Positive Disruption

Innovation isn't always about creating new things. Sometimes it's about the value that comes from seizing an opportunity for improvement and change, what we call positive disruption. Jordan Dague is a technically curious optimist and innovator. Motivated by what others see as impossible, this guy will tell you that persistence and resilience are what push ideas and transform solutions. Jordan encourages clients to think differently when it comes to integrating, aggregating and re-using data.

Unity NXT® Regulatory Reporting

Powered by Synapse®, Unity NXT Regulatory Reporting enables clients to solve post-trade regulatory filing needs through one system, giving asset managers and servicers the answer to regulatory change.

Let your data work for you – not the other way around.

• Integrate, aggregate and re-use data
• Meet condensed 30-day Form N-PORT filing cycles
• Adapt quickly to ongoing regulatory change
• Significantly reduce time and cost of existing reporting

Contact us to learn how we can help put your organization on a path to positive disruption.
