

# AGS 700 R2X SOYBEANS

## RM: 7.0

### POSITIONING

- Excellent nematode resistance without yield sacrifice
- Good defensive package
- Over-the-top options with Roundup Ready 2 Xtend®
- Determinate MG 7 produced exclusively for CNI

### PLANT & AGRONOMIC CHARACTERISTICS

Trait	Roundup 2 Xtend
Relative Maturity	7.0
Emergence	-
Lodging	-
Shatter Resistance	-
Plant Height	Med. - Tall
Plant Type	Medium Bush
Growth Habit	Determinate
Flower Color	Purple
Pubescence	Tawny
Pod Color	Tan
Hilum Color	Black
Chloride	Mixed

### DISEASE & PEST

Iron Deficiency Chlorosis	-
Phytophthora Race	None
Phytophthora Field Tolerance	Moderate
Brown Stem Rot	-
Sclerotinia White Mold	-
Sudden Death Syndrome (SDS)	7
Soybean Cyst Nematode	Good Tolerance
Frogeye Leaf Spot	9
Stem Canker	9
Root Knot Nematode:	Resistant
<i>Southern</i>	x
<i>Peanut</i>	x
<i>Javanese</i>	-

Rating Scale: 9 = Excellent, 1 = Poor  
 -Testing Currently Underway

Seed containing a patented trait can only be used to plant a single commercial crop from which seed cannot be saved and replanted. Examples of seed containing a patented trait include but are not limited to Genuity® Roundup Ready 2 Yield® soybeans, and Roundup Ready 2 Xtend® soybeans. Additional information and limitations on the use of these products are provided in the Monsanto Technology Stewardship Agreement, the Monsanto Technology Use Guide, and 2017 Roundup Ready 2 Xtend® Soybean Technology Use Guide Supplement. U.S. patents for Monsanto technologies can be found at the following webpage: <http://www.monsantotechnology.com>

**Monsanto Company is a member of Excellence Through Stewardship® (ETS).** Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Certain products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. **Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotechstatus.com/> for any updated information on import country approvals.** Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

**ALWAYS READ AND FOLLOW DIRECTIONS FOR USE ON PESTICIDE LABELING.** IT IS A VIOLATION OF FEDERAL AND STATE LAW to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. XTENDIMAX® HERBICIDE WITH VAPORGRIP® TECHNOLOGY AND IN CROP USES MAY NOT BE APPROVED IN ALL STATES. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans.

Roundup Ready 2 Xtend® soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your Monsanto dealer or refer to Monsanto's Technology Use Guide for recommended weed control programs. Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. Roundup Ready 2 Xtend®, Genuity®, Roundup Ready 2 Yield®, Roundup Ready PLUS®, Roundup®, Roundup Ready®, VaporGrip®, and XtendiMax® are trademarks of Monsanto Technology LLC.

## PATENTS AND ROUNDUP READY® SEEDS

# Think Before You Bin-Run Soybeans

## Do You Know the Rules Around Planting Roundup Ready® Soybeans Post Patent?

The U.S. patent on the original Roundup Ready soybean trait expired in 2015, and that means there are changes to what soybean seed products U.S. growers can legally save and plant. Did you know that even though the Roundup Ready soybean biotech trait patent has expired, most Roundup Ready seed in the United States may still be covered by other forms of intellectual property?

### Be informed. Ask before you plant.

Check with your local seed provider to see if the original Roundup Ready soybean products you harvested are eligible to be legally saved and planted in 2015 on your farm. If so, ask your dealer for a license that clarifies your rights to legally save and plant those soybeans.

Visit [WWW.SOYBEANS.COM](http://WWW.SOYBEANS.COM) for more information on the expiration of the original Roundup Ready soybean trait.

## Remember:

- Patents encourage innovation in new seed technology
- Genuity® Roundup Ready 2 Yield® soybeans are still patent protected and cannot be saved
- Soybean seeds may contain multiple forms of intellectual property, not just the trait patent
- Patented seed can only be used according to the permissions granted by the patent holder
- Germplasm may be patent protected. Please refer to your seed bags and bag tags for more information
- Replanting patented seed is illegal and an infringement of intellectual property rights
- People who actively encourage or induce growers to save and replant seed of patented traits may be liable for infringement

At this facility, samples of cleaned or conditioned seed batches may be retained or tested to identify the seed and/or provided to third parties upon request.

Monsanto receives hundreds of calls and letters nationwide each year about potential seed compliance matters. Anyone with concerns or questions can anonymously call 1-800-768-6387, option 2.

**Individual results may vary**, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

**ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.** Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity®, Monsanto® and Vine Design®, Roundup Ready 2 Yield®, Roundup Ready® and Roundup® are registered trademarks of Monsanto Technology LLC. All other trademarks are the property of their respective owners.
