

The Synd-EZ TI kit provides a solution for damage to the syndesmosis joint which connects the tibia and fibula bones of the lower leg. This simple yet effective device is designed to help stabilize the ankle and is intended for use with a stainless steel fracture plate.

Versatile titanium design

- Ideal for use with or without a fracture plate
- Washer included for use without a fracture plate
- Top hat is low profile and self centering on fracture plates

Adjustable knotless construct

- Simplifies surgical procedure

Counter traction suture & tension handle

- Integrated for predictably smooth tension of construct

Synd-EZ SS Kit *Syndesmosis Repair*
