Thank you for giving us the opportunity to provide you with the following proposal.

JOB DESCRIPTION

Proposal:

Supply and install a new 8.5KW LG High Efficiency Series Inverter reverse cycle AC unit to condition your downstairs office area. Alternatively we can install a 8.5KW Daikin XL Inverter Reverse cycle AC unit (FTXV85) for a total cost of \$5,714.61 inc gst. Please notify us on acceptance which machinery you would prefer to install.

Indoor unit:

Indoor unit will be installed onto bulk head provided by others along the back wall of the office area.

Outdoor unit:

Mounted onto a wall bracket in the corner at the front of the premises.

Refrigeration Pipe Work and interconnection cable:

Refrigeration and drainage pipe work will run through bulk head provided by others along the back wall. A core hole will be required through the concrete external wall. PVC capping will enclose pipe work externally.

Drainage:

Unit will drain into local waste water down pipe.

Electrical power supply:

To be installed by on site electrician including circuit breaker and outdoor isolator.

WIFI control (LG unit only):

Using your premises wireless internet this machine has the ability to be controlled from your smart phone, or I pad. This will give you the opportunity to operate your AC unit not only from around your building but from a remote location using the mobile data on you smart device. You will need to download the app to your device prior to machine installation.

Please note, the function of the WIFI modem is dependent on the strength of WIFI signal in your home and indoor unit location.

Is this machine an inverter unit? What is an inverter Unit?

Yes this is an inverter unit. An inverter machine has the ability to start up slowly and only increase in speed to match the heat load. If you have a low heat load, the machine might just run at idle. This is the most economical way to operate your AC unit when you consider power consumption.

An inverter machine is always rated at its most economical capacity.

What is reverse cycle and is this unit a reverse cycle machine?

Yes, this is a reverse cycle machine. This means the AC unit has the ability to operate in heating and cooling modes.

Time Frames:

Installations are carried out in normal working hours Monday to Friday 8am to 4pm

Lead time from date of acceptance: 4-6 weeks (Pending machinery availability), Job duration: 2 days (pipe work installed after bulk head framing installed, completed once bulk head is finished).

Warranty:

5-year manufactures warranty on spare parts and labour is offered on all Daikin and LG Air Conditioning equipment for domestic applications. A further 5-year parts warranty is offered on LG Inverter compressors - split systems only.

12 month installation warranty is offered on all ancillary installation components. These include, but are not limited to, control wiring, ducting, return air filter(s) grille, register, diffuse zone motors, controls/thermostats, pipe work and fabricated or added components.

Please note- All warranty work is to be carried out during normal working hours and excludes any additional services such as carpentry, electrical services, painting or crane hire services. The manufactures warranty only pertains to defective parts or equipment and does not include any servicing and maintenance issues such as water leaks.

Terms and conditions apply, please see warranty information in Terms and Conditions attached.

Who do I call if my machine breaks down within the warranty period:

Buderim Air are the Daikin, LG and Hisense authorized warranty repair agents for the Sunshine Coast and will handle any Daikin, LG or Hisense machinery failure within the 5/6 year period, from start to finish.
