

LIGHTENER

UP TO 8 LEVELS W/20 VOL

GREAT LIFT. INCREDIBLE CONDITION.

How Does This Lightener Work?

Watercolors Lightener is formulated for on or off scalp lightening services. It contains 3 persulfates that help break down material melanin, allowing fast lightening. Chelating agents have been added to prevent any distortion from minerals that exist in water.

Watercolors Lightener is de-dusted and contains Aloe and Argan Oil to moisturize while hair is lifting. Keratin Amino Acids strengthen existing bonds during lift. And the NEW lavender color makes it easy to read and mixes quickly to a creamy, stay-put texture.

DIRECTIONS

Mixing with Two Developer Options

ON or OFF SCALP: 1 scoop of lightener + 1.5 oz of 10 or 20 Vol. Tressa Colourage Cream Developer. Do not place under dryer heat.

ON or OFF SCALP: 1 scoop of lightener + 2 oz of 10, 20, 30 or 40 Vol. Tressa Processing Cream. Do not place under dryer heat.

APPLICATION

Do not pre-shampoo for on-scalp application. Utilize foils, caps and special techniques for off-scalp lightening. Do a strand test on all applications. Wait 24 hours before reapplying, checking for sensitivity.

TIMING

Depends on natural starting level, desired level of lift, and the condition of the hair. Check processing frequently until desired level is reached. Time can vary widely.

REMOVAL

Rinse hair thoroughly with tepid water and shampoo with Tressa's Replenishing Shampoo. Follow with Tressa's Replenishing Conditioner.

NOTE: Refer to Tressa's color manual for more complete hair instruction. You may use Tressa's Colourage Translucent Gel Color for toning, simply follow color instructions. **CAUTION:** Do not apply if scalp is broken or irritated. Keep mixture away from face, eyes and neck. Do not apply to eyebrows, eyelashes or other body hair. In case of accidental contact with eyes, immediately flush with water for 15 minutes and consult a Physician. Keep out of reach of children. Store in a cool, dry place. Do not use metal mixing bowls, brushes or stirrers. Tightly seal package after use.

Watercolors as a Toner

Watercolors are excellent toners for highlights that need a warm or cool adjustment. Watercolors Violet Washe and Wet Sand are both great examples of how to solve high-lift or lightened hair that becomes brassy or dull. Refer to the toner chart to find the acceptable toner.

When do I use a toner?

A toner is used to add warm or cool hues to hair that has been pre-lightened by a product or even the sun. A toning shampoo may be needed as an at-home support tool for the customer between lightening services.
