Locally made product

# Low calo, High Protein Gelato

## Why are we different?

Our protein Gelato is made from fresh local ingredients combined with products coming right from Italy where we originate from.

Unlike other products in the market, our Gelato is creamy and maintains its texture throughout time. The product isn't grainy, which makes the guilt-free experience just so much better.

## Exceptional taste, zero guilt

Indulge in the creamy goodness of our Gelato without worrying about compromising your health goals

## Perfect for any occasion

Whether it's a post-workout treat, a midday snack, or a dessert to share with friends and family, our gelato is the ideal choice for any occasion.

## Our nutritional content

Our nutritional Gelato content varies upon the flavour chosen. One of our most exciting flavours is the chocolate, this one only contains 130 calories per 11 grams of protein.

## Our Flavours

This product has been produced with care and lots of trials, we finalized two flavours so far, our chocolate and salted caramel. We are currently working on more exciting nutritious flavours. If you have any ideas in mind contact us to make it reality.

## Our Aim

Our aim to produce this product has been combining the texture of regular Gelato to high quality protein content, while taking away calories derived from sugars and fats. Craving a late night snack, feeling guilty after eating... well that won't have to happen again.

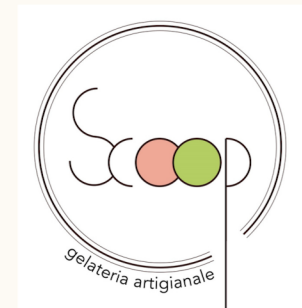

Our vision is to combine the guilty pleasures in life with a healthy lifestyle.
