks or leaking water changed your mind?

Groundworks can restore your home's health, safety, and longevity by permanently repairing damage to your basement, crawl space, foundation, or concrete.

Take a look around your home. Do you see any of these signs?

These symptoms mean there is a problem with your foundation, basement, crawl space, or concrete.

Your house relies on its foundation for stability, but it isn't perfect. It can easily sustain damage for many reasons, many of which boil down to the soil under and around your home.

The soil throughout Colorado, including Denver and Colorado Springs, has mostly clay elements including volatile bentonite clay. Clay soil can become unstable during:

- ▲ Drought
- ▲ Invasive tree root movement
- ▲ Floods

We have developed a variety of permanent repair solutions to meet your home's unique repair needs. These include:

- › Interior Drains
- › Sump Pumps
- › Dehumidifiers
- › Vapor Barriers
- › Pier Systems
- › Wall Repair Systems
- › Concrete Lifting

Your home can benefit from some TLC and a restored foundation, basement, crawl space, and concrete slabs.

Get started with mending the broken parts of your home today by contacting our friendly and knowledgeable staff to book a free inspection and repair estimate.

LIMITED TIME OFFER!

SAVE UP TO \$500

* Ten percent off any job over \$2500 up to a max of \$500. Coupon must be presented at time of inspection. Offer may not be combined with any other offer. Limit one per customer. Ask inspector for further details.

Why would YOU use a contractor referral directory?

There are many reasons why someone might use a contractor referral directory:

- ❶ Access to a curated list of contractors: Contractor referral directories maintain a database of contractors who have been vetted and verified for their skills, experience, and reliability. By using such a directory, you can gain access to a pre-screened list of contractors who have already demonstrated their competence.
- ❷ Time-saving and convenience: Searching for a contractor can be a time consuming task, involving researching multiple options, checking references, and comparing prices. A referral directory streamlines this process by presenting you with a list of reputable contractors in one place. It saves you the effort of conducting extensive research and allows you to quickly find suitable candidates.
- ❸ Quality assurance: Contractor referral directories often have stringent criteria for accepting contractors into their network. They typically assess factors such as licenses, insurance, certifications, past work experience, and customer reviews. By using a directory, you can have greater confidence in the quality and professionalism of the contractors you choose from the list.
- ❹ Increased trust and reliability: When contractors are recommended through a referral directory, it adds a layer of trust. Knowing that the contractors have been vetted by the directory provider and have a reputation to uphold can give you peace of mind when selecting a contractor.
- ❺ Wide range of services: Contractor referral directories often cover a wide range of services, including home improvement, plumbing, electrical

work, landscaping, and more. This means you can find contractors for various projects or repairs all in one place, saving you from having to search different sources for different types of services.

- ❻ Reviews and ratings: Many contractor referral directories provide reviews and ratings from previous customers. These reviews can offer insights into the quality of work, professionalism, communication, and overall satisfaction of other clients. Reading reviews can help you make an informed decision and select a contractor who aligns with your specific needs.

Ultimately, using a contractor referral directory can simplify the process of finding a reliable contractor, save time, and increase your confidence in the quality of work provided.
