SUMMARY

My journey in architecture began in high school when I was selected for Camp Arch through Texas A&M in summer 2022, where I worked on campus and in the community with the Landscape and Urban Planning cohort, delivering sustainability-focused project outcomes. I've completed Architectural Histories, Social and Behavioral Factors, Computational Methods, and Sustainability. I'm also pursuing a minor in Artificial Intelligence for Business. I'm seeking an internship from spring through summer of 2027 to apply that combination in a real-world setting. My GPA of 3.86, earned while working and competing in sports, reflects my work ethic.
