

PROTECTING YOUR DIGITAL FOOTPRINT & ONLINE SAFETY

## Secure Mobile360

Safeguard your mobile device and take back control of your personal privacy

Secure Mobile360 is an evolution of the concept of a Virtual Private Network (VPN).

A cutting-edge mobile application that shields your digital world through top tier, end-to-end encrypted WireGuard VPN technology with active cybersecurity and privacy protection.

Supports iOS and Android devices

Secure Mobile360 picks up where VPNs left off:

- Built on the latest encryption and security standards
- Minimize network overhead
- Respect user's privacy
- Protect against bad actors

*"Arguing that you don't care about the right to privacy because you have nothing to hide is no different than saying you don't care about free speech because you have nothing to say."*  
- Edward Snowden

### Active Cybersecurity Defense

#### ADVANCED CYBERSECURITY

Actively defends against malicious attacks, ensuring your data and identity stay safe and secure

#### PROACTIVE SITE BLOCKING

Blocks malicious sites. Proactively allows you to browse the internet without worrying about potential breaches or scams.

#### SAFE ONLINE TRANSACTIONS

We act as a virtual shield, protecting your online transactions and provide a worry-free shopping experience

#### STRICT PRIVACY

We stand firmly behind our "No Log Retention" policy. Online activities remain private and confidential, with no logs to track or trails to follow.
