

AGS 747LL SOYBEANS

RM: 7.4

POSITIONING

- Proven genetics with Liberty Link trait
- Versatile fit across acres
- Excellent option for glyphosate resistant environments
- Determinate mid MG 7 adapted to South

PLANT & AGRONOMIC CHARACTERISTICS

Trait	Liberty Link
Relative Maturity	7.4
Emergence	-
Lodging	-
Shatter Resistance	-
Plant Height	Medium-Tall
Plant Type	-
Growth Habit	Determinate
Flower Color	Purple
Pubescence	Tawny
Pod Color	Tan
Hilum Color	Black
Chloride	-

DISEASE & PEST

Iron Deficiency Chlorosis	-
Phytophthora Race	-
Phytophthora Field Tolerance	-
Brown Stem Rot	-
Sclerotinia White Mold	-
Sudden Death Syndrome (SDS)	-
Soybean Cyst Nematode	Resistant (R3)
Frogeye Leaf Spot	8
Stem Canker	8
Root Knot Nematode:	Resistant
<i>Southern</i>	x
<i>Peanut</i>	-
<i>Javanese</i>	-

Rating Scale: 9 = Excellent, 1 = Poor
 - Testing Currently Underway

The LibertyLink® system is a simply better solution combining high-performing genetics with excellent weed control for high yields that deliver. With more than 60 million acres of soybeans, corn, cotton and canola now having the LibertyLink trait, growers can spray powerful Liberty®, the only working nonselective herbicide to handle tough-to-control and resistance weeds, including Palmer amaranth, giant ragweed, kochia, waterhemp and marestail.*

*The active ingredient in Liberty is a Group 10 herbicide, which is the only broad-spectrum herbicide that effectively controls grasses and broadleaf weeds, and it has no known resistance in the U.S. broadacre crops.
