Fastener designed to attach metal roofing and sliding in post-frame and residential metal roofing applications. Included EPDM washer.

Zinc-aluminum alloy fastener designed to attach metal roofing and sliding in post-frame and residential metal roofing applications. Long-life protection. Included EPDM washer.

304 stainless cupped head and EPDM washer provide long-life protection in harsh environments.

Fastener is an alternative to zinc-aluminum alloy head. Smaller HWH for a more attractive appearance versus regular HWH fasteners.
