

Better than Breakout Rooms

The idea of a breakout room, where small groups can meet during a videoconference, has real value but can be a nightmare to administer.

In a breakout room, the meeting organizer must not only setup these rooms, they also must organize them.

With the SideSpeak app, any participant can invite any other participant to a private SideSpeak session, all without any interruptions to your active online meeting.

Release of ver 2.7 **P.1**

Better than Breakout Rooms **P.1**

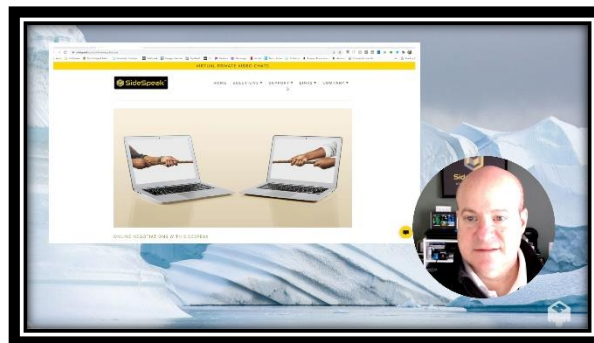

When to Use SideSpeak **P.2**

Release of Version 2.7

Try out the many new features in ver 2.7. Here are some highlights:

1. New and improved user interface with less clutter on the SideSpeak meeting frame.
2. Enhanced mobile/tablet experience.
3. "Open in New Window" feature allows SideSpeak to display in it's own window vs. being tied to your browser tab. This allows more control to resize the app to better fit your individual device.
4. Added whiteboards, ability to share files and collaborative document editing.
5. New "Help" menu for direct access to assistance and resources.
6. Three new editions including Personal (free), Premium and Enterprise.

Q. How do I upgrade to ver 2.7?

A. Because there are no downloads or plug-ins to run the SideSpeak app, simply host or join a SideSpeak meeting and you're automatically on the latest version.

Q. Where can I find help on using the SideSpeak app?

A. Access our Help center for topics including technical support, tips, troubleshooting issues, live chat, video library and resources to make your next SideSpeak session experience great.

When to Use SideSpeak

Here are a few examples where using SideSpeak can add value to your virtual meetings:

Negotiations

[Click for Details](#)

During an online negotiation, use SideSpeak to **privately collaborate** with your remote team while still engaged in the current Zoom meeting.

Hiring

[Click for Details](#)

Greatly improve the remote hiring process by using SideSpeak to **privately meet** with teammates during the online interview.

E-Learning

[Click for Details](#)

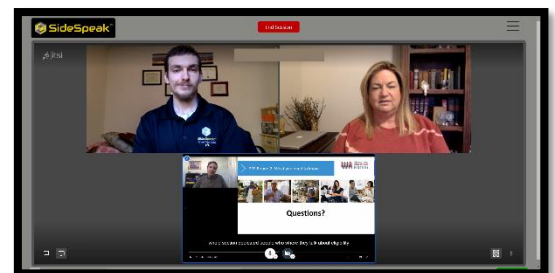

Make E-Learning more interactive and productive. Teacher Assistants can help students without interrupting the virtual classroom or creating separate breakout rooms by **engaging in private SideSpeak sessions** with the students during their online class.

Webcasts

[Click for Details](#)

Use SideSpeak to collaborate with your team, **in real-time**, while watching instructional webcasts.

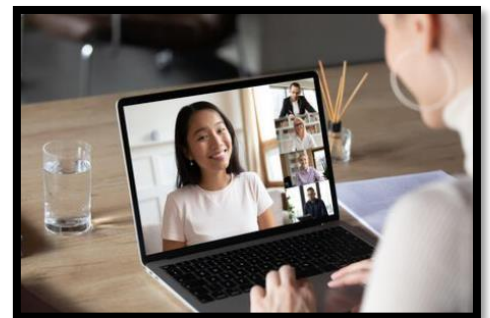

Standalone

[Click for Details](#)

Just need to quickly meet with someone online? Host a SideSpeak meeting with a **single click**. The SideSpeak app opens 50%-75% faster, ready to talk, compared to other videoconferencing platforms.
