

JNU GLACIER HWY IMPROVEMENTS (LEMON CREEK AREA)

OCTOBER 2021
CONSTRUCTION

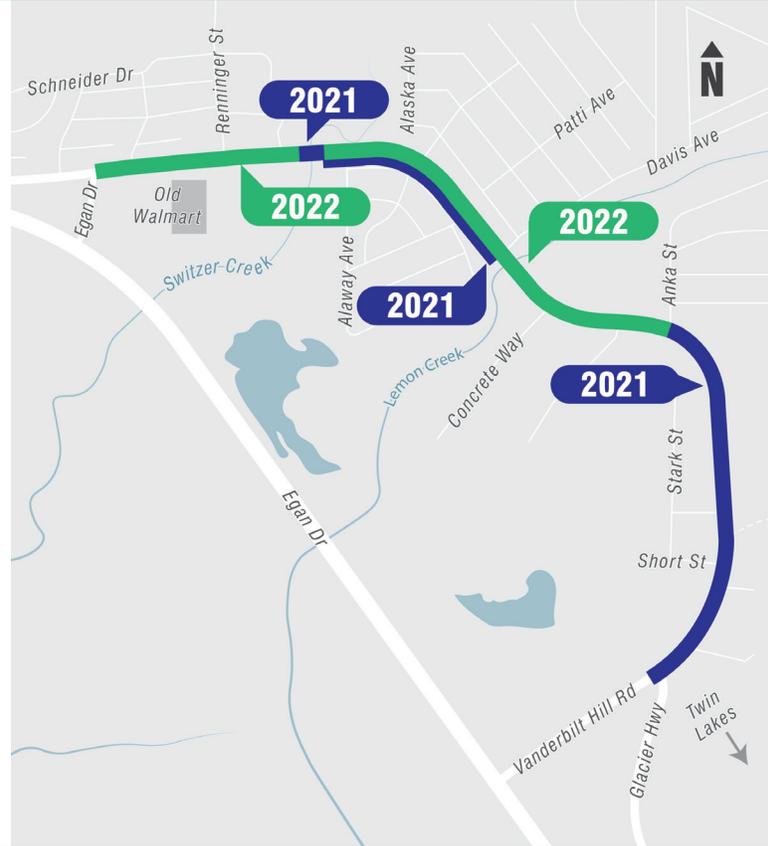

PROJECT DESCRIPTION

Throughout October, the project work zone between Alaway Avenue and Davis Avenue will be for storm drain installation. The project work zone between Glacier Highway and Anka Street will be for paving driveways and side street approaches, traffic markings, and cleanup. Motorists will see shoulder work, lane shifts, and flagging operations.

Please bear with us. Night work between the hours of 6 p.m. and 7 a.m. is anticipated for portions of the project to minimize traffic delays. Pedestrians and bicyclists will have sidewalk access through work areas or will be escorted around equipment.

The project is estimated to shut down at the end of October or mid-November, depending on weather. Spring start up of the 2022 road construction season is planned for April and is also weather dependent.

WORKZONE REMINDERS

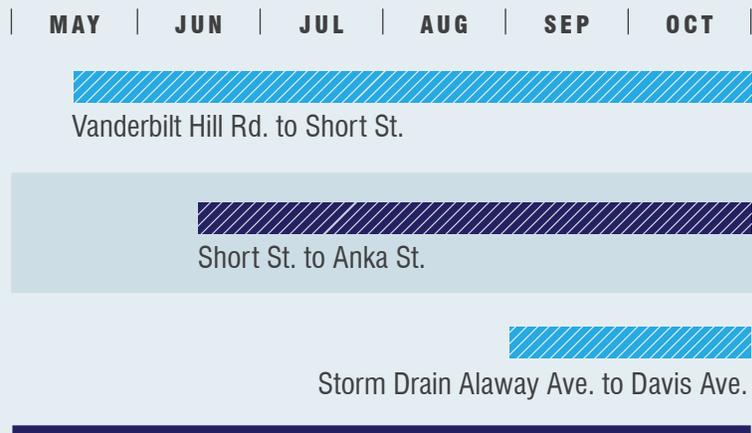

Motorists should expect slight delays in the flow of traffic. Pedestrians and bicyclists should look for sidewalk detours. The construction contractor, Secon, will work to accommodate all road users. Traffic conditions and the construction schedule will be updated regularly on the project website.

As a reminder: Please use caution when traveling in work zones. Watch for and follow direction from construction signs and flaggers when present throughout the construction zone.

Visit the project website for more details.

ESTIMATED SCHEDULE
