

Looking for an opportunity to work part time and show off your programming skills? Our company, *SideSpeak*, is looking for a motivated stack developer to create and develop new products.

While your main responsibilities will focus on building web applications, you'll contribute to the product definition and UI design, the overall system architecture and the go-to-market plan.

You're the ideal candidate for this job if you love to work on a small, autonomous team, can work productively from home, take pride in the quality of both the code and user experiences that you create, crave variety in your work and are comfortable working in any part of the stack.

YOU'LL BE RESPONSIBLE FOR:

- Working closely with product designers to refine and implement a product vision.
- Rapidly taking new ideas from concept to launch and beyond.
- Applying your experiences to help define the overall product architecture, choose the tech stack, and contribute to all aspects of development.
- Identifying opportunities to build reusable tools and frameworks that will enable you and the rest of the team to more rapidly develop future products.

IDEALLY, YOU SHOULD HAVE:

- Spent at least 2 years in professional software engineering roles/classes.
- Built web-based products from scratch and have experience at building application front ends in HTML, CSS and JavaScript, and be comfortable designing APIs and SDKs and implementing backends to go with them.
- Worked close with designers to create new experiences and speak their language and share their values.
- Worked on projects that are user-centric and be passionate about making products that real people will find indispensable.
- Worked with video conferencing platforms like Zoom, WebEx, etc. and their APIs/SDKs.

- Exceptional communication skills, with an aptitude to convey clear thoughts and ideas.
- Worked in a startup environment and be comfortable with ambiguity and change.
- Delivered on ambitious goals.
- Experience working with streaming video and WebGL.

This is a part-time position reporting to our Head of Technology. This position can be based in any location. Since our distributed team works across US time zones, US-based applicants are preferred.

Why work at SideSpeak? Because work should be fun and engage your inner creativity and imagination. That's what we drive for here.

All of us at SideSpeak are committed to creating a safe and fun work environment. All qualified applicants will be considered for employment regardless of race, color, religion, gender, gender identity or expression, sexual orientation, national origin, genetics, disability, age, or veteran status.

Come join our team.
