TESTING, COLLECTION & WAC TESTING

Every test includes a final summary report.

All prices shown are final prices with no additions or taxes to be added after.

SERVICE / PACKAGE	WHAT IS INCLUDED	UNIT / FREQ.	PRICE
Same day sample collection & labour	Email "COLLECT TODAY" to sales@tradeleadsuk.com for same day collection if booked before 4pm. Please include which service you require, your phone number or email and the collection postcode. We will respond to confirm details. Price is based on our representative attending site and digging the samples if required.	Per visit	£195.00
Next day sample collection & labour	Email "COLLECT TOMORROW" to sales@tradeleadsuk.com for next day collection if booked before midnight. Please include which service you require, your phone number or email and the collection postcode. We will respond to confirm details. Price is based on our representative attending site and digging the samples if required.	Per visit	£169.00
1-2 day courier collection - collection only, no sample labour	Email "COURIER COLLECTION" to sales@tradeleadsuk.com for collection within 1-2 working days if booked before midnight. Please include which service you require, your phone number or email and the collection postcode. Collection is from the door or gate only and does not include digging or sample labour.	Per collection	£75.00
Waste Acceptance Criteria Testing - Full WAC - Standard Turnaround 5-7 Days	WAC testing helps determine the correct landfill disposal route for soil, muck away and waste materials. Testing can include leachate analysis, heavy metals, pH, organic content, hydrocarbons and other key contaminants. Samples are tested through an approved laboratory with results provided in report format.	Per sample	£375.00
Waste Acceptance Criteria Testing - WAC Inert Single Stage - Standard Turnaround 5-7 Days	WAC testing helps determine whether material is suitable for inert disposal. Samples are tested through an approved laboratory with results provided in report format.	Per sample	£375.00
Asbestos Identification	Asbestos identification verifies whether asbestos is present in the material being tested.	Per sample	£65.00
Asbestos Gravimetry	A laboratory test used to measure the approximate percentage of asbestos-containing material within a soil or waste sample. This is often used where asbestos has been identified and further quantification is required for waste classification or disposal purposes.	Per sample	£75.00
WAC Testing - 4 working day turnaround surcharge	Surcharge to return WAC testing results in 4 working days.	Add percentage on top of total WAC price	50%
WAC Testing - 3 working day turnaround surcharge	Surcharge to return WAC testing results in 3 working days.	Add percentage on top of total WAC price	100%
WAC Testing - 2 working day turnaround surcharge	Surcharge to return WAC testing results in 2 working days.	Add percentage on top of total WAC price	200%
WAC Testing - 1 working day turnaround surcharge	Surcharge to return WAC testing results in 1 working day.	Add percentage on top of total WAC price	300%

Important testing note:

Testing is arranged through approved third-party laboratory partners. Where required, samples may be submitted to UKAS-accredited laboratories. Test results, reports and certificates are issued by the relevant laboratory or testing provider. Trade Leads UK assists with sample collection, coordination, administration and client reporting support.

1-2 day courier collection - collection only, no sample labour	Email "COURIER COLLECTION" to sales@tradeleadsuk.com for collection within 1-2 working days if booked before midnight. Please include which service you require, your phone number or email and the collection postcode. Collection is from the door or gate only and does not include digging or sample labour.	Per collection	£75.00
Any NON-UKAS Aggregate Grading Test - Standard Turnaround 5-7 Days	An aggregate grading test checks the particle size distribution of an aggregate sample to confirm whether it meets the required specification. Commonly used for recycled aggregate, Type 1, pipe bedding, drainage stone, sands and other construction materials. Results are usually provided in a laboratory report or grading certificate.	Per sample	£85.00
Any UKAS Aggregate Grading Test - Standard Turnaround 5-7 Days	UKAS aggregate grading certificates provide independent laboratory confirmation of an aggregate particle size distribution. Testing is carried out by a UKAS-accredited laboratory to help demonstrate that material meets the required grading specification for construction, recycled aggregate, drainage, bedding or sub-base use.	Per sample	£100.00
Asbestos Identification	Asbestos identification verifies whether asbestos is present in the material being tested.	Per sample	£65.00
Asbestos Gravimetry	A laboratory test used to measure the approximate percentage of asbestos-containing material within a soil or waste sample. This is often used where asbestos has been identified and further quantification is required for waste classification or disposal purposes.	Per sample	£75.00
UKAS or Non-UKAS grading - 4 working day turnaround surcharge	Surcharge to return grading results in 4 working days.	Add percentage on top of total grading cost	50%
UKAS or Non-UKAS grading - 3 working day turnaround surcharge	Surcharge to return grading results in 3 working days.	Add percentage on top of total grading cost	100%
UKAS or Non-UKAS grading - 2 working day turnaround surcharge	Surcharge to return grading results in 2 working days.	Add percentage on top of total grading cost	200%
UKAS or Non-UKAS grading - 1 working day turnaround surcharge	Surcharge to return grading results in 1 working day.	Add percentage on top of total grading cost	300%
