

ABOUT US

Founded in 1977 by two friends as a small sheet metal shop, ISM has grown into a local leader in industrial machining, fabrication and processing. Our 42,000 square foot facility houses CNC machining centers, a Trumpf laser, a Techni waterjet, 3 press brakes, a large variety of supplementary fabrication and machining equipment, and a team of capable designers, machinists and fabricators eager to make your vision a reality.

MACHINING

Our machining department houses a variety of equipment to fit your needs. Our milling capabilities accommodate parts up to 120 inches long. Our machines also have turning capabilities up to 24 inches around and 160 inches long. We continuously invest in equipment that will expand our ability to support our fabrication department, as well as meet the wide variety of our customers' needs. To see our equipment list, please visit our website.

FABRICATION

With over 45 years of experience in sheet metal fabrication, we have developed a wide range of capabilities including air and product movement, platform and stair fabrication, architectural accents and more. Our fabricators are trained in steel, stainless steel, and aluminum welding. Please visit our website for more details on our fabrication services.

PROCESSING

We offer laser cutting services for materials up to 1 inch thick and waterjet cutting for materials up to 8 inches thick. Our facility also houses 3 press brakes for metal forming and a band saw for cutting shape stock to length. For more information on our processing equipment and capabilities, please visit our website.
