

Xcelbio Additional Homeopathic applications

ANECDOTES use of Xcelbio in health care

XCEL BIO IS 100% NATURAL, THE WORST THING THAT CAN HAPPEN IS NOTHING

Over the year's users of Bio Enhancement technology have used the Xcelbio Fluid in a variety of healthcare applications. However, all these must be considered anecdotal since they were not evaluated under official protocols other than a series of clinical trials that were conducted in the USA by a pharmaceutical company on first- and second-degree burns. These results are not available to us (I wonder why!).

Please look at this, our technology is based on this technology.

Summary:

The uses fall into a number of types:

1. Antibiotic effect.
 2. Immune response by topical application.
 3. Yeast displacement (Candida in female of species)
 4. Preventative Skin and bathwater application
 5. Preventative by consumption
-
1. Two areas of application exist. Application to the skin, e.g. on a dressing which is wetted with Xcelbio Fluid for cuts, boils etc. Appears to act as an antibiotic and promotes rate of healing (see 2). The second is internal application via the mouth for treatment of mouth ulcers and in one documented incident in Prague teaching hospital the treatment of chronic throat ulceration (angina) which was not responsive to heavy antibiotic treatment. Condition improved from serious to discharge in one week. Application was by mouth 4 times per day.
 2. The spraying or wetting of insect bites, sunburn, minor burns, wounds results in a rapid change in reaction. The biggest issue is getting the stuff to stay in position long enough to adsorb. Other conditions where we have seen good impact is on chronic shingles in the aged, a similar aid related skin condition with back blistering, acne, psoriasis, Irritable bowel syndrome, peptic ulcers and many other skin conditions. Again, the difficulty arises with application and compliance. For shingles we had the patient apply a wetted cloth four times per day.
 3. Women with Candida yeast problems, even of a chronic nature, have remarkable improvements by addition of 1lt to the bathwater and maintenance per mouth (200 ml/day)

4. Routine addition to bathwater and direct massage into skin. Reportedly improves skin texture etc. (reduction of wrinkles)
5. A number of people consume Xcelbio Fluid on a daily basis either directly 200 ml/day or because it is contained in the water system, as is the case on a couple of farms. It has reportedly assisted body builders cope with their high protein diets, reduce stomach upsets and reduces incidence and impact of colds.

We have also successfully treated cases of:

- Irritable Bowel Syndrome
- Peptic Ulcers
- Psoriasis
- Chronic fatigue syndrome (CFS) also known Myalgic encephalomyelitis (ME).
- Chronic sinusitis

Some more actual anecdotal case studies.

One of our partners has suffered with sinusitis for her whole life, continuously on antibiotics without much relief. She filled an atomizer with Xcelbio and started spraying her nasal passage 4 times daily. After 7 days she had complete relief.

As a result of this success they decided to try the atomizer as an Asma spray to treat their lungs (in view of Covid 19) It seems that it works very well, and they could feel the difference in the airways.

I personally have been drinking Xcelbio for years, as a result, no colds, no flu, I believe my immune system is at maximum efficiency.
