

## IMMEDIATE RELEASE

### DOCU+ OPENS PRODUCTION OFFICE IN SEOUL

SEOUL, SOUTH KOREA (December, 7, 2021) - Docu+, the makers of ZERO WASTE, today announced they are opening a new production office in the historic film neighborhood of Chungmuro; in Seoul, South Korea. This space will accommodate growing production demands from pre-production (Dream your Dreamz) to post production (Zero Waste).

Plans to commence operations in Seoul were initiated by Danny Kim, the founder of Docu+ with a generous grant from the Junggu Cultural Foundation. The new office includes pre-production meeting space (remote and in-person) and post production facilities, interview rooms and more.

“The opening of our new Seoul HQ is an important step towards realizing our vision in producing social impact documentaries in film and TV,” said the founder Danny Kim. “The new office will be the first of many important changes for the company in 2022.”

The new office is also expected to generate \$450K in sales of Docu+ for Y2022. It will primarily handle pre-production to post production in client branded film content.

The film industry has recently undergone the change of eco system of traditional mode of exhibition to online streaming services. Docu+ has been involved in producing content for both streaming and film exhibition since the inception in March 2021. It has recently been ranked as the top film/TV production company in South Korea by the Best Startup Asia site.

#### About Docu+
