

Technology Tools for Modern Michigan Assessors

6 Hour Continuing Education Course

Are you looking to save time and improve assessing data workflows? This course is designed to equip Michigan Assessment and Equalization professionals with a better understanding of the technology available to them and directly apply that technology to everyday assessment practices. The course will include an overview of computer software for processing assessment data, as well as covering the practical uses for Artificial Intelligence (AI) to increase productivity and data set visualization and presentation. Participants will explore important GIS functions every assessor should know, along with an introduction to using Microsoft Power BI.

- DATE:** Tuesday, August 4, 2026
