Innovator Profile Series

The Visionary

Thomas Pfister

Vice President of Global Product Strategy

Regtech

Positive Disruption

Where the market took a single tactical approach to regulatory reporting, Tom distinguished between the noise of regulation and the real focus, data. Innovation is about rejecting pre-conceived notions and seeing things differently. Tom saw an opportunity for innovation and fundamentally changed the way asset managers and servicers integrate, aggregate and re-use data. He positively disrupted the way the fund world looks at regulatory reporting.

Unity NXT® Regulatory Reporting

Powered by Synapse™, Unity NXT Regulatory Reporting enables clients to solve post-trade regulatory filing needs through one system, giving asset managers and servicers the answer to regulatory change.

Let your data work for you – not the other way around.

- Integrate, aggregate and re-use data
- Meet condensed 30-day Form N-PORT filing cycles
- Adapt quickly to ongoing regulatory change
- Significantly reduce time and cost of existing reporting

Contact us to learn how we can help put your organization on a path to positive disruption.
