Cyber Wellness

PROTECTING YOUR DIGITAL FOOTPRINT & ONLINE SAFETY

"Smart" Home Network Security

Safeguard your family's security and privacy, in one easy-to-use solution.

Internet connected devices make your home smart, but these gadgets could pose a security risk for the unaware.

Understanding how smart home technology exposes you to risks can help you take action to ensure your home security.

Safeguard your privacy and protect all your connected devices against phishing, malware, cyber intrusions, and hacking 24x7.

How We Protect Your Home Network

IDENTIFY

The first step to a secure network begins with identifying which devices are connected and if those devices should be allowed on the network

PROTECT

You need network wide protection. We protect all connected devices against viruses, malware, & spyware, privacy attacks, and malicious hacks.

DETECT

More powerful than a firewall and provides continuous protection against both inside & outside threats. Detects and neutralizes new threats.

RESPOND

We block malicious threats and immediately notify you through the free mobile app. You also receive notifications on unusual device activity and new device connections.
