

CAPABILITY STATEMENT

Maestre Builders Construction LLC is a Florida-Licensed, small business, minority-owned General Contractor providing prime construction services for the Florida Department of Transportation (FDOT) and public agencies statewide. As an emerging prime, the firm is led by experienced construction professionals and supported by a vetted network of FDOT-qualified subcontractors, serving as the single point of accountability for compliant, on-time, and cost-controlled projects.

Core Competencies

- Prime General Contracting & Construction Management
- Scheduling, Cost Control & Contract Administration
- Subcontractor & Vendor Coordination
- Roadway & Transportation Construction
- Concrete, Structural & Site Work
- Drainage, Sewer & Minor Civil Improvements
- Maintenance of Traffic (MOT)
- QA/QC, Safety & Compliance Oversight
- Client Relations, Communication and Technology

Past Performance - Key Personnel (Project Manager)

Project P15841 – Force Main Installation

Owner: Miami-Dade Water and Sewer Department

Scope: Furnish and install 10-inch force main, including 2,019 LF of C900 force main pipe, with pump station shutdowns and bypass pumping for connections and related restoration work.

Contract Value: \$1,600,000

Position: Project Manager (Key Personnel)

Results: Completed installation efficiently while maintaining system reliability and meeting all owner quality and inspection requirements.

Project S971 – Force Main Installation

Owner: Miami-Dade Water and Sewer Department

Scope: Furnish and install 16-inch force main along E. Country Club Drive, including 11,900 LF of C900 force main pipe. Work included pump station shutdowns with bypass pumping for tie-in connections, plus curb, sidewalk, and asphalt restoration

Contract Value: \$7,210,000

Position: Project Manager (Key Personnel)

Results: Maintained continuous wastewater service through coordinated bypass pumping while meeting all schedule, safety, and quality requirements.

Project T2776 – Pump Station Upgrade & Force Main Installation

Owner: Miami-Dade Water and Sewer Department

Scope: Upgrade of Pump Station PS470 and installation of 12-inch force main, including 980 LF of C900 force main pipe. Included full pump station shutdowns with bypass pumping, new sewage pumping station bypass system, electrical upgrades, wet well improvements, valve vault installation, and associated restoration.

Contract Value: \$2,000,000

Position: Project Manager (Key Personnel)

Results: Successfully executed complex pump station upgrades with zero service interruptions and full compliance with WASD operational and safety standards.
