Dear Sir/Madam.

I am writing this letter to recommend the services of Decos-re d.o.o, regional distributor of Xcelbio technology.

We initiated first common project in June 2014 with introduction of Xcelbio in our biogas plant Jezera. The company offers professional attitude and high quality services. We can say that we have always been satisfied by their work and their first concern is quality of service and customer satisfaction.

After achieving very good results on biogas plant Jezera we decided to expand Xcelbio services also to our other biogas plants, Nemščak and Motvarjevci.

We achieved extensive improvements in all three plants on:

- greatly improved stability of biological process,
- increased biogas production per tonne of oDM,
- increased CH<sub>4</sub> in biogas,
- less own electricity consumption for mixing due to lower viscosity of material in fermenters.

Total optimization results (increased incomes and/or reduced costs) at the biogas plants are:

- Jezera 15%
- Nemščak more than 15%
- Motvarjevci

My opinion is that we achieved these results of good team and Xcelbio technology in particular.

Based on the results achieved I definitely recommend the use of Xcelbio technology.

Sincerely,

**Panvita  
EKOTEH d.o.o.**
