

SRL-100W

WIRELESS REMOTE LATCH VALVE

Stainless (SS) or Painted Steel (PS) Enclosure

Plastic enclosure (PL)

Perfect for applications where the controller is a long distance from the well head, the **SRL-100W** includes a single 6-V latch valve with a wireless transmitter/receiver pair in either a painted steel, stainless steel, or plastic enclosure.

The 900MHz wireless link has a distance of up to one mile line of site.

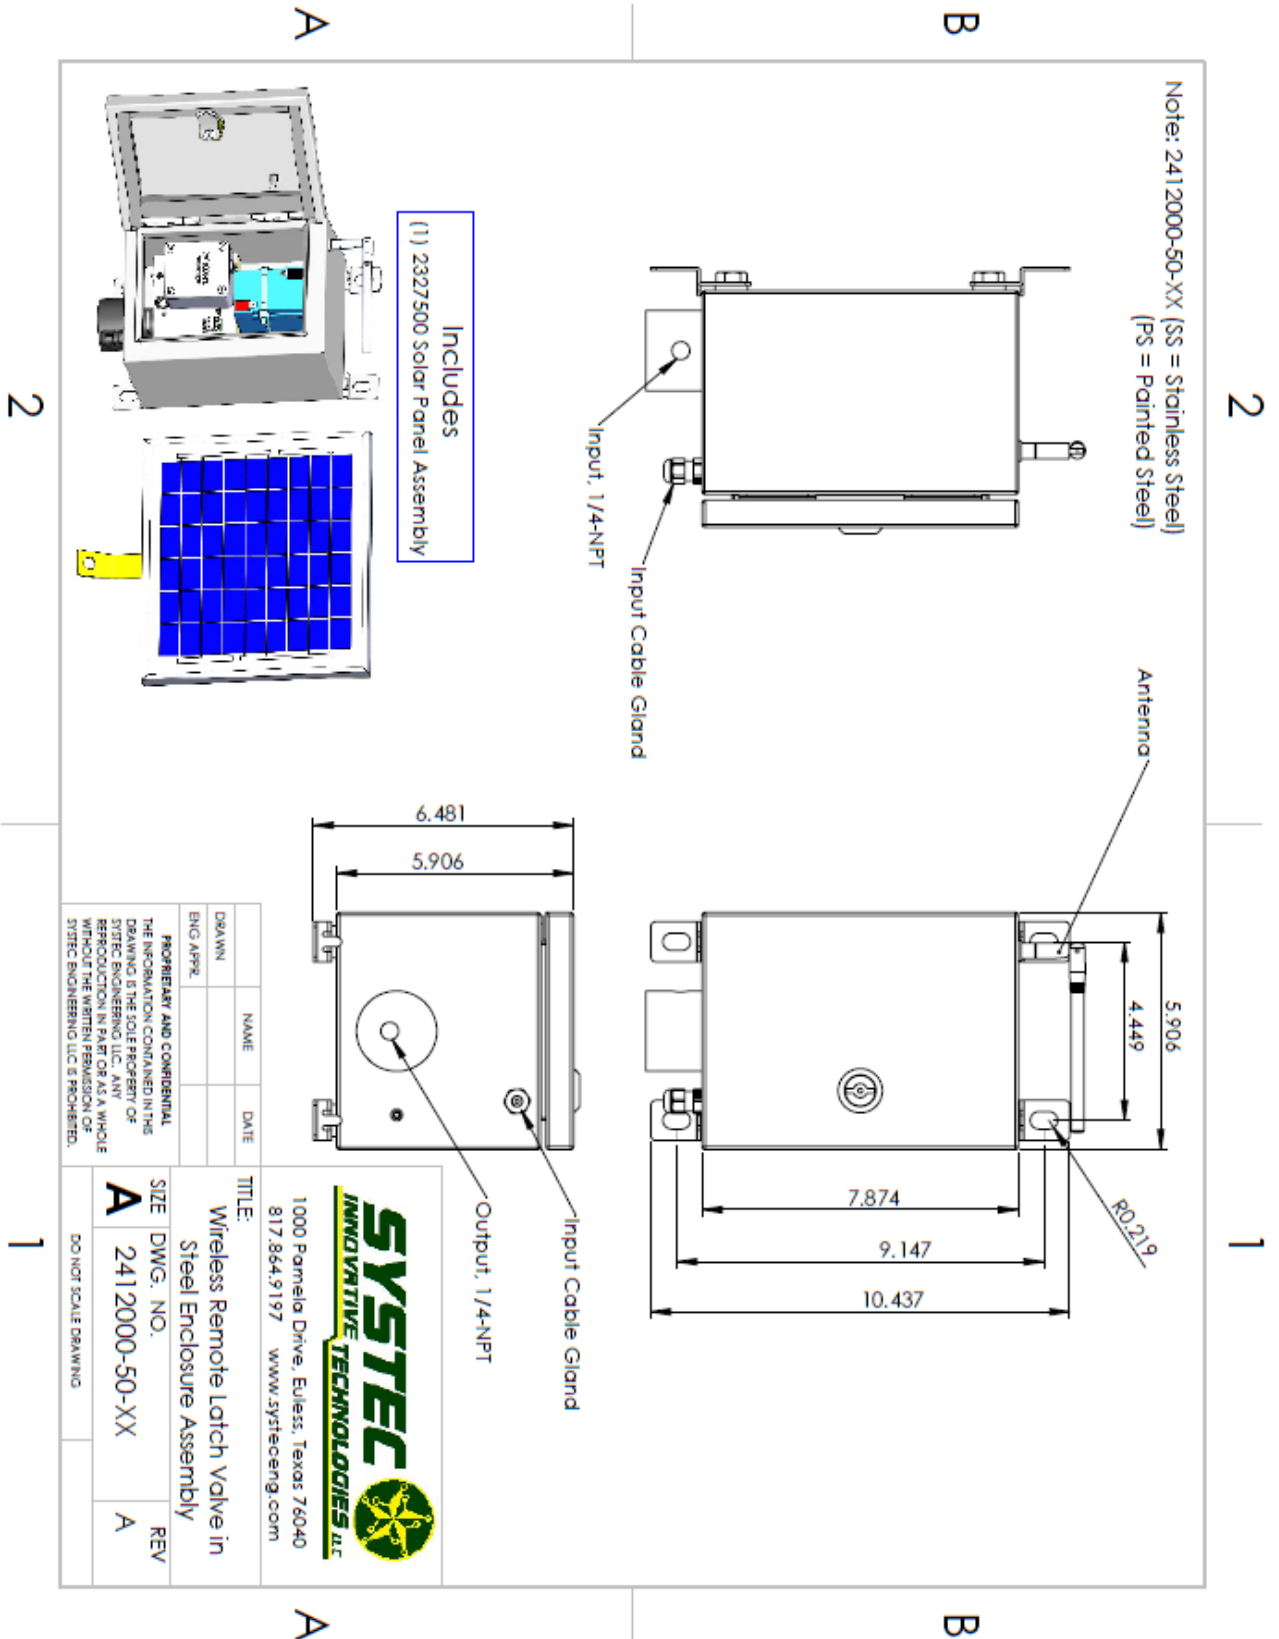

The unit includes a 6V 5Ah battery, charge controller, and 10W solar panel.

The latch valve has one ¼" NPT input port and one ¼" NPT output port.

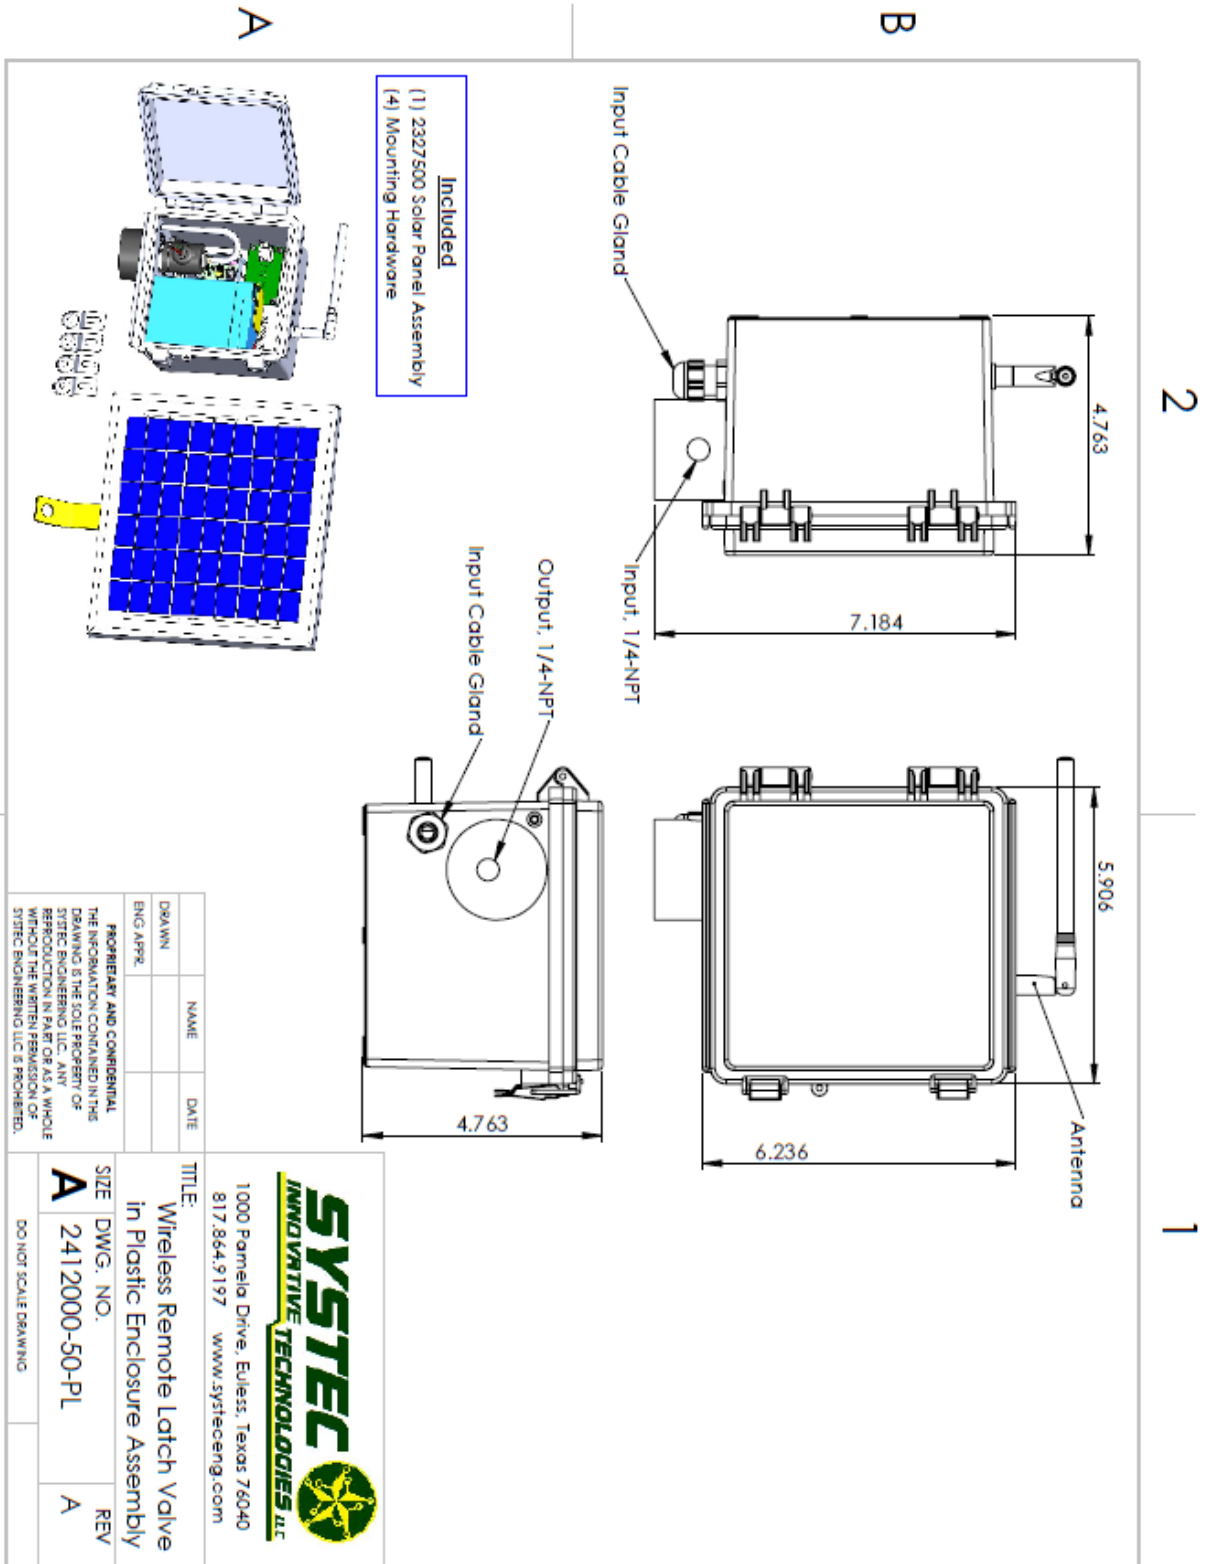

The wireless receiver module is located inside the enclosure. A separate transmitter module enclosed in an aluminum enclosure is provided for the controller side to transmit the latch valve signals.

Model	Enclosure	Part Number
SRL-100W PL	Plastic	2412000-50 PL
SRL-100W SS	Stainless	2412000-50 SS
SRL-100W PS	Painted Steel	2412000-50 PS
