

SPC-100 **PLUNGER CONTROLLER**

Systec's entry level controller, the **SPC-100** provides auto-adjustable control for a plunger lift system.

The **SPC-100** offers the following control modes:

- Plunger Mode
- Tank Mode
- Intermittent Mode

The operator has complete control over all auto-adjustable parameters, based on good, fast, and slow run times established by the operator.

The controller comes standard with one latch valve, 6V battery, and 10W solar panel. Two additional latch valve outputs are available on the circuit board, as well as digital inputs for high line pressure and external ON and OFF signals.

The **SPC-100** is available in the standard 8"x8" plastic enclosure, or an 8"x10" plastic enclosure.

Faceplates in both sizes are also available, for field replacements.

Part Number 8x8	2327000-00
Part Number 8x10	2327000-50
P/N Faceplate 8x8	2327300-00
P/N Faceplate 8x10	2327300-50
Input Voltage	6-28Vdc
Standard Battery	6V, 5Ah SLA
Solar Panel Voltage	28Vdc max, 10W
Latch Valve	6V, positive common
