

Supplier and Subcontractor Introduction Policy

Trade Leads UK may help Clients identify and connect with relevant suppliers, subcontractors and service providers based on trade, location, project type and availability.

Introductions may include trade and location-based searches, supplier shortlists, introductory calls or emails, availability checks where possible, capability notes and service-area summaries.

Trade Leads UK does not guarantee third-party pricing, performance, availability, financial standing, competence, insurance, compliance, creditworthiness, quality, lead times or contractual reliability. The Client must carry out its own

commercial, technical, insurance, safety and contractual checks before appointing any third party.
