Upon the passage of the resolution and approval by the Mayor, as provided by law for resolutions, the City Clerk shall cause the transfers to be set out in full in the minutes and be included in the published proceedings of the City Council. Thereupon the Clerk, and where applicable, the City Treasurer, shall cause the appropriation to be revised upon the appropriation expenditure ledgers of the City, but in no case shall the total of the appropriation of a program be increased except for transfers from the contingency account nor shall the total appropriation for all purposes be increased except by a budget amendment made after notice and hearing as required by law for such amendments.

The Clerk shall then determine the availability of an appropriation sufficient to pay for such a purchase. A purchase may be made only if there is an appropriation sufficient for the purchase and for other anticipated or budgeted purposes. If no adequate appropriation is available for the expenditure contemplated, the Clerk shall not allow a purchase until a budget amendment to transfer of appropriation is made in accordance with power delegated by City Council and within the limits set by law and the City Council. 5-2-4 BUILDING SEWERS AND CONNECTIONS.

1. No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the Superintendent.

Before excavating for plumbing in any public street, way or alley, the person excavating shall have executed unto the City of Latimer and deposited with the City Clerk a corporate surety in the sum of five thousand dollars (\$5,000.00) conditioned that the applicant will perform faithfully all work with due care and skill, and in accordance with the laws, rules and regulations established under the authority of any Ordinances of the City of Latimer pertaining to plumbing. This bond shall state that the person will indemnify and save harmless the City of Latimer and the owner of the premises against all damages, costs, expenses, outlay and claims of every nature and kind arising out of unskillfulness or negligence on the applicant's part in connection with plumbing or excavating for plumbing as prescribed in this Ordinance. Such bond shall remain in force and must be executed for a period of two (2) years except that on such expiration it shall remain in force as to all penalties, claims and demands that may have accrued thereunder prior to such expiration.

2. All cost and expense incident to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

3. A separate and independent building sewer shall be provided for every building, except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, courtyard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.

4. Old building sewers may be used in connection with new building sewers only when they are found, upon examination and testing by the Superintendent, to meet all requirements of this Ordinance. The Superintendent may require that the old sewer be excavated for the purpose of facilitating inspection. No old cesspool or septic tank shall be connected to any portion of a building sewer that is also connected to the public sewer. Cesspools and septic tanks shall be located, and drained in a manner approved by the Superintendent and removed or filled with sand, crushed rock or any other solid material approved by the Superintendent, except as exempted by the Superintendent.

5. The building sewer shall be constructed in accordance with applicable portions of the last published (State Plumbing Code of Iowa), applicable specifications of the American Society for Testing and Materials (ASTM) and applicable portions of the Water Pollution Control Federation (WPCF) Manual of Practice No. 9.”

a. Each connection to the public sewer shall be made to the fittings designated for that property. If a fitting in the public sewer is not available for the designated property, the connection shall then be made under the direct supervision of the Superintendent. Connections to the public sewer not made to an existing wye or tee shall be made by a hole cutter or careful chisel cutting. The connection shall be rendered water and gas tight, by use of rubber gaskets. The building sewer shall not protrude into the public sewer.

b. All building sewers shall be constructed of the following materials conforming to the indicated standards:

Vitrified Clay Pipe VCP

(1) Pipe and Fittings - ASTM C-700 “Standard Specification or Vitrified Clay Pipe, Extra Strength, Standard Strength and Perforated.”

e. All excavation shall be open trench work unless authorized by the Superintendent. The foundation in the trench shall be formed to prevent any subsequent settlement of the pipes. If the foundation is good firm earth, the earth shall be pared or molded to give a full support to the lower quadrant of each pipe. Bell holes shall be dug. Where the floor of the trench is of hard or rocky material, the trench shall be excavated to four inches below the pipe and brought back to the proper grade with gravel, coarse sand or similar material so as to provide a firm foundation and uniform support for the building sewer line. Backfilling shall be placed in layers and solidly tamped or packed up to two feet above the pipe. Back-filling shall not be done until final inspection is made by the Superintendent. Building sewers shall be laid straight at uniform grade between connections or fittings.

f. Cleanouts shall be provided for each change in direction or grade if the change exceeds 45 degrees and at least every 100 feet.

6. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. The depth shall be sufficient to afford protection from frost. All excavations required for the installation of a building sewer shall be open trench work unless otherwise approved by the said Superintendent. Pipe laying and backfill shall be performed in accordance with A.S.T.M. Specification (Designation C12). No backfill shall be placed until the work has been inspected by the Superintendent or the Superintendent's representative. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

7. No person shall make connection of roof downspouts, exterior foundation drains, areaway drains, or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer.

8. The connection of the building sewer into the public sewer shall conform to the requirements of the Plumbing Code or other applicable rules and regulations of the City, or the procedures set forth in appropriate specifications of the A.S.T.M. and the W.P.C.F. Manual of Practice No. 9. All such connections shall be made gastight and watertight. Any deviation from the prescribed procedures and materials must be approved by the Superintendent before installation.

9. Each and every part of the building sewer shall be inspected and approved by the Superintendent before being concealed or back-filled. The applicant for the building sewer permit shall notify the Superintendent when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made under the supervision of the Superintendent or the Superintendent's representative.

10. All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the City.

11. The City shall, in no event, be held responsible for claims made against it by reason of the breaking of any mains or service pipes, or by reason of any other interruption of the service caused by the breaking of machinery or stoppage for necessary repairs; and no person shall be entitled to damages nor have any portion of a payment refunded for any interruption.

12. The premises receiving sanitary sewer service, shall at all reasonable hours, be subject to inspection by duly authorized personnel of the City.

13. The Owner of the property served by a building sewer shall be responsible for the operation, maintenance, repair, blockage, surface replacement, and any damage resulting from operation, maintenance repair and blockage of said building sewer, from the point of connection with the building drain to the Public Sewer.

5-2-5 USE OF THE PUBLIC SEWERS.

1. No person shall discharge or cause to be discharged any stormwater, surface water, groundwater, roof runoff, subsurface drainage, including interior and exterior foundation drains, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer. Applications may be cancelled and/or sewer service discontinued by the City for any violation of any rule, regulation or condition of service, and especially for any of the following reasons:

a. Misrepresented in the application as to the property or fixtures to be serviced by the sanitary sewer system.

b. Non-payment of bills.

c. Improper or imperfect service pipes and fixtures, or failure to keep same in suitable state of repair.

2. Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process waters may be discharged, on approval of the Superintendent, to a storm sewer, combined sewer, or natural outlet.

3. No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

a. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.

b. Any waters or wastes containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to cyanides in excess of two (2) mg/l as CN in the wastes as discharged to the public sewer.

c. Any waters or wastes having a pH lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.

d. Solid or viscous substances in quantities of such size capable of causing obstruction to the flow of sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

e. Any water or wastes having (1) a 5-day bio-chemical oxygen demand greater than 300 parts per million by weight, or (2) containing more than 350 parts per million by weight, or suspended solids, or (3) having an average daily flow greater than 2 percent of the average sewage flow of the City, shall be subject to the review of the Superintendent. Where necessary in the opinion of the Superintendent, the owner shall provide at the owner's expense, such preliminary treatment as may be necessary to (1) reduce the biochemical oxygen demand to 300 parts per million by weight, or (2) reduce the suspended solids to 350 parts per million by weight, or (3) control the quantities and rates of discharge of such waters or wastes. Plans, specifications, and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the Superintendent and no construction of such facilities shall be commenced until said approvals are obtained in writing.

4. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming an opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances prohibited are:

a. Any liquid or vapor having a temperature higher than one hundred fifty (150) F (65 C).

b. Any water or wastes containing fats, wax, grease or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty (150 F) (0 and 65 C).

c. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourths (3/4) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Superintendent.

d. Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solutions whether neutralized or not.

e. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances, or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.

f. Any waters or wastes containing phenols or other taste-or-odor-producing substances, -in such concentrations exceeding limits which may be established by the Superintendent as necessary after treatment of the composite sewage, to meet with requirements of the State, Federal, or other public agencies with jurisdiction for such discharge to the receiving waters.

g. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.

h. Any waters or wastes having a pH in excess of 9.5.

i. Materials which exert or cause:

(1) Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).

(2) Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).

(3) Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.

(4) Unusual volume of flow or concentration of waters constituting “slugs” as defined herein.

j. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

5. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in 5-2-5(4), and which in the judgment of the Superintendent, may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

a. Reject the wastes,

b. Require pretreatment to an acceptable condition for discharge to the public sewers.

c. Require control over the quantities and rates of discharge, and/or

d. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provision of 5-2-5(10) of this article.

If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Superintendent, and subject to the requirements of all applicable codes, Ordinances, and laws.

6. Grease, oil, and sand interceptors shall be provided when, in the opinion of the Superintendent, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Superintendent, and shall be located as to be readily and easily accessible for cleaning and inspection.

7. Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at the owner's expense.

8. When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be installed by the owner at the owner's expense, and shall be maintained by the owner so as to be safe and accessible at all times.

9. All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this Ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24 hour composite of all outfalls where pH's are determined from periodic grab samples).

10. No statement contained in this article shall be construed as preventing any special agreement or arrangement between the City and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the City for treatment, subject to payment, therefore, by the industrial concern.

5-2-6 PROTECTION FROM DAMAGE.

1. No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the sewage works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

(Code of Iowa, Sec. 716.1)

5-2-7 POWERS AND AUTHORITY TO INSPECTORS.

1. The Superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all properties for the purpose of inspection, observation, measurement, sampling, and testing in accordance with the provisions of this Ordinance. The Superintendent or the Superintendent's representatives shall have no authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper, or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or waterways or facilities for waste treatment.

2. While performing the necessary work on private properties referred to in 5-2-7(1), the Superintendent or duly authorized employees of the City shall observe all safety rules applicable to the premises established by the company and the company shall be held harmless for injury or death to the City employees and the City shall indemnify the company against loss or damage to its property by the City employees and against liability claims and demands for personal injury or property damage asserted against the company and growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions as required in Section 5-2-5(8).

3. The Superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all private properties through which the City holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

5-2-8 PENALTIES.

1. Any person found to be violating any provision of this Ordinance except Section 5-2-6 shall be served by the City with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

2 Any person violating any of the provisions of this Ordinance is liable to the City for any expense, loss, or damage occasioned the City by reason of such violations.

5-3-1 ENFORCEMENT. The Superintendent of public utilities shall supervise the installation of water service pipes and their connections to the water main and enforce all regulations pertaining to water services in this City in accordance with this chapter. This chapter shall apply to all replacements of existing service pipes as well as to new ones. The City Council shall make such rules, not in conflict with the provisions of this chapter, as needed for the detailed operation of the waterworks. In the event of an emergency the Superintendent may make temporary rules for the protection of the system until due consideration by the City Council may be had.

(Code of Iowa, Sec. 372.13(4))

5-3-2 ADOPTION OF STATE PLUMBING CODE. The installation of any water-service pipe and any connection with the municipal water system shall comply with all pertinent and applicable provisions, whether regulatory, procedural or enforcement provisions, of the State Plumbing Code as amended and as published by the Iowa Department of Public Health, which is hereby adopted. An official copy of the State Plumbing Code as adopted and a certified copy of this Ordinance are on file in the office of the City Clerk for public inspection.

5-3-3 APPROVAL REQUIRED. All installation of water service pipes and connections to the municipal water system shall be made by a plumber approved by this City. The Superintendent shall have the power to suspend the approval of any plumber for violation of any of the provisions of this Ordinance. A suspension, unless revoked, shall continue until the next regular meeting of the City Council. The Superintendent shall notify the plumber immediately by personal written notice of the suspension, the reasons for the suspension, and the time and place of the City Council meeting at which the plumber will be granted a hearing. At this City Council meeting the Superintendent shall make a written report to the City Council stating the Superintendent's reasons for the suspension, and the City Council, after fair hearing, shall revoke the suspension or take any further action that is necessary and proper.

5-3-4 MANDATORY CONNECTIONS. All residences and business establishments within the City limits intended or used for human habitation, occupancy or use shall be connected to the public water supply if it is reasonably available and if the building is not furnished with pure and wholesome water from some other source.

All connections to the City water system are required to have meters which read in gallons installed. A reader must also be installed on the exterior of the structure accessible to city personnel which is clearly legible.

5-3-5 WATER SUPPLY CONTROL. The plumber who makes the connection to the municipal water system shall install a main shut-off valve of the inverted key type on the water-service pipe near the curb with a suitable lock of a pattern approved by the Superintendent. The shut-off valve shall be covered with a heavy metal cover having the letter "W" marked thereon, visible and even with the pavement or ground.

The plumber also shall install a shut-off valve and waste cock on every service pipe inside the building near the entrance of the water-service pipe into the building; this must be located so that the water can be shut off conveniently and the pipes drained. Where one service pipe is installed to supply more than one customer, there shall be separate shut-off valves inside the building for each customer so that service to one customer can be shut off without interfering with service to the others.

5-3-6 MAKING THE CONNECTION. Any connection with the municipal water system must be made under the direct supervision of the Superintendent or the Superintendent's authorized assistant. All taps in the water main must be at least (12) inches apart and on the side and near the top and not in any case within 18 inches of the hub.

(Code of Iowa, Sec. 372.13(4))

5-3-7 EXCAVATIONS. Excavations to do work under this Ordinance shall be dug so as to occasion the least possible inconvenience to the public and to provide for the passage of water along the gutter. All such excavations shall have proper barricades at all times, and warning lights placed from one-half hour before sunset to one-half hour after sunrise. In refilling the excavation the earth must be laid in layers and each layer tamped thoroughly to prevent settlement, and this work, and any street, sidewalk, pavement or other public property that is affected, must be restored to as good a condition as it was previous to the excavation. The plumber must maintain the affected area in good repair to the satisfaction of the City Council for three months after refilling. All water service pipes must be laid so as to prevent rupture by settlement or freezing. No excavation shall be made within six (6) feet of any laid water or sewer pipe while the ground is frozen, and no water or sewer pipe shall be exposed to frost, except by special written permission of the Superintendent.

5-3-8 INSPECTION AND APPROVAL. All water-service pipes and their connections to the municipal water system must be inspected and approved in writing by the Superintendent before they are covered, and the Superintendent shall keep a record of such approvals. If the Superintendent refuses to approve the work, the plumber or owner must proceed immediately to correct the work so that it will meet with the Superintendent's approval. Every person who uses or intends to use the municipal water system shall permit the Superintendent or the Superintendent's authorized assistants to enter the premises to inspect and make necessary alterations or repairs at all reasonable hours and on proof of authority.

5-9-3 CLEANING SNOW, ICE, AND ACCUMULATIONS. It shall be the duty of the owner to keep sidewalks abutting the owner's property clear of the natural accumulations of snow or ice. The Mayor shall give the Council an itemized and verified statement of the removal costs and a legal description of the property at the next regular Council meeting. The costs shall be reviewed by the Council, and if found correct, shall be assessed against the property as taxes. The City Clerk shall be directed to certify the costs to the County Treasurer for collection as provided in Section 364.12 of the Code of Iowa.

(Code of Iowa, Sec. 364.12(2b) and (2e))

The City may maintain an action against the person notified to recover the amount of the judgment together with all the expenses incurred by the City in the suit.

If, after the expiration of the thirty (30) days as provided in the notice, the required work has not been done or is not in the process of completion, the Mayor shall order the work to proceed to repair, replace, or reconstruct the sidewalk. Upon completion of the work, the Mayor shall submit to the Council an itemized and verified statement of expenditures for material and labor, and the legal description of the property abutting the sidewalk on which work has been performed. These costs shall be assessed to the property as taxes. The City Clerk shall be directed to certify the costs to the County Treasurer for collection as provided in Section 364.12 of the Code of Iowa. (Code of Iowa, Sec. 364.12(e))

5-9-8 NOTICE OF INABILITY TO REPAIR OR BARRICADE. It shall be the duty of the owner of the property abutting the sidewalk, or of the contractor or agent of the owner, to notify the City immediately in the event the owner is unable to make necessary sidewalk improvements or to install or erect warnings and barricades as required by this chapter.

5-9-9 STANDARD SIDEWALK SPECIFICATIONS. Sidewalks constructed, repaired, or replaced under the provisions of this chapter shall be of the following construction and meet the following standards:

1. Portland cement concrete shall be the only material used in the construction and repair of sidewalks unless otherwise authorized by the City Council.
2. Sidewalks shall be on one-course construction.
3. Concrete may be placed directly on compact and well-drained soil. Where soil is not well drained, a four (4) inch sub-base of compact, clean, coarse gravel, sand, or cinders shall be laid. The adequacy of the soil drainage is to be determined by the Superintendent of Public Works.

Each curb cut or ramp shall be at least thirty (30) inches wide, shall be sloped at not greater than one inch of rise per twelve (12) inches lineal distance, except that a slope no greater than one inch of rise per eight (8) inches lineal distance may be used where necessary, shall have a nonskid surface, and shall otherwise be so constructed as to allow reasonable access to the crosswalk for physically disabled persons using the sidewalk.

(Code of Iowa, Sec. 216C.9)

11. All sidewalk improvements on public property, whether performed by the owner of the abutting property or by the City, shall be performed under the supervision and inspection of the City Superintendent of Public Works, and in accordance with the standard sidewalk specifications set forth in this chapter.

The permit shall state that the person will comply with the Ordinances of the City and with the specifications for sidewalks adopted by the City. The permit also shall state that the work will be done under the direction and approval of the City Superintendent of Public Works. All such permits shall be issued without charge and a copy thereof, with the application, shall be filed and preserved in the office of the City Clerk. The permit shall state when the work is to be commenced and when the work is to be completed. The time of completion for the sidewalk improvements may be extended by the City Council. All permits for sidewalk improvements not ordered by resolution of the City Council shall be issued in compliance with this chapter. The City Council may withhold the issuance of any permit for any sidewalk improvements for a sufficient period to determine the necessity for the proposed improvements or when weather conditions will adversely affect the sidewalk improvements.

5-9-11 FAILURE TO OBTAIN PERMIT; REMEDIES. Whenever any sidewalk improvements are made that do not conform to the provisions of this chapter and with the specifications, or when any sidewalk improvements are made without a permit, the Mayor shall serve notice to obtain a permit upon the property owner and upon the contractor doing the work. If the sidewalk is in the course of construction, the notice shall order the work to stop until a permit is obtained and the work is corrected to comply with the specifications. If the sidewalk work has been completed, the owner shall obtain a permit immediately and perform any needed corrections within five (5) days from receipt of the permit. If the owner fails to comply with this notice, the Mayor shall have the work completed and the costs assessed to the property owner as provided in this chapter.

5-9-12 INSPECTION AND APPROVAL. Upon final completion, the Superintendent of Public Works shall inspect the work and may order corrections if the work does not meet specifications. When the work does meet all requirements of this chapter, the specifications, and the permit, the Superintendent of Public Works shall indicate this on both copies of the permit.

5-9-13 BARRICADES AND WARNING LIGHTS. Proper warning lights and barricades shall be placed to protect persons from materials, equipment, and dangerous conditions. Placement and maintenance of adequate warnings is the responsibility of the constructor, the owner, and the lessee of the property.

5-9-14 INTERFERENCE WITH SIDEWALK IMPROVEMENTS. No person shall knowingly or willfully drive any vehicle upon any portion of any sidewalk or approach thereto while it is in the process of being improved, or upon any portion of any completed sidewalk or approach thereto, or shall remove or destroy any part or all of any sidewalk or approach thereto, or shall remove, destroy, mar, or deface any sidewalk at any time or destroy, mar, remove, or deface any notice or warning device provided by this chapter.

5-9-15 SPECIAL ASSESSMENTS FOR CONSTRUCTION AND REPAIR. The City Council may assess the cost of initial construction, improvements, and/or repair of sidewalks in the City according to the special assessment procedures established in Chapter 384, division IV, Code of Iowa.

(Code of Iowa, Sec. 384.38)

5-9-16 NOTICE OF ASSESSMENT FOR REPAIR OR CLEANING COSTS. When the Mayor submits a bill for sidewalk improvements or for removal of accumulations as provided in this chapter, the City Clerk shall send a notice of such facts to the owner of the abutting property. The notice may be given either by personal service or by certified mail to the last known address of the owner. The notice shall contain a statement of the work performed, the cost of the work that is being assessed, a description of the property affected, and the fact that the person may pay the amount assessed within thirty (30) days without interest or penalty. The notice also shall indicate that the person may object to such assessment and given the place and time at which Council will hear such objections. The time set for hearing shall be at least fifteen (15) days after the service or mailing of the notice. (Code of Iowa, Sec. 384.50)

5-9-17 HEARING AND ASSESSMENT. At the time and place designed in the Notice, the Council shall consider all objections to the assessment, correct all errors or omissions, and adopt a corrected list as the amounts to be assessed against the property. (Code of Iowa, Sec. 384.51)

5-9-18 BILLING AND CERTIFYING TO COUNTY. Thirty (30) days after the Council's decision, the City Clerk shall certify any unpaid amounts to the County Treasurer. The unpaid assessments shall constitute a lien against the property and shall be collected by the County Treasurer in the same manner as other taxes. Any assessment that exceeds \$100 may be paid in installments as set by Council, not exceeding ten, in the same manner and at the same interest rates as for special assessments under Chapter 384, division IV, Code of Iowa. No interest shall be charged for assessments, or parts thereof, paid within thirty (30) days of the time the Council determined the final amounts.

(Code of Iowa, Sec. 384.60)

5-9-19 ADAAG COMPLIANCE. All construction, repair, and maintenance of sidewalks shall comply with Americans with Disabilities Guidelines (ADAAG).

3. "Garbage" Shall mean the solid or semi-solid animal and vegetable waste resulting from the handling, preparation, cooling and serving foods, including cans, bottles, and cartons in which it was received and wrappings in which it may be placed for disposal.
4. "Solid Waste" Shall mean unwanted or discarded materials resulting from commercial, industrial, domestic and agricultural operations and normal community activities. Wastes which are solid or semi-solid containing insufficient liquid to be free-flowing are considered to be solid wastes; and include in part the following, garbage, rubbish, ashes, and other residue of incineration, street refuse or sweepings, dead animals, solid animal waste, abandoned automobiles, agricultural, commercial and industrial wastes, construction and demolition wastes; sewage treatment solid residue.

5-10-2 DESIGNATED PUBLIC DISPOSAL SITES. By virtue of agreement dated June 24, 1994, between the City and the Agency, the sanitary landfill sites now and hereafter operated by the Agency are hereby designated as the public disposal sites for all garbage and refuse collected within the corporate limits of the City.

5-10-3 RULES AND REGULATIONS. The rules and regulations governing the use of the sanitary landfill sites shall be as determined by the Agency to be in the best interests of the general public.

1. The landfill sites shall normally be open to the public on such days and hours as the Agency may designate; however, the Agency may alter the days and hours so scheduled to satisfy unusual conditions or emergencies.

2. The Agency shall be responsible for the operation of the landfill sites in a manner which will assure sanitary and safe conditions at all times.

3. The operation of the landfill sites shall comply with all regulations of all local, County, State, County or Federal Agencies, which may have jurisdiction over such operation.

5-10-4 PERMITTED AREAS OF DISPOSAL. No person, firm or corporation shall permanently dispose of solid waste of any kind upon any land within the corporation limits of the City unless such land has been designated by the Agency as a public landfill site; provided, however, that the prohibition contained in this paragraph shall not apply to the deposit of inert wastes, not potentially injurious to health or the public welfare where permission to make such a deposit has been obtained from the Owner or responsible agent, nor to the filling in or grading or property with earth, mud, ashes, or similar materials; providing all other applicable local and state laws have been complied with.

5-10-5 POSTED INSTRUCTIONS. No person, firm or corporation shall deposit any solid waste at any Agency landfill site, except in compliance with posted instructions or instructions of an attendant in charge.

5-10-6 EXCLUDED MATERIALS. Certain materials may be excluded from those refuse materials, which may be deposited at an Agency landfill site. These excluded materials may include junk automobile bodies and similar bulky objects, which may require special processing prior to disposal; trees and tree limbs, unless they have been cut into pieces not exceeding ten feet in length; burning materials or materials containing hot or live coals; hazardous materials; and other materials which the Agency deems necessary to exclude. 5-10-7 PAYMENT TO LANDFILL. It shall be unlawful for any person, firm or corporation other than the Agency or a City on its behalf to receive payment of any kind or request payment of any kind for the disposal of any solid waste at any sanitary landfill site within the City. The charging of a fee for the collection of any garbage or other solid waste from a customer by a private refuse collector, shall not be construed as a violation of this Section since the disposal is considered to be incidental to the total collection and disposal service, provided however, such collection and disposal shall be conducted entirely by forces with equipment owned or operated by the private refuse collector.

CHAPTER 2 FLOODPLAIN ORDINANCE

6-2-1	Statutory Authority, Finding of Fact and Purpose	6-2-5	Nonconforming Uses
6-2-2	General Provisions	6-2-6	Penalties for Violation
6-2-3	Floodplain Management Standards	6-2-7	Amendments

6-2-1 STATUTORY AUTHORITY, FINDINGS OF FACT AND PURPOSE

1. The Legislature of the State of Iowa has in Chapter 364, Code of Iowa, as amended, delegated the power to cities to exercise any power and perform any function it deems appropriate to protect and preserve the rights, privileges and property of the City or of its residents, and to preserve and improve the peace, safety, health, welfare, comfort and convenience of its residents.

2. Findings of Fact

a. The Flood Hazard areas of the City of Latimer are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base all of which adversely affect the public health, safety and general welfare of the community

b. These flood losses, hazards, and related adverse effects are caused by: (i) The occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding and (ii) the cumulative effect of obstructions on the floodplain causing increases in flood heights and velocities.

3. Statement of Purpose. It is the purpose of this Ordinance to protect and preserve the rights, privileges and property of the City of Latimer and its residents and to preserve and improve the peace, safety, health, welfare and comfort and convenience of its residents by minimizing those flood losses described in (Section I(B)(I)) of this Ordinance with provisions designed to:

a. Restrict or prohibit uses which are dangerous to health, safety, or property in times of flood or which cause excessive increases in flood heights or velocities.

b. Require that uses vulnerable to floods, including public facilities which serve such uses to be protected against flood damage at the time of initial construction or substantial improvements.

c. Protect individuals from buying lands which may not be suited for intended purposes because of flood hazard.

d. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.

6-2-2 GENERAL PROVISIONS

1. Lands to Which Ordinance Apply. The provisions of this Ordinance shall apply to all areas having special flood hazards within the jurisdiction of the City of Latimer. When an interpretation is needed as to the exact location of a boundary, the Mayor of Latimer shall make the necessary interpretation. The City Council shall hear and decide appeals when it is alleged that there is an error in any requirement, decision, or determination made by the Mayor in the enforcement or administration

3. Compliance. No structure or land shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this Ordinance and other applicable regulations which apply to uses within the jurisdiction of this Ordinance.

4. Abrogation and Greater Restrictions. It is not intended by this Ordinance to repeal, abrogate, or impair any existing easements, covenants, or deed restrictions. However, where this Ordinance imposes greater restrictions, the provision of this Ordinance shall prevail. All other ordinances inconsistent with this Ordinance are hereby repealed to the extent of the inconsistency only.

5. Interpretation. In the interpretation and application, the provisions of this Ordinance shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by State statutes.

6. Warning and Disclaimer of Liability. The standards required by this ordinance are considered reasonable for regulatory purposes. This ordinance does not imply that areas outside of the designated special flood hazard areas will be free from flooding or flood damages. This Ordinance shall not create liability on the part of the City of Latimer or any officer or employee thereof for any flood damages that result from reliance on this Ordinance or any administrative decision lawfully made there under.

7. Severability. If any section, clause, provision or portion of this Ordinance is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this Ordinance shall not be affected thereby.

6-2-3 FLOODPLAIN MANAGEMENT STANDARDS.

All uses must be consistent with the need to minimize flood damage and meet the following applicable performance standards. Where 100-year flood data has not been provided on the Flood Insurance Rate Map, the Iowa Department of Natural Resources shall be contacted to compute such data. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.

Alternative methods of elevating (such as piers) may be allowed subject to favorable consideration by the City Council, where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding.

All new residential structures shall be provided with a means of access which will be passable by wheeled vehicles during the 100-year flood.

3. Non-residential buildings-All new or substantially improved non-residential building shall have the lowest floor(including basement) elevated a minimum of one (1) foot above the 100-year flood level; and that the structure, below the 100-foot flood level is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum 1988) to which any structures are flood proofed shall be maintained by the Administrator.

4. All new and substantially improved structures:
 - a. Fully enclosed areas below the “lowest floor” (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing the entry and exit of floodwaters. Designs for meeting this requirement must be either be certified by a registered professional engineer or meet or exceed the following minimum criteria:

(1) A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.

(2) The bottom of all openings shall be no higher than one foot above grade.

(3) Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of flood waters.

Such areas shall be used solely for parking of vehicles, building access and low damage potential storage.

b. New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.

c. New and substantially improved structures must be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

5. Factory Built Homes:

a. All factory-built homes, including those placed in existing factory-built home parks or subdivisions shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one (1) foot above the 100-year flood level.

b. All factory-built homes, including those placed in existing factory-built home parks or subdivisions shall be anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors.

6. Utility and Sanitary Systems:

a. On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.

b. All new and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system as well as the discharge of effluent into flood waters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one (1) foot above the 100-year flood elevation.

c. New or replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system. Water supply treatment facilities (other than on-site systems) shall be provided with a level of protection equal to or greater than one (1) foot above the 100-year flood elevation.

d. Utilities such as gas or electrical systems shall be located and construed to minimize or eliminate flood damage to the system and the risk associated with such flood damaged or impaired systems.

7. Storage of materials and equipment that are flammable, explosive or injurious to human, animal or plant life is prohibited unless elevated a minimum of (1) foot above the 100-year flood level. Other material and equipment must either be similarly elevated or (i) not be subject to major flood damage and be anchored to prevent movement due to flood waters, or (ii) be readily removable from the area within the time available after flood warning.

8. Flood control structural works such as levees, flood walls, etc. shall provide, at a minimum, protection from a 100-year flood with a minimum of 3 ft. of design freeboard and shall provide for adequate interior drainage. In addition, the Department of Natural Resources shall approve structural flood control works.

9. Watercourse alterations or relocations must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, the Department of Natural Resources must approve such alterations or relocations.

10. Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installations of public utilities) shall meet the applicable performance standards of this Ordinance.

Subdivision proposals intended for residential use shall provide all lots with a means of access which will be passable by wheeled vehicles during the 100-year flood. Proposals for subdivisions greater than five (5) acres or fifty (50) lots (whichever is less) shall include 100-year flood elevation data for those areas located within the Special Flood Hazard area.

11. Accessory Structures

a. Detached garages, sheds, and similar structures accessory to a residential use are exempt from the 100-year flood elevation requirements where the following criteria are satisfied.

(1) The structure shall not be used for human habitation.

(2) The structure shall be designed to have low flood damage potential.

(3) The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.

(4) The structure shall be firmly anchored to prevent flotation which may result in damage to other structures

(5) The structure's service facilities such as electrical and heating equipment shall be elevated or flood proofed to at least one foot above the 100-year flood level.

b. Exemption from the 100-year flood elevation requirements for such a structure shall be elevated or flood proofed to at least one foot above the 100-year flood level.

12. Recreational Vehicles

a. Recreational vehicles are exempt from the requirements of 6-2-3(5) of this Ordinance regarding anchoring and elevation of factory-built homes when the following criteria are satisfied:

(1) The recreational vehicle shall be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system and is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.

(2) Recreational vehicles that are located on the site for more than 180 consecutive days or are not ready for highway use must satisfy requirements of 6-2-3(5) of this Ordinance regarding anchoring and elevation of factory-built homes.

13. Pipeline river and stream crossing shall be buried in the streambed and banks, or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering.

6-2-4 ADMINISTRATION

1. Appointment, Duties, and responsibilities of Floodplain Administrator

a. The Mayor is hereby appointed to implement and administer the provisions of this Ordinance and will hereby be referred to as the Administrator.

b. Duties of the Administrator will include, but not necessarily be limited to the following:

(1) Review all floodplain development permit applications to assure that the provisions of this Ordinance will be satisfied.

(2) Review floodplain development applications to assure that all necessary permits have been obtained from federal, state and local governmental agencies including approval when required from the Department of Natural Resources for floodplain construction.

(3) Record and maintain a record of the elevation (in relation to North American Vertical Datum 1988) of the lowest floor (including basement) of all new or substantially improved structures in the special flood hazard area.

(4) Record and maintain a record of the elevation (in relation to North American Vertical Datum 1988) to which all new or substantially improved structures have been flood proofed.

(5) Notify adjacent communities/counties and the Department of Natural Resources prior to any proposed alteration or relocation of a watercourse and submit evidence of such notifications as to the Federal Emergency Management Agency.

(6) Keep a record of all permits, appeals and such other transactions and correspondence pertaining to the administration of this Ordinance.

2. Floodplain Development Permit.

a. Permit Required – A Flood Development issued by the Administrator shall be secured prior to any floodplain development (any man-made change to improved and unimproved real estate, including but not limited to buildings or other structures, mining, filling, grading, paving, excavation or drilling operations), including the placement of factory-built homes.

b. Application for Permit. Application shall be made on forms furnished by the Administrator and shall include the following:

(1) Description of the work to be covered by the permit for which application is to be made.

(2) Description of the land on which the proposed work is to be done (i.e., lot, block, track, street address or similar description) that will readily identify and locate the work to be done.

(3) Indication of the use or occupancy for which the proposed work is intended.

(4) Elevation of the 100-year flood.

(5) Elevation (in relation to North American Vertical Datum 1988) of the lowest floor (including basement) of buildings or of the level to which a building is to be flood proofed.

(6) For buildings being improved or rebuild, the estimated cost of improvements and market value of the building prior to the improvements.

(7) Such other information as the Administrator deems reasonably necessary (e.g., permit drawing or a site plan) for the purpose of this Ordinance.

c. Action on Permit Application – The Administrator shall, within a reasonable time, make a determination as to whether the proposed floodplain development meets the applicable standards of this Ordinance and shall approve or disapprove the application. For disapprovals, the applicant shall be informed, in writing, of the specific reasons therefore. The Administrator shall not issue permits for variances except as directed by the City Council.

d. Construction and Use to be as Proved in Application and Plans – Floodplain Development Permits based on the basis of approved plans and applications authorize only the use, arrangement, and construction set forth in such approved plans and applications and no other use, arrangement or construction. Any use, arrangement, or construction at variance with that authorized shall be deemed a violation of this Ordinance. The applicant shall be required to submit certification by a professional engineer or land surveyor, as appropriate registered in the State of Iowa, that the finished fill, building floor elevations, Floodproofing, or other flood protection measures were accomplished in compliance with the provisions of this Ordinance, prior to the use of occupancy of any structure.

3. Variance

a. The City Council may authorize upon request in specific cases such variances from the terms of this Ordinance that will not be contrary to the public interest, where, owing to special conditions, a literal enforcement of the provisions of this Ordinance will result in unnecessary hardship. Variances granted must meet the following applicable standards.

(1) variances shall only be granted upon: (i) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (iii) a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes of ordinances.

(2) Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(3) In cases where the variance involves a lower level of flood protection for buildings than what is ordinarily required by this Ordinance, the applicant shall be notified in writing over the signature of the Administrator that: (i) the issuance of a variance will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction increases risks to life and property.

b. Factors Upon Which the Decision of the Council Shall be Based – In passing upon applications for Variances, the Council shall consider all relevant factors specified in other sections for this Ordinance and :

(1) The danger to life and property due to increased flood heights or velocities caused by encroachments.

(2) The danger of materials may be swept on to other land or downstream to the injury of others.

(3) The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.

(4) The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.

(5) The importance of the services provided by the proposed facility to the City.

(6) The requirements of the facility for a floodplain location.

(7) The availability of alternative locations not subject to flooding for the proposed use.

(8) The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.

(9) The relationship of the proposed use to the comprehensive plan and floodplain management program for the area.

(10) The safety of access to the property in times of flood for ordinary and emergency vehicles

(11) The expected heights, velocity, duration, rate of rise and sediment transport of the flood water expected at the site.

(12) The cost of providing governmental services during and after flood conditions, including maintenance and repair of public utilities (sewer, gas, electrical and water systems), facilities, streets and bridges.

(13) Such other factors which are relevant to the purpose of this Ordinance.

c. Conditions Attached to Variances – Upon consideration of the factors listed above, the Board may attach such conditions to the granting of variances as it deems necessary to further the purpose of this Ordinance. Such conditions may include, but not necessarily to be limited to:

(1) Modification of waste disposal and water supply facilities.

(2) Limitation of periods of use and operation.

(3) Imposition of operational controls, sureties, and deed restriction.

(4) Requirements for construction of channel modifications, dikes, levees, and other protective measures, provided such are approved by the Department of Natural Resources and are deemed the only practical alternative to achieving the propose of this Ordinance.

(5) Flood-proofing measures.

6-2-5 NONCONFORMING USES.

1. A structure or the use of a structure or premises which was lawful before the passage or amendment of this Ordinance, but which is not in conformity with the provisions of this Ordinance, may be continued subject to the following conditions:

a. If such use is discontinued for six (6) consecutive months, any future use of the building premises shall conform to this Ordinance.

b. Uses or adjuncts thereof that are or become nuisances shall not be entitled to continue as nonconforming uses.

2. If any nonconforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than fifty (50) percent of the market value of the structure before the damage occurred, unless it is reconstructed in conformity with the provisions of this Ordinance. This limitation does not include the cost of any alteration to comply with the existing state or local health, sanitary, building or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places, provided that the alternation shall not preclude its continued designation.

6-2-6 PENALTIES FOR VIOLATION

Violations of the provisions of this Ordinance or failure to comply with any of the requirements shall constitute a misdemeanor. Any person who violates this Ordinance or fails to comply with any of its requirements shall upon conviction thereof be fined not more than \$500.00 (five hundred dollars) or be imprisoned for not more than thirty (30) days. Nothing herein contained prevents the City of Latimer from taking such other lawful action as is necessary to prevent or remedy violation.

6-2-7 AMENDMENTS

The regulations and standards set forth in this Ordinance may from time to time be amended, supplemented, changed or repealed. No amendment, supplement, change or modification shall be undertaken without prior approval of the Department of Natural Resources.

5. “Expansion of Existing Factory-Built home Park or Subdivision” The preparation of additional sites by the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).
6. “Factory-built Home” Any structure, designed for residential use which is wholly or in substantial part, made, fabricated, formed or assembled in manufacturing facilities for installation or assembly and installation, on a building site. For the purpose of this Ordinance factory-built home include mobile homes, manufactured homes, and modular homes, and also include “recreational vehicles: which are placed on a site for greater than 180 consecutive days and not fully licensed for and ready for highway use.
7. “Flood” A general and temporary condition of partial or complete inundation of normally dry land areas resulting from the overflow of streams of rivers or rivers or from the usual and rapid runoff of surface waters from any source.
8. “Flood Elevation” The elevation floodwaters would reach at a particular site during the occurrence of a specific flood. For instance, the 100-year flood elevation is the elevation of flood waters related to the occurrence of the 100-year flood.
9. “Flood Insurance Rate Map” The official map prepared as part of (but published separately from) the Flood Insurance Study which delineates both the hazard areas and the risk premium zones applicable to the community.

13. “Floodway” The channel of a river or stream and those portions of the floodplains adjoining the channel, which are reasonably required to carry and discharge flood waters or flood flows so that confinement of flood flows to the floodway area will not cumulatively increase the water surface elevation of the base flood by more than one (1) foot.

14. “Floodway Fringe” Those portions of the floodplain other than the floodway, which can be filled, leveed, or otherwise obstructed without causing substantially higher flood levels or flow velocities.

15. “Historic Structure” Any structure that is:

a. Listed individually in the National Register of Historic Places, maintained by the Department of Interior, or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing of the National Register.

b. Certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a district preliminarily determined by the Secretary to qualify as a registered historic district.

c. Individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or,

16. “Lowest Floor” the floor of the lowest enclosed area in a building including a basement except when all the following criteria are met:

a. The enclosed area is designed to flood to equalize hydrostatic pressure during floods with walls or openings that satisfy the provisions of 6-2-3(4)(a) of this Ordinance and

b. The enclosed area is unfinished (not carpeted, dry walled, etc.) and used solely for low damage potential uses such as building access, parking or storage, and

c. Machinery and service facilities (e.g., hot water heater, furnace, electrical service) contained in the enclosed area are located at least one (1) foot above the 100-year flood level, and

d. The enclosed area is not a “basement” as defined in this section.

In cases where the lowest enclosed area satisfies the criteria a, b, c and d above, the lowest floor is the floor of the next highest enclosed area that does not satisfy the criteria above.

17. “Minor Projects” Small development activities (except for filling, grading, and excavating) value at less than \$500.00

18. “New Construction” (new buildings, factory-built home parks) Those structures or development for which the start of construction commenced on or after the effective date of the first floodplain management regulations adopted by the community and includes any subsequent improvements to such structures.

19. “New Factory-Built Home Park or Subdivision” “A factory-built home park or subdivision for which the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed on or after the effective date of the effective date of the first floodplain management regulations adopted by the community and includes any subsequent improvements to such structures.

20. “One Hundred (100) Year Flood” A flood, the magnitude of which has a one (1) percent chance of being equaled or exceeded in any given year or which, on the average, will be equaled or exceeded at least once every one hundred (100) years.

22. “Routine Maintenance of Existing Buildings and Facilities” Repairs necessary to keep a structure in a safe and habitable condition that do not trigger a building permit, provided they are not associated with a general improvement of the structure or repair of a damaged structure. Such repairs including:

- a. Normal maintenance of structures such as re-roofing, replacing roofing tiles and replacing siding;
- b. Exterior and interior painting, papering, tiling, carpeting, cabinets, counter tops and similar finish work;

24. “Start of Construction” Includes substantial improvement, and means the date the development permit was issued, provided the actual start of construction, repair, reconstruction, rehabilitation, addition, placement, or other improvement, was within 180 days of the permit date. The actual start means either the first placement or permanent construction of a structure on a site, such as pouring of a slab or footings, the installation of pile, the construction of columns, or any work beyond the stage of excavation; or the placement of a factory-built home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include the installation of streets and/or walkways; nor does it include excavation for a basement, footings, piers, or foundations or the erection of temporary forma; nor does it include the installation on the property of accessory buildings such as garages or sheds not occupied as dwelling units or not part of the main structure. For a substantial improvement the actual start of construction means the first alteration of any wall, ceiling, floor, or other structural part of the building, whether or not that alteration affects the external dimensions of the building.

- a. Any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds fifty (50) percent of the market value of the structure either (i) before the “start of construction” of the improvement, or (ii) if the structure has been “substantially damaged” and is being restored, before the damage occurred.

b. The term also does not include any alteration of an “historic structure”, provided the alteration will not preclude the structure’s designation as “historic structure.”

c. Any addition which increases the original floor area of a building by 25 percent or more. All additions constructed after on or after the first floodplain management regulations adopted by the community shall be added to any proposed addition in determining whether the total increase in original floor space would exceed 25 percent.
