TAP INTO the POWER of your soul

AND HAVE success BE simple,

graceful, and FULFILLING!

WHAT YOU'RE GONNA LEARN

The Core Class Agenda:

*How the power of your soul can bless you with success

***The surprising way disconnection from soul power is sabotaging your ability to sustain success** - and why most accomplished professionals are unknowingly operating from ego force instead of authentic power (this explains the exhaustion)

*The significance of aligning the power of the subconscious with the magic of your soul

***Why what's holding you back from your next level is rarely lack of skill or opportunity** (and the hidden safety issue you're not seeing). Uncover the secret behind why successful people sabotage themselves just as they're about to break through - it's not self-doubt, but something entirely different buried in your subconscious

*Why feeling good about you is so important to your happiness and success

***The WORST thing you can do if you want sustainable success.** The hidden mechanism that silently destroys everything you've built - and most people trigger it automatically when they start to rise (even Bob Proctor's students fell into this trap)

*The Higher Ground Principle of Soul-Centered-Success

***Why you should NEVER try to force your way to the next level** when you feel stuck (most people push harder automatically) ... Instead use this counterintuitive approach that aligns you with your

soul's power and makes success feel effortless rather than exhausting

*How to recognize when you're sabotaging some aspect of your life (before it's too late)

***REVEALED: How staying in energy-draining relationships feeds the law of attraction**

destructively - amplifying struggle, resistance, and self-sabotage - and why identifying these five types of people in your circle is the ultimate key to protecting your power

*The 5 biggest enemies of success

***The little known reason why some people get stuck at the same level of success for decades** and seem to repeat the same patterns over and over - Plus, how this connects directly to your subconscious safety mechanisms and soul disconnection

*The fastest way to have everything that is truly yours come to you

***Uncover the secret ways your subconscious emergency brake influences your success** in every area - from finances to relationships to health (and learn how the three-stage safety development process can finally turn off this self-sabotage mechanism) - so you can stop burning out your engine

*The shadow side of success and how to heal it

***How to rise to your next level of success without triggering the sabotage response.** Think you need to completely start over? You Don't. Discover the overlooked principle that makes even the biggest transitions feel natural and sustainable - and why most people's nervous systems reject rapid change

*The one thing that holds most people back in their lives, (especially in business)

***The one partnership most successful people neglect** that has possibly sabotaged their greatest opportunities: If you've ever felt like the universe was working against you instead of with you, this missing

connection could be the culprit. Strengthening it early might just transform everything

*Most important question to focus on when creating success

***Why responding from soul power rather than ego force transforms everything** - Discover how to tap into authentic power that doesn't drain you, so you stop burning through your energy (and start attracting opportunities effortlessly) - by the way, this shift indirectly makes your universe feel like a friendly place

*The three key elements of the success triangle

***The surprising way your current level of success reveals exactly what your soul is ready for next** - many students describe how this awareness helped them stop forcing outcomes and start flowing with their natural expansion timeline

And in this transformative three day seminar experience you'll also learn...

- *How to put an end to the constant chasing after success (which is not the way our Soul rolls)
- *What creates and/or fosters success and what doesn't
- *The 5 key essentials on what Soul-Centered-Success requires
- *What is the source code of Soul Success and what does it do?
- *Why Soul-Centered Success and what is it truly all about
- *What having Soul Success is truly all about and much much more...
