

# Homeland Security

- Americans are suffering and in danger
- Enact laws now that resolve this, not double talk
- We have proven it can be done with previous policy

With open borders we are seeing 100's of thousands of deaths, Human slavery, and crime increase across the US as our resources and budgets from our hard earned taxes are diminished.

Hospitals are overcapacity at our border cities where local residences are at risk of being turned away from the Hospital that was built for them. Crime and Deaths from Felons and gang members crossing the border from Mexico is documented.

The DEA, (USA Drug Enforcement Agency) has requested both Fentanyl and the Cartels that organize to manufacture and distribute these drugs into the USA be classified as Terrorist organizations to enable the US resources we need to stop the slaughter of Americans. The Terrorist poison from Mexican Cartels is increasing. Why are we resisting what the DEA subject matter experts say they need to address the needless deaths of our loved ones? 911 resulted in approximately 3,000 American deaths and we went to war to stop those terrorists. We went to war! By year 3 of Biden's Presidency, 100 times more deaths than 911 or 300,000 Fentanyl deaths are expected. At 100 times more deaths than 911, classifying Mexico's Cartels and China's drug labs and distribution network as Terrorists is the least we can do to save American lives. Mexico states they **will not** help us with Fentanyl. And our response is what? E mail your Congressional representative and both of your Senators now and demand classifying Mexico cartels as Terrorists per the DEA's request.
