The LibertyLink® system is a simply better solution combining high-performing genetics with excellent weed control for high yields that deliver. With more than 60 million acres of soybeans, corn, cotton and canola now having the LibertyLink trait, growers can spray powerful Liberty®, the only working nonselective herbicide to handle tough-to-control and resistance weeds, including Palmer amaranth, giant ragweed, kochia, waterhemp and marehail.\*

\*The active ingredient in Liberty is a Group 10 herbicide, which is the only broad-spectrum herbicide that effectively controls grasses and broadleaf weeds, and it has no known resistance in the U.S. broadacre crops.
