

Warehouses

SLAM & WARP

Inbound

WARP

- **Warehouse Automated Receipt & Putaway**

Its a part of the inbound Process:

WARP is a process where the inbound shipments gets recorded and goes through a quality inspection, count before ordering placed in a bin in the warehouse.

Speed of these activities determine how quickly stock is visible to Sales.

Outbound

SLAM

- **Scan**
- **Label**
- **Apply**
- **Manifest**

Its part of the outbound Process:

Slam is a process of placing the shipping labels on a package. This is the final process of a outbound process.

Speed of these activities determined how quickly the warehouse can dispatch orders.
