

Eye of the Heart, Cynthia Bourgeault, 2020

Our human horizontal perspective is “only at eye level.”

World 1	Godhead – Holy Absolute, unknowable
*Shock Point 2	Energy and will of the Absolute
World 3	Consciousness / God manifests from nothing into something. Law of 3 – light, darkness, God (Torah)
World 6	Eros – pure creative life force; bridge between manifest and unmanifest. The highest realm touchable while still in human form. Universe begins. The Holy Ideas of the Enneagram touch W6 (R.Hudson).
World 12	Embodied Love – Christic & Bodhisatva consciousness. Agape . Endpoint of personal realms. Enneagram Virtues arise. Human Jesus @World 24 + Divine Jesus @World 6 = World 12; ie, in the middle. Shoot high to reach the middle. The endpoint of the personal realms. Arising of the Virtues of the Enneagram (R.Hudson).
World 24	Imaginal – direct perception thru the eye of the heart, the true organ of spiritual perception and seat of selfhood ; beginning of conscious human ; witnessing self; human Jesus; true vehicle of communication between the Worlds; conscience as core behavioral motivator; synchronicity; circular time; nonduality Surrendered beings – in the state of surrender we find peace Presence – light pours down from World 12 Law of Three : higher blends with lower to activate the middle; 2 steps forward, 1 back: Lower 48 + higher 12 = 24, the middle
Shock Point 1	★ Conscious labor – conscious awareness ★ Intentional suffering – surrender ; All things in the created order begin in fire and end in light, says Jacob Boehme, and as we are willing to entrust our lives to the outcome of fire, pain is not an opposing force, but “the ground of motion.” [Surrender is the single most frequently used word among female mystics. Meggan Watterson, <i>Reveal</i>]
World 48	Egoic – world as we know it; psychic; Earth; pre-conscious, asleep, necessary and sacred, yet immobile narratives/stories, sense of duality and scarcity, vices and virtues [not the same as Enneagram <u>V</u> irtues]
World 96	Personality – habits, fixations, Object Relations (reject, attach, frustration), conditional, acquired, boring, stuck, unstable, moon/lunatics; level of most of humans most of the time
World 192	Hell realms – anguished, craving, wrath, pride, envy, obsession, self-denigration.
↓ 12,288	Inorganic chemistry; no consciousness.

***shock points** – needed to move up the vertical axis [this chart] to the higher realms/Worlds; where progression is most vulnerable and most permeable.
