

United we stand –

- History shows United we will stand
- Multiple Non Government Organizations & Non Profits Business plans are based on dividing and triggering our emotions.
- Triggering America and dividing the USA is a business, we need to recognize we are a High performing Union and those Triggers need to be recognized and ignored for what they are.

Our Constitution starts with a sentence containing “forms a perfect union”. John Dickinson one of our founding fathers who helped write the constitution, penned, “**United we stand**, divided we fall. In 1858, President Lincoln again stated,” **United we stand**, divided we fall.

Multiple Nations, lobbying groups, Non profits and Global groups have businesses plans that profit from dividing us.

With today’s events it has never been more apparent we need to work together after seeing repeated 50/50 voter elections for years and trigger words used to get donations by inflaming the extremes.

We believe in free speech and listening to alternate ideas, that is absolutely a yes. We do not promote crime by releasing felons, and wasting our precious tax dollars we need for our own peoples causes who actually pay the taxes.

We know we are intentionally being divided by propaganda from extremists on both sides of every emotional trigger word they can dream up.

Extremes example:

No Abortions including when the mother’s life is at stake. No one wants this but it is stated to inflame the abortions divisions.

Approve all abortions including denying care after a baby is born during an abortion that lived and letting it die. No one wants this either, but it is stated to inflame the abortion divisions in America.

Race equality, LGBTQIA+ All great causes and any other trigger word you can think of for emotional terrorism that creates donations to their nonprofit business. Yes these are good

causes to make sure all Americans are treated equally, but we need to understand how organizations manipulate our emotions and our charitable feelings and divide our nation into extremes.

America is 70-80% in the middle of most issues but we let these groups trigger us to divide us and then profit off of us asking for donations to stop each extreme.

We need to teach our country to ignore these triggers and we all need to believe, One race, the The United States of America's Human race, **United we stand**, divided we fall.
